TWO NEW PROBATION OFFICERS APPOINTED

Judge Austin Names Miss Towle and Mrs. Hancock Court Officials

Two new probation officers have been appointed for Fresno county by Judge Austin of the Superior Court. Following the recommendation of the probation committee, Miss Ella M. Towle and Mrs. Frances J. Hancock have been named by the judge, their appointments to become effective November 1.

Miss Towle has been house secretary of the Y. W. C. A. of Fresno for the past two years. She is native of New England and a graduate of the Massachusetts State Normal School in Boston. She has been connected with the Y. W. C. A. work for a number of years. She will have charge of women and girls on probation and expects to work with all of the agencies attempting to help homeless and wayward girls. The remainder of this month she will spend in San Francisco and Oakland studying the method of the probation departments in those cities.

Mrs. Hancock is an expert office assistant. She was for four years in the district attorney's office in Victoria and is said to be one of the best stenographers and typists in Fresno. She will also assist in the management of those on probation, receive reports and talk with the women and girls brought to the office.

MUST REPORT ALL CASES OF TRUANCY

Probation Officer Calls Upon Teachers in Public Schools for Data

Chief Probation Officer Sessions has sent a letter to teachers throughout the county regarding truancy and attendance in the schools. The letter follows:

"Kindly let me know if your attendance is satisfactory. I am led to believe from conditions in some districts that teachers are so interested in their work that they are failing to report to the probation officer cases of truancy. Investigation concerning all children's attendance and report same to this office. Some teachers exclude undesirable and do not insist upon their attendance. All children must attend school, good, bad and indifferent, and the bad ones need school more than the others. Be particular to send exact date of absence, pupil's age, name of parent, residence and post office address. I hope to secure your co-operation."

SCHOOL OF INDUSTRY DOING SPLENDID WORK

Valuable Lessons in Self Control and Citizenship Taught Boys

Invitations have been received in Fresno from the superintendent of the Preston School of Industry, requesting the presence of the recipient at the fifth semi-annual inaugural ceremonies of the United Government of the school.

The cadet government, it is declared, has done splendid work for the boys in this school, and it has been a means of teaching very valuable lessons in self-control and citizenship to hundreds of boys; it has taught them a respect for the law and civil officer which the home, the public school and society generally had failed to teach. Not all the boys sent there have been able to respond to the opportunity offered by the self-government, but over 70 per cent have done so.

Several of those who have received invitations have notified the school authorities that they will be present.

REGISTRATION SHOWS GROWTH OF COUNTY

The growth of Fresno county is seen in the number of voters registered and to whom annuity ballots and other literature pertaining to the election have been sent. Eleven years ago the number of registered voters in the county was 7,200; this year the records contain the names of 38,300.

"JAPAN'S PLANS TO INVADE AMERICA," DREAM STORY OF YELLOW JOURNALIST

Under the above heading the ever enterprising newspapers of Mr. W. L. Hearst have published articles, a condensed translation of the Japanese pamphlet "Nihon Kaiten Yume Monogatari," which means "The Dream Story of the American-Japanese War."

There are a few things which the public must know in order to gauge the value of this story of an imaginary war with Japan. It is stated in the Hearst papers' editorial introduction to the translation that this Japanese book was published by the National Defense Association, of which Premier Count Okuma and ex-Premier Minister Baron Kato are president and vice president, respectively, and that the society is composed of all cabinet members and army and navy officers. This statement, if made knowingly, is a national fabrication.

The Japanese book is published with the approval of the Kokumin-gunkai, meaning the National Association of Military Affairs. Its author is anonymous. To make the publication as financial success, the author is named the high-sounding name for its sponsor. It was written from purely mercenary motives. As a matter of fact, this National Association of Military Affairs is a fiction. It is there is such a society, no one knows anything about it.

There is in Japan a governmental board named Kokubu-kai, or the National Defense Board. It consists of seven members, and the prime minister is ex-officio its president. No one familiar with Japanese affairs can confound this governmental board with the fictitious National Association of Military Affairs, which is the sponsor for the Japanese book translated by Mr. Hearst's papers. It must also be noted that the National Defense Board was organized only a year ago, while this book was published in June, 1915.

As far as we know, the book has sold only to the extent of some thousands copies, although it appeared at the psychological moment when the anti-alien land bill had just been enacted in California. It has never been popular and has already been consigned to the limbo of oblivion, where it properly belongs. The book is an echo of "General" Homer Lea's "The Valor of Ignorance," and an anonymous writer's "Banzai," both stories of an American-Japanese war, published in New York in 1909. It will also be recalled that when in 1905 Mr. Roosevelt sent a squadron of warships to the Far East, a pamphlet entitled

"The War of 1905 for the Supremacy of the Pacific" was published in London. It was assumed that it was written by a German residing in New York. The "Banzai" was also written originally by a German writer. In view of the appearance of such English publications, it is rather surprising that enterprising Japanese publishers had upon making money, had not published similar books long before the appearance of the pamphlet translated by the Hearst papers.

The latest contribution to the English stock of American-Japanese stories is "The United States and the Next War," written by a George Lattin and published in New York. The publication in America of this and other English books of a similar nature is about as indicative of American determination to wage war against Japan as the publication of their Japanese counterpart is indicative of Japanese intention to fight the United States. One is just as significant as the other, no more.

Author of "American-Japanese Relations," "Asia at the Door," etc., San Francisco, October 7, 1915.

MODERATION SECRET OF ADVANCED YEARS

United States Public Health Service Work- ing to Prolong Life

The United States Public Health Service and the various health agencies of this country are working to prolong the average duration of life. In this they are obeying the desire for existence which is the strongest instinct of mankind. Only a small proportion of the human race rounds out its four of duty on this earth. Some people are born with good bodies which they treat well. Having accidents they can live to a ripe old age. Some people are born with good bodies which they treat badly, and some people are born with poor bodies which they treat badly. They don't last long.

It is recorded that in 1793, in 1791, Henry Jenkins was born. He died in 1870, cut off at the age of 79. He remembered well the battle of Flodden Field. This occurred in 1513, when he was 12 years of age. The Register of Chancery and other court show the administration of oaths to him 110 years prior to his death. He gave deposition as a witness when he was 157. In his young manhood, when he was a little over 100, he was a remarkable swimmer.

The term "old age" too frequently is another name for the falling due of the debts of youth, over-eating, over-drinking, over-playing, over-working, these are drains on the bank of nature which must sooner or later must be met. Sometimes the day of reckoning can be put off a little bit, but Dame Nature will not be witted out of her claim. The remarkable thing about Henry Jenkins is the fact that he has left behind him no rules of living which would enable one to duplicate his feat. In this he showed great self-repression. As a matter of fact, there is no royal road to old age, and it is not to be obtained by a particular dietary or regimen of life. Perhaps the best rule may be expressed in one word, "Moderation." Moderation in food, moderation in drink, moderation in the joy and worries of life, moderation in work, moderation in recreation, equanimity of the mind, the soul and the body. These make for long tenure of life.

RAILROAD PREPARES FOR WINTER SPORTS

Adopt New Schedule for Cascadia and Hunting- ton Lake

Winter sports attract as many people as a rule as do those of the summer months. In fact, there are a large number who get more pleasure out of the winter, when the cold weather "fingers" one up, puts the "pop" into him and makes his ears tingle, than do those who believe that all that is good comes in the good old summer time. To the end that people in this section of the country may get all the enjoyment possible out of the range, the San Joaquin & Eastern railway announces its winter schedule effective tomorrow at 12:01 a. m. on trains running between El Prado, Auberry and Cascadia.

East bound—Leave El Prado, 1:35 p. m.; arrive Auberry, 3:28 p. m. Leave El Prado, 8 p. m.; arrive Auberry, 9:45 p. m.; leave Auberry, 9:51; arrive Cascadia, 2:26 p. m.

West bound—Leave Cascadia, 7:15 a. m.; arrive Auberry, 11:31 p. m.; leave Auberry, 11:41 p. m.; arrive El Prado, 1:20 p. m. Leave Auberry, 6 a. m.; arrive El Prado, 7:35 p. m.

SEEK MEMBERSHIP TO DEBATING SOCIETY

Local High School Ap- points Committee to Investigate

An attempt to join the state high school debating league will be made by students of the Fresno High school. At a meeting of the high school senate Friday night, a committee of three was appointed to investigate the possibilities of obtaining admission to the league.

During the past few years debates have been limited to the schools in the central part of the state. A membership to the league would enable students to take part in events with the leading schools.

Last night members of the senate debated on the question. Resolved, That the Single Tax System was one of the best interests of the American people. The affirmative was taken by John Douglas and Walter Markley. Milton Young and Herbert Andrews presented the negative. Harry McKee gave an address to the students on Socialism.

NOTICE

CONSULTATION FREE

Y. M. NOTES

An open house reception was held at the Y. M. C. A. yesterday morning for opening the preparatory and junior gymnasium classes. The preparatory program began at 9:30 o'clock, and the junior program at 10:30. Charles H. Tonne, physical director, had arranged for the occasion. The parents and friends of the boys were invited to attend the exercises.

The opening meeting of the P. N. Club, a Bible study club for high school and older boys, will be held at 6 o'clock next Tuesday. The event will be featured by a supper in the Association building. Judge H. Z. Austin, who has been the instructor of the club for the last four years, will again have charge of the club work.

Plans are laid to organize an inter-mediate P. N. Club—for the younger high school boys in the morning. The club is scheduled to meet at the same hour.

Dr. Hiram W. Edwards of the Fresno State Normal faculty gave a lecture and demonstration on "The Wireless" at the Association before the members of the Boy Scouts Friday night. Many of the boys are now constructing their own instruments. Dr. Clifford Sweet gave a talk on "Advanced First Aid Work to the Injured," using the Red Cross textbook.

A new assignment of Boy Scout uniforms and staffs have been received. The Scouts are planning to take over-night hike in the near future. Their plans for the fall also include the formation of a tennis club.

WHY PAY MORE?

We defy competition when it comes to workmanship and material used. Have your impression taken in the morning and go home with your teeth the same day. Open Saturday afternoons.

READ ARGUMENTS

The county clerk is sending to every voter a pamphlet containing the text of the referendum laws and constitutional amendments to be voted on October 26, together with arguments for and against the various propositions. These pamphlets are not so formidable as they look, and they should receive the careful study of every voter. After all, it is easy if you will go at it right. This is intended as a suggestion how to go at it.

The pamphlet contains two things—the measures themselves and the arguments for and against them. It would be better if the arguments were all printed first, in larger type, and then the measures as a supplement, for reference. Ordinarily, it is not necessary for the voter to read the bills in detail, but it is important that each voter have them, so that he may examine in detail whatever particular feature he may feel a critical interest in. The details of the measures have already been carefully worked out in the legislature, and if there were some serious fault in any provision of any one of them, we may be sure that the author of the opposing argument would have discovered it and pointed it out in his argument. What is before the voter is rather the principle and policy of the measures. This, in most cases, he can determine by reading the official arguments for and against. If these arguments leave him in any doubt, at any one point, then the text of the measures is there for him to examine that point for himself.

Unfortunately, the measures are in each case printed first, and then the arguments after, or sandwiched in between, in nearly the same print. It is therefore necessary to go a little searching to find the arguments, and to work more or less backward. But this is the way:
Read the titles of the eleven measures, to get clear what they are.
Hunt out and read the arguments, to decide what you think are their merits.
If any point then remains doubtful to you, study the parts of the measures covering that point.

NIGHT BEFORE LAST

Continuously and incurably, the San Francisco Chronicle sleeps the sleep of night before last. As witness, once more:

"If there is a party convention which has first formulated a party platform, then nominated a candidate pledged to its policies, the voter will be properly informed."
"Contrast this (the non-partisan primary) with the ordinary methods with which we are familiar, under which a state convention formulates a state policy uniform for that party within the state and nominates and seeks to elect a governor and legislature pledged to that policy."
But perhaps there is method, after all, in the Chronicle's somnambulism. What it is really seeking to restore is day before yesterday, but it does not dare say so. So it merely pretends to have slept over, so that it may claim that the issue is between tomorrow and day before yesterday, ignoring yesterday and today, when most of the things with which it seeks to frighten us in its vision of tomorrow have already happened and turned out not to be frightful at all.

THE BATTLE HARVEST MOON

O golden Harvest Moon that now slowly ascends the eastern skies, Glimpse through the elm tree's leafy boughs
In silent majesty you rise! On spires and roofs of the far-spreading town
Serenely in mellow splendor you look down.

Low now the sound of busy streets In the white silence dies away, Or from the charmed distance greets The ear like echoes of the day.
As slow in stately pomp, outdressing man,
You cities glid and desert caravan.

Along dim streets and avenues Thy rising tide of radiance flows, And in thy softened light they lose The garishness that daytime shows; Not all the city's wealth or pride or gold
Can with thy magic vie and pomp of old.

For, veiling stars with silvery light, Thou mak'st the skies one Milky Way, Thy silent progress through the night, 'Tis all an arrest but dawn of day; Dim continents and oceans dark you drown In floods of light as now the sleeping town.

Man's pomp of pride or place or power But transient in the moonlight seems For thou hast looked, as in this hour, On cities that are now but dreams; On Thebes and Nineveh, Palmyra, Tyre,
You loosed, and saw their glories proud expire.

And you, O Harvest Moon, look down On Europe's widespread battlefields, Where the forest leaves turn brown
A greater harvest it will yield, And thousands that tonight may look on you
Perchance for the last time your light will view.

Earth's harvest now is gathered ripe, To all the further northern lands, But thou, O Moon, dost shed the light On fields where Death the Reaper stands, His ripened harvest white before him spread,
Behind him strown the long swaths of the dead.

Dim, dread, and ghastly is the sight, O golden Harvest Moon, you see Stern dead men strown on fields of night,
While helpless wounded gaze on thee, While in a million homes and doleful yards
And weep and pray for sons who'll never return.
— H. D. Sudth, in New York Times.

WALSH BOOMED FOR PRESIDENT

Mayor Good of Cambridge, launched a presidential launch in Cambridge, Wash. in speaking before the St. Mary's Catholic Association at St. Mary's Hall, Cambridge.
He predicted that in 1920 Massachusetts would offer as its candidate for the head of the nation the United States senator and chief executive officer from the New York American.

Sketches from Life By Temple

Noted Collection of Coins in Russia

WASHINGTON, D. C.—One of the finest coin collections in the world is housed in the home of a private collector in Pskof, a city midway between Leningrad and Petrograd, upon the Warsaw-Petrograd railroad, along which the Germans are endeavoring to advance, and the collection is one of the most valuable things to be found in the country around this city. The collector is a man named M. Plushkin, who has made his name known in many foreign lands and which is easily the most interesting thing in the hoary city, once a republic and the rival of Novgorod the Great.
"M. Plushkin lives above his store, surrounded by his wonderful collection of coins and many other curios and antiquities which he has gathered during twenty years. The other treasures of this strange collector are of a chaotic variety, and fill several of the rooms of his home. The coin collection is the only part of his store which contains a wide assortment of valuable articles that M. Plushkin has attempted to order and classify. Numismatologists everywhere know this collection, and consider it one of the best and most complete in the world, better than any similar collection to be found in the Hermitage."
There are any number of Russian coins in the cabinet. Among these are examples of the earliest coins of Russia, the oldest of which do not date further back than the 10th century, and half bars of silver, valued at two roubles and one rouble. There are ancient coins of Pskof, Novgorod the Great, Kiev, Kazan, Tver and other towns, each with its distinctive stamp. One of the old roubles is a coin eight inches square, a formidable piece of wealth. There is another rouble in the collection, made of bronze, which weighs seven pounds. In this old money forty roubles, worth today about \$20, would weigh their happy possessor down like a sack of potatoes. Papal, Mohammedan and Jewish coins, the latter bearing the stamp of Solomon's temple are represented, together with concave coins of old Byzantium, square Swedish coins of brass, remarkable coins used by the republic of Pskof, and some Chinese coins of the year 200 B. C. Rare specimens of the coinage of almost every nation of Europe are found in the collection. One of the oldest was started upon its career in the year 2300 B. C., and has seen more than 4000 years of existence, or has become quite old, and as most things go.

Vest Pocket Essays
GEORGE FITZGERALD
Author of 'At Good Old Swans' and 'How to Run a Bank'

Secure the usual magnificent bank fixtures of marble and onyx and jade and jacinth and stained-glass and French bevel.

This is to impress upon the public that banks are hard up and do not have enough money out of their deposits to keep them from anything except actual starvation, and spend their few earnings modestly.
If a man comes in and asks for money, find out by cross-questioning and investigation whether he needs it. If he does, don't let him have it. The man who needs money is a poor customer to a money-lender.
If the would-be borrower is timid about it, make him feel worse if possible. After you have him scared stiff and shaking all over, ask him, abruptly, to sign his name.
Compare that scared scraw with the indorsement on the back of the check or the signature to the indorsed note. — prove to him conclusively that he did not sign both these.

This is a fine method, for it is a well-known fact that all forgers and confidence men are timid people and act very embarrassed when they present paper on which to raise money.
However, if a man comes in with a smile that looks like four million, a mint of gold in his mouth and a suit of clothes that adds about three figures to his external rating, tell him to go home and get a shovel, and throw open the vault and go in with a shovel, telling him to go in when there is enough out there to suit his present needs.

This is the method always employed by bank paying tellers and cashiers just prior to a vacancy in their ranks, and large headlines in the newspapers.

THINGS THAT NEVER HAPPEN
By Gene Byrnes

HIT BY AUTO, GIRL JOKES

Dragged nearly 200 feet by a touring car Miss Ruth Fink, of Cornwall, joked about her injuries while being rushed to a doctor.
She was knocked down as she was going over a cross walk. When Arthur H. Wood, of Cornwall, who was running the car, stopped and asked how badly she was hurt, she replied: "I'm all right." As soon as the dust was brushed from her clothes she was put in the car and started for a doctor's office.
"You couldn't do that again without killing me if you tried," she remarked to the driver after the doctor said that her only injury was a bruised ankle. Cornwall Dispatch to New York Sun.

Bissell's Vacuum Sweeper

Put Your Sweeping Reliance in a Bissell Appliance

The introduction of the new Bissell's Vacuum Sweeper reduces house cleaning to a science. Powerful, light running, easily handled, they get dust out of your rugs and carpets, no matter how hard it has been tramped in. They are as easy to empty and clean as they are to operate. Come in and let us demonstrate one to you.

W. Parker Lyon FURNITURE Co.
THE HOUSE OF A THOUSAND RUGS

The Warner Company
THE OLDEST JEWELRY HOUSE IN THE VALLEY
1529-31 Mariposa Street

A Short Time Ago a Lady Customer

Who had been away from Fresno for ten or twelve years came to our store and in the midst of a purchase made this remark, "Mr. Warner, you know, to come back to your store is just like coming home." We quote this remark exactly because it embodies an ideal in our business which is hard to express. That there is an atmosphere of home-like-ness and security is a fulfillment which we have worked for consistently for two generations. We want you to feel that this is your store. If there are criticisms to make, bring them right to headquarters. If there are satisfactions, tell them, too. A good merchant appreciates this oftentimes very highly. To serve the whole San Joaquin Valley in goods of quality and good taste is our object. And remember that uniform prices are your best protection for true economy.

We Fill Out of Town

Orders for meats, fish, fruits and vegetables and ship to all points, either parcel post, freight or express.

If it is in season we have it. Let us know your wants.

We buy Poultry, Eggs, Hogs.

Lectures on the Teeth

I don't believe in "fake" advertising either in dentistry or any other line. I won't make any ridiculous claims that I can not fulfill. I have established a reputation for doing first class dental work in ALL its branches, and I want my advertising to merit the same reputation.

Any one can consult me FREE of CHARGE regarding their teeth and be assured of honest, conscientious advice. My skill and experience makes this advice of value. My prices are the lowest for the same quality of work.

PEACH GROWERS CONFER ABOUT ORGANIZATION

Effective Plans for the
Perfecting of Their Com-
bination Discussed

Initial Meeting Executive
Committee and Mem-
bers Local Committee

Effective plans for carrying on the work of the organization of the peach growers of the San Joaquin Valley, as also the state, were discussed at the meeting of the executive committee formed to perfect the organization at its meeting yesterday afternoon in the chamber of commerce.

It was the initial meeting of the committee with the representatives of the local committees of the various districts and the full membership of the executive committee was present, except one, while the various district organizations were well represented. These meetings will in the future be held every Saturday afternoon until the organization is perfected.

Several Meetings Announced
It was decided to hold meetings next week at several points in Fresno county as follows:

Manning school house, Tuesday evening, at 8 o'clock.

Monmouth school house, Wednesday evening, at 8 o'clock.

Clay school house, Thursday evening, at 8 o'clock.

Harrison school house, Friday evening, at 8 o'clock.

The committee decided to extend the plan of organization to the Santa Clara valley and with that object in view delegated John C. Roredeen to carry out the plan in that section. He left last night for San Jose.

Headquarters Rooms Tendered
On behalf of the Holland Brothers, owners of the Holland building, E. C. Gill tendered the use of three rooms in that building for offices of the committee, and where meetings could be held, rent free, pending organization of the association. Gill offered to furnish the rooms. His offer in both instances was accepted. He likewise said that he would subscribe as much to the peach organization as he did to the raisin company.

Subscriptions to the organization fund as reported at the meeting to Secretary J. P. Bolton, aggregated \$112,000.

Outside Help Offered
Hugh Fulton of the General Advertising and Sales Corporation of San Francisco, appeared before the meeting and tendered the services of his corporation to help in every way possible in bringing to completion the organization of the company to the extent of \$250,000.

Secretary of the Chamber of Commerce, William Robertson, has had the subscription lists and the voting agreement translated into Japanese. It is believed that considerable subscription can be secured from the Japanese growers.

The next meeting of the committee will be held next Saturday afternoon at 2 o'clock, in the rooms of the chamber of commerce.

Buyer's Return Sale

Our buyer has just returned from his regular buying trip of this year. This is the only store of the valley with a buyer who makes **regular** trips. On his last trip he secured the newest and most popular styles and made arrangements to have express shipments arrive here every few days with the new styles during the winter.

Because of these regular buying trips, we are able to maintain the **Reliable Shoe Store** as the store of the newest styles. Moreover, as a further advantage, we are always able to quote lower prices. Our styles are always several weeks in advance of other stores in the valley.

Our buyer, being right at the factory and paying cash, can get the very latest styles and obtain price concessions. He makes arrangements

to have shoes shipped so that we show them five days after they appear on Broadway, New York City, and long before our competitors show them.

An Extraordinary Showing of the Newest Styles at Low Prices

Popular prices on our Main Floor have made it the favorite store in Fresno and one of the finest in the state.

On our Main Floor will be found **Queen Quality Shoes**, **Red Cross Shoes**, **J. W. Baker and J. Albert & Sons Brooklyn-made shoes**, **E. C. Burt and E. P. Reid shoes for women**, **Burt & Packard, Dr. Reed's Cushion Sole shoes**, and **Bannister shoes for men**. **Buster Brown Shoes for children** are sold on this floor.

On this floor are shown the best \$3.50 and \$4.00 shoes for women that are made in America, novelty styles being included.

Queen Quality SHOES

Watch for Our "Week Day" Sales

A feature of our **ECONOMY BASEMENT** will be our "Week Day Sales"

Every Sunday we will make an announcement of the "Week Day Sale" bargains in this paper and you can watch for them.

Extremely low prices will be made. This is an absolutely new feature. Watch each Sunday paper for the announcement of Week Day Sale bargains. It will pay you to do so.

California Oil News

COAST OIL FLEET IS TO BE MADE LARGER

Two New Tankers Will Take Oil From General Petroleum Wells

McKITTICK, Oct. 9.—With the arrival in Pacific waters of the oil tankers, the Belridge and the Maricopa, now en route from England and destined for service in the transportation to coastwise points of oil controlled by the General Petroleum Company, and the completion of three vessels contracted for by the Shell Company of California for similar use, the Pacific coast oil fleet is being made larger and more efficient.

At present there are three companies engaged in the distribution of oil from Pacific Coast points—the Associated, the Standard and the Union. The Associated ships from San Francisco bay, Monterey, California and Redondo, the Standard from Richmond and El Segundo, and the Union from Orem, Port San Luis, Ventura and San Pedro. The capacity of the vessels

VENTURA FIELD SHOWS ACTIVITY

McKITTICK, Oct. 9.—Increased activity in the Ventura county oil field is reported by a recent visitor. The Montebello Oil Company, the largest of the producing concerns and which has sixty-eight good wells, is running seven strings of tools at Fillmore, eighteen miles from the city of Ventura, and has three wild-cat wells within four miles of Fillmore. The gravity of the oil from the Montebello property is about 24 degrees. Other companies, smaller than the Montebello but busily engaged in the development of the industry, are putting down new wells and making other improvements on their lease. While the wells in Ventura county are not remarkable for their output, the production, like the number of wells, has shown a gratifying increase for years, the yield averaging about 75,000 barrels per month from more than 500 wells. There is a wide extent of territory believed to present possibilities of quite a promising character, and judging from its work now in progress and that contemplated it would seem that the future has much in store for prospectors.

The Ventura Refining Company has purchased ten Autocar trucks, which are equipped with 600-gallon tank bodies for transportation of gasoline and oil. Each of the trucks is of the two-ton size, and the ten will form the service battery for the refining company.

range from 22,000 barrels to 7,000 barrels, and the number of vessels in service or capable of operation and either owned or chartered is forty.

TO BEGIN DRILLING IN ANTELOPE VALLEY

Standard to Start Development; Brief Oil Notes of McKittrick Field

McKITTICK, Oct. 9.—The Standard Oil company has erected a rig on section 8, 25-18, and will soon commence drilling, thus inaugurating exploration for petroleum in Antelope Valley. The location of the first derrick constructed in this territory within the boundaries of the valley is sixteen miles west of Lost Hills and sixteen miles northwest of Belridge, and it is expected that in the event the test is made of this area by the Standard is attended with good results, other rigs will be put down and wells drilled, not only by the Standard, but by other companies now awaiting with much interest developments in what is hoped, may prove to be an inviting field. Since the announcement was made in these columns not long ago that the Standard Oil company was preparing to invade Antelope Valley, interest among oil men generally has been keen, and now that this great corporation has actually begun operations the interest has become greater and will increase with future movements of the company.

The Oil Crude Oil company, operating in the McKittrick and North Midway districts, this week commenced the construction of two 100-barrel tanks on its lease in the McKittrick field, the work being done under contract made with the Western Steel & Tank company of Los Angeles. The Oil Crude Oil company is engaged in plugging well No. 1, which is to be abandoned, and a new well will be drilled to replace it. The erection of the rig will begin on November 1. The company has five producing wells on its lease in section 22, 31-23, in the North Midway field.

In the Midway district the Associated Oil company has recently brought in three new wells on its lease in the south half of section 26, 31-33, each of which is producing 1000 barrels per day. The company is drilling a well on section 23, 31-23, and has reached a depth of 3500 feet, with good indications. The Associated has five wells on its properties in the Midway district, six of which are on the Pioneer Midway lease.

Lumber for the rig to be erected on the lease of the Jackson Oil company in the north end of the McKittrick field will be shipped to McKittrick in a few days by the King Lumber company, and the work of construction will begin immediately after its receipt here. The derrick is to be 42 feet in height, and is of the standard type.

John J. McClintock, superintendent of the Oil Crude Oil company, with headquarters in the North Midway district, was in the city this week on business.

J. W. Burser, superintendent of the C. W. Petroleum company, in the Temblor field, was a business visitor to McKittrick during the week. F. J. Burns, superintendent of the Dominion Oil company, has returned from a business trip to San Luis Obispo.

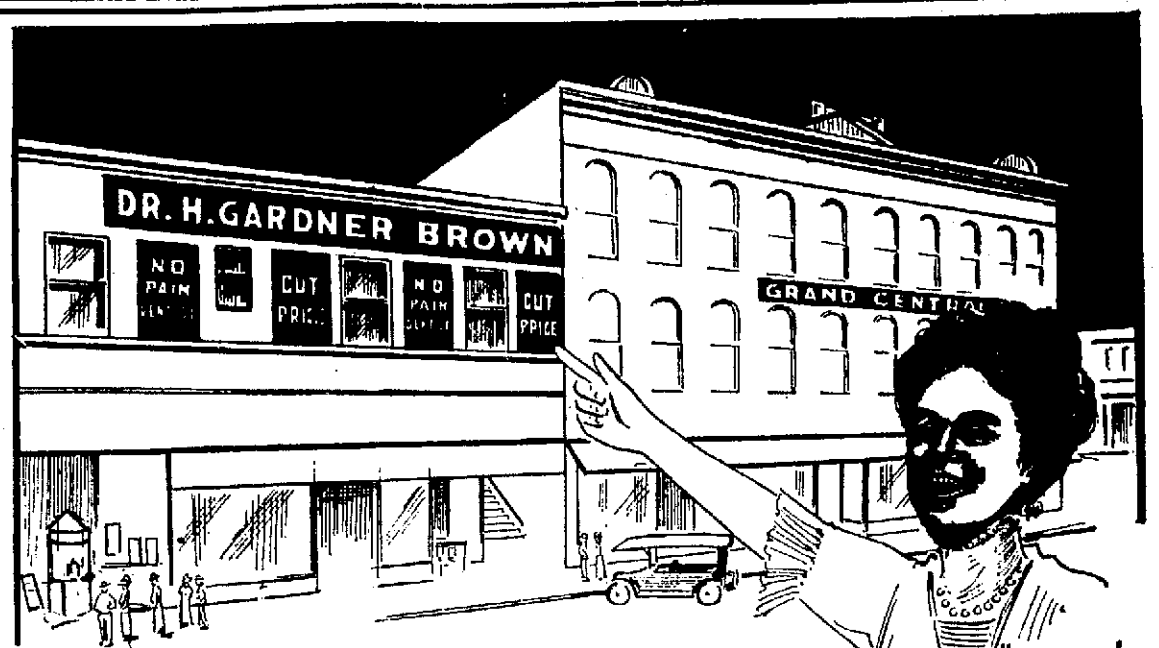

The annual meeting of the stockholders of the Nacoma Oil company for the election of a board of directors will be held in McKittrick on the 12th inst. The property of the company, which is in section 30-32, on the North McKittrick front, has not been operated for several years. One well was drilled, but the results were unsatisfactory, and since that time no additional work has been done. The U. S. Oil & Mining company, with headquarters in Bakersfield, and whose lease is on section 6, 30-22, has levied an assessment of one-half cent per share on outstanding capital stock, any shares upon which the assessment shall not have been paid on October 10, to be declared delinquent. There are three wells on the lease, but they have been idle for some time. One of the wells produced large quantities of gas for a while and a contract was made with the Associated Oil company to supply gas for operation of the latter's wells in the McKittrick district, but after a pipe line had been laid, it was found that the amount of fuel obtained was not sufficient, and part of the pipe line was taken up. It is not known when the company will resume operation of activities on its property.

INVESTIGATION WILL BE MADE OF BOILERS

Industrial Commission to Determine Cause of Many Explosions

That California and especially the oil fields of the state is the dumping ground for cheap two-sheet boilers, which are not made to stand heavy pressures is the assertion of John J. Glennon, inspector for the New York insurance agency, in the Midway gathering information. He is making his headquarters with Robert Heath, Mr. Glennon is one of the six engineers gathered under a safety first plan, to inspect boilers of the state and then devise proper laws for their regulation and care that the great many boiler accidents may to a great extent be overcome. This selection of men was made by the officials of the Industrial Accident Commission after it had been found that many of the accidents reported had been from boilers. The commission in its work is not only caring for those affected in accidents by giving hearings and stating the amount of damages employers must pay, but is also endeavoring to eliminate many of the accidents which occur, because of lack of proper care in the work of elimination much good has been done, as shown by statistics recently compiled. These statistics show that up to September 1 there were 85,000 accidents in California against 150,000 for the same number of months the year before. Mr. Glennon in making his inspection found upon leases and in supply store yards many of the two-sheet type lay steam boilers and here and there a few of the three-sheet battered seam design, which are much less dangerous in work than the cheaper grade. His report relative to the fields is to be turned in when

Maxwell Motor Cars

My 10-Year Written Guarantee

Not only do I claim that I give the very best of dental work, but I make my claim good by giving you a WRITTEN guarantee covering a period of 10 YEARS! Could anyone ask more than this? Does any other dentist make such an astounding offer insuring lasting satisfaction of his work?

No More Pain! No More High Prices!

I Use the New, Proven, Satisfactory Analgesic Method

I have conquered pain.

This is not an idle boast but a calm assertion which I only want you to investigate. I want to prove it to you as I have to so many scores of people in the short time that I have been here. I use the scientific methods which all up-to-date dentists use and I promise you that if you feel the slightest pain your dental work will cost you nothing.

Gone are high prices, too. Because I use the latest methods, I am able to do the very best of dental work for less money than conservative dentists of the old school must use.

I state facts. I want you to come in and let me give you proof.

Perfect Dental Work Possible Only By Analgesia

No dentist can do justice to his patient when the patient is enduring the agony that only an inflamed nerve can inflict. No dentist can cleanse a root or do the work with scientific thoroughness that he should when the patient is writhing with the pain of the operation.

It is because my patients do not feel any pain that I can work rapidly and carefully cleansing every nerve canal and putting the tooth in condition for the crown, bridge work, or filling.

I do not keep a patient in the chair more than fifteen minutes. It isn't necessary because I can work steadily.

Unprecedented Low Prices!

Better Dental Work At Less Cost

Right now I am making the lowest prices that have ever been made. I want to demonstrate my "no pain" methods of dental work to as many persons as possible, as soon as possible.

So in order to do this I am making prices that will appeal to all who have teeth that require attention.

See me at once. I may withdraw this special offer at any time.

I Am Here To Stay I Am Building A Practice

I am in Fresno to stay, and if you should hear that I am not I want you to find out for yourself. I selected Fresno as a location after I had carefully canvassed the state. I decided that this city offered the best field for truly modern methods of dental work.

I have equipped my office in a manner that includes every modern appliance. It is such an office as inspires confidence. It is a modern office, such as should go with the latest methods of dental work.

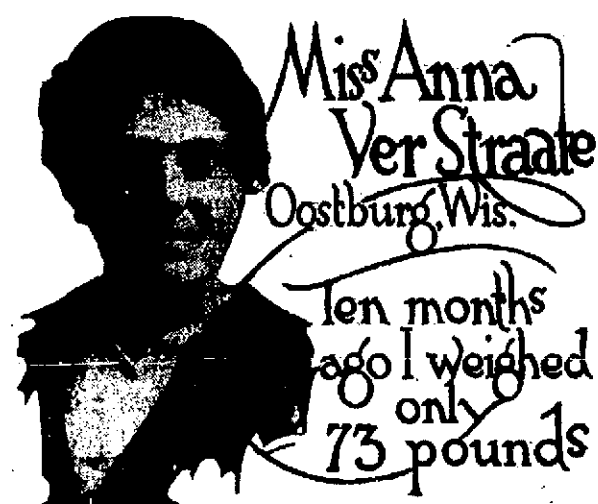

In all lines of dental work I use methods that are new, those which assure the highest degrees of success.

Let Me Examine Your Teeth FREE

Have your teeth been examined recently? Probably you have been putting it off as most people do. But it will not cost a cent to have me examine them for you. And neither will there be any obligation on your part.

This Beautiful Girl Is a Friend of Peruna.

No wonder she praises Peruna. Just read what she says: "I have no words to express my gratitude for the wonderful cure that Peruna has done for me. I was sick for two and one-half years with ulcers and catarrh of the stomach. The ulcers would break and this would cause hemorrhages of the stomach and severe vomiting. For months I had to vomit everything which went into my stomach."

"I tried seven doctors, but none could help me. I was so weak and run down that I could at times hardly walk any more. When I started to use Peruna ten months ago I weighed seventy-three pounds. But, thank God, I am all well today. I now weigh one hundred and twenty-six pounds."

"I hope and pray you may live long to help others as you have helped me. Instead of being a walking drug store I am growing fat and doing well. I will never be without Peruna!" Miss Anna Ver Straate, Oostburg, Wis., Oct. 6, 1914.

Address Peruna Company, Columbus, Ohio, for a free copy of "The Ills of Life," which contain a large list of similar testimonials.

WOMAN IS SLAIN AS RESULT OF PLOT

BRIEF OIL NOTES OF MIDWAY FIELD

McKITTICK, Oct. 9.—The Federal Drilling Company has landed a string of 12½-inch guns casing in the No. 6 well of the Consolidated Mutual Oil Company, on section 30-31-23, in the Fellows district. Top water was cemented off with the purpose of ending her life. For three days the suspects waited in the entrance of the hotel, and in the alley in the rear of the place.

The supposed slayer of the woman went boldly to the hotel about 1 p. m. today and asked for Kate Arnold. He was shown upstairs and she met him in the hall. Nothing more was known until her body was found this morning. The woman had been at the hotel but a short time. She told acquaintances her parents lived in Buffalo.

The defense rests case. INDIANAPOLIS, Oct. 8.—The defense in the case of Mayor Joseph E. Bell, on trial for election conspiracy, rested its case this afternoon. The arguments will begin tomorrow morning.

SCHOONER TOWED IN. EUREKA, Cal., Oct. 8.—The schooner Mandolin, which was waterlogged off Crescent City during night, arrived at Eureka this morning in tow of the tug Reber. The water is now being pumped out of the hold and the cargo is being unloaded. When the boat is free of water and its load, it is expected it will right itself and proceed to San Francisco under its own steam.

WOMAN IS SLAIN AS RESULT OF PLOT

MINNEAPOLIS, Oct. 8.—Details of a murder plot which the police believe began in Buffalo, N. Y., and ended early today in the slaying of Kate Arnold, 28 years of age, were sought after the woman's body had been found in her room in a small hotel here. Two men are thought by the officers to have followed her from Buffalo for the purpose of ending her life. For three days the suspects waited in the entrance of the hotel, and in the alley in the rear of the place.

WANT TRAMP BOATS TO BE REGULATED

SAN FRANCISCO, Oct. 8.—Five of the large Pacific Coast steamships asked the state railroad commission today to assume jurisdiction over fifty corporations operating coast-lying tramp steamers. The Robert Dollar Company was one of the defendants.

The petitioning companies under a decision of the United States supreme court are now required to file schedules and tariffs with the railroad commission as common carriers between California ports, under the California public utility act. The commission has not yet assumed jurisdiction of the tramp steamers, which cut into the receipts of the regular lines with lower rates.

The defendant companies operate 128 vessels, mainly in the lumber trade, and carry passengers. They are expected to be regulated by the commission under its own steam.

SYSTEM OF GOOD ROADS MEANS MUCH FOR COUNTY

By GEORGE S. WATERMAN
President of the Commercial Club

The people of Fresno County will soon have an opportunity to decide at the polls as to whether they wish to construct a modern system of highways within this county.

In response to a petition signed by over 3000 qualified electors of Fresno County, the Board of Supervisors have appointed a Highway Commission to lay out and plan such a system. This commission consists of well-known and representative men of this county. The members of it are: H. B. Vogel, who is a dairy farmer, residing about eleven miles west of Fresno. He has lived in this county nearly all of his life, attending school here, and is a well-known and respected business man, being a director of the Fresno County Fair Association. John A. Nau, former president of the Fresno County Chamber of Commerce, and a well-known business man of Fresno for over twenty-five years. H. F. Winnes of Reedley, a prominent business man of his section of the county, who has resided in this county since 1885, which is the year in which he first came to Reedley. W. S. Farley, highway commissioner, who is well-known in the State of California, and who has specialized in this class of engineering, is the engineer for the commission.

This commission is familiar with the history of Fresno County and its needs, and they have further made a careful investigation and study of the road problems which come within their jurisdiction. While these gentlemen have not made their official report, nevertheless this is an appropriate time for the voters and taxpayers of this county to consider the matter, and in order that this may be done in the most intelligent manner this information is being given you.

Fresno County is one of the leading counties of the State of California in population, wealth, productivity and in the class of its citizens. It is essentially an agricultural county, although it has numerous other resources. Its growth has been steady and regular and its development is substantial and permanent. The traffic upon its roads will never be small, and it is now and will be increasingly so in the future as it has in the past. This is undoubtedly true also of its population, wealth and influence as a highly progressive and wide-awake section.

Need of Good Roads
That there is a need of good roads is quite apparent to those who have

made a study of the situation. The following conditions bear upon the matter:

Practically every county in Southern California is constructing or has constructed a good roads system, which is a powerful attraction to tourists and prospective settlers and investors in the county, particularly those desirable ones who are intelligent and progressive and possessed of some means. Several of the neighboring counties and other counties in this part of the state are at present constructing highway systems.

In the competition which exists between localities Fresno County cannot afford to be without such a system. By reason of her wealth and position and stability this county should have a highway system which is better than those of adjoining counties and that would compare favorably with that of any county in the country.

In the matter of direct saving and profit from an investment in good roads, there is no question of the benefit. The expenditure for good roads should be considered as an investment and not as a tax. By reason of the use of the type of roads which we at present have, this county is spending annually over \$225,000 for maintenance. The general experienced road engineers which have constructed good roads is that from 50 to 70 per cent of all of the traffic uses from 10 to 20 per cent of the roads. It is probable that a saving in maintenance expenses can be made in this county which would pay the entire interest charge on a bond issue to build such a system and leave enough out of our present maintenance fund to pay the maintenance charges also.

It is authoritatively stated that the assessed valuation of San Joaquin County increased \$200,000,000 during the time of construction—about four years—of their good road system. The people of that county regard their investment in good roads as being one of the best they have ever made. This is also true of other counties which have constructed good roads.

Would Increase Value
There is every reason to believe that Fresno's assessed valuation would increase much more, and it has been predicted by those competent to judge that the assessed valuation of Fresno County would double as a result of the construction of a first-class system of highways within this county. The assessed valuation of Fresno County is now \$57,000,000; the cost of construction of a highway system

would be but a small per cent of this amount. The ordinary road probably takes care of the entire amount of the bond issue in two years without considering the effect of the work itself.

The expenditure of this money within this county, most of which would be for local labor and materials, would give an impetus to many industries, which would be felt through every channel of trade and employment in the county. During this period of quiet times and industrial inactivity the relief in the unemployed would be incalculable. The money saved on wear and tear of vehicles and horses and saving of time in hauling materials to and from markets, and the reduction of the cost of hauling of produce to shipping points, and themselves make a saving which would pay many times the amount of a bond issue during the period for which bonds would probably be issued.

Cut Distances in Two

But outside of the aspects of direct financial returns, there is another and more important factor to be considered, and that is the effect upon the well-being and happiness of the community and its citizens.

Good roads mean cutting in two the distances between all points within a county. It makes the life on the farm much more attractive. It means that the children who go to school for many months in the year have an easy, pleasant, dry and healthy way of getting there. It means that the parents on the farm have their convenience at school authorities, and church and religious devotion, made easy and pleasant. Such work as this means that the children will be content to live upon the farm among the wholesome conditions there.

The local farm movement has no better friend than the good roads advocate, and fathers and mothers who want to see their children grow up happy and contented with an interest in education, neighborhood and good influences should take a part in this good roads movement. A glance at history indicates that most of our great men were not brought up amid the cramped conditions of city life among the excitement and confusion and temptations of crowded cities. They had no record of any great people thriving for any length of time who are distinctly city dwellers.

Every citizen with the welfare of his country at heart and who values good citizenship should appreciate the fact that it will be easy and simple for them to reach him. It does not take a college professor to figure out the effect of this upon his trade. It means that attendance at church will be better; attendance at school will be improved; there will be more social life and human intercourse, all of which tend toward the upbuilding of good citizenship and happiness of individuals. These benefits so much mentioned can figure out and the end no man can figure out.

The commission is now gathering data for the design of the system of highways in the most intelligent manner. They will make a report to the Board of Supervisors and then an active campaign will be carried on. The construction of a proposed highway will be taken up at that time.

TEN MILLION DOLLARS AWAITS OLIVE GROWERS

Organization Urged to Extend Market for Rich Food Fruit

Facts and figures concerning the California grown olive, as presented by the California Olive Association, after exhaustive research work on the part of that organization, clearly indicate that the olive industry in this state, for various reasons, is decidedly not what it should be, and that olive growers are losing vast sums of money annually by not being properly organized. Among the salient features that are hereby brought out in the report of the association, the most astonishing item is vouchered for by the Horticultural Commission of the state.

"This says that ten millions of dollars would flow into the coffers of the California growers if all of the olive trees now planted were yielding good

Gladstone Urged Countrymen to End Turk Power in Bulgaria

By REV. M. G. PAPA ZIAN
Pastor Pilgrim Armenian Congregational Church

The Turks conquered Bulgaria in 1396. Their 500 years of rule, rather marred, culminated in the "Bulgarian atrocities" in the spring of 1876, when in the province of Philippopolis alone 60 villages were destroyed and 15,000 men and women were butchered.

Gladstone's famous speech, delivered on September 12, 1876, in the House of Commons, was a masterpiece of oratory. "An old servant of the crown and state, I entreat my countrymen, upon whom, far more than perhaps any other people in Europe it depends, to require and insist that our government should make war in the Balkans, and shall apply all its vigor to concert with other states of Europe in obtaining the extinction of the Turkish executive power in Bulgaria."

While England did not proceed far beyond a verbal protest, the Russian empire, Russia, inspired at once by hatred against the Turk and sympathy for a down-trodden people of Slav race, appealed to the arbiters of the sword in the interest of Bulgaria. The war, which continued about a year, resulted in a treaty in 1878, which gave to Bulgaria a large measure of administrative autonomy. Seven years later the Bulgarians utilized a busy moment of Turkish diplomacy to annex that province. The plan was executed so quickly and so neatly that nothing was left for Europe to do but to acquiesce in an accomplished fact.

A further step was taken in October, 1908, when King Ferdinand, taking advantage of the temporary confusion caused by the change of government in Constantinople and of Austria's annexation of the Turkish province of Bosnia and Herzegovina, declared Bulgaria's complete independence of the Ottoman throne, assuming also for himself the title of Czar. Russia, far from being displeased with the audacity of the young nation, expressed her approval of the deed by loaning a handsome sum in settlement of certain financial claims of Turkey. Undoubtedly she had reasons of her own in facilitating and consummating the

fruit, for which there was a market at a fair price.

Continuing the report says that this huge sum will multiply many fold if the olive production of Bulgaria goes along practically efficient lines. The tremendous increase in trees during the past few years is cited as proof of this.

Little was known in this state about the olive until 1907. The report says that three years later the production was estimated at 1000 tons per annum, which grew to 4000 tons in 1914 and 7000 in 1915. Of this year's crop, approximately 6000 tons remain yet to be consumed. At the rate that young trees are coming into bearing and new acreage is being planted, it is apparent that no need for increasing the demand and providing first-class marketing facilities, is urgent. The olive tree increases in bearing productivity up to seventy-five years of age, and the majority of olive trees in California are less than ten years of age.

"Each year 2000 new trees are coming into bearing, which in ten years will produce one million tons of fruit which will be added to the present production."

"The problem for the olive growers is not at all an alarming one, when the possible consumption of the fruit is considered. The olive is a luxury. Analysis has established the fact that olive oil contains half the food value of butter, and those who have eaten them know that the ripe olive, grown in California, is one of the most delicious as well as the most beautiful products of the state. Experts acknowledge that it is superior to that grown elsewhere."

TO MEMORIZE VERSE FROM BIBLE DAILY

Announce Y. W. C. A. Course of Winter Bible Classes

The Y. W. C. A. Bible courses for the fall and winter season are announced by Miss Maudie Wolff, extension secretary, below. Women and girls promising to memorize a verse from the Bible every day are eligible to register in any one of the classes. The schedule of the course follows:

Junior branch class—Tuesday at 4 p. m.—A girl's club memory verse class, leader, Miss Wolff.

Branch reading circle—"The Manhood of the Master"—Tuesdays, 12:30 to 12:45 noon.

High school student league—Fridays at 4:30—"Biblical facts and history," instructor, Miss Wolff.

Home department girls—Supper Bible class—Wednesdays, from 6 to 7:30 p. m.—"Christian citizenship," instructor, Miss Ruby Gracie.

Business girls—Supper club—Thursdays from 6 to 8 p. m.—"Bible teachings and present day problems," class instructor, Miss Wolff.

Mrs. W. P. Miller, in conjunction with the work of this class, will give three interpretive Bible readings. The time for these will be published later.

Normal students—"History of the Hebrews," instructor, Mrs. Rutledge. Hebrew business college—"Half hour with worth while people," instructor, Miss Wolff.

Children's Bible class—Thursdays 4 to 4:30—Great pictures and the lessons they teach; instructor, Miss Wolff.

Sunday, 10 a. m.—"The history of the Hebrew people," a course which, though it seems like ancient history, closely relates itself to the up to date problems and social questions; taught by Miss Wolff at the Congregational church, corner M and Nicholson avenues.

Vespers—Every Sunday at 5 p. m. In parlor of Y. W. C. A.; Mrs. T. T. Giffin will speak today on "Alfred Noyes' message to an everyday person."

WOULD GIVE WIDOW ESTATE
Judge Another yesterday issued an order in the matter of the estate of Joe On, deceased, fixing October 25 as the date when all persons interested are ordered to show cause why the estate, amounting to \$205,14 should not be transferred to the widow.

Pure Food Demonstration At Your Home

BECAUSE of the great interest displayed in PURE FOODS, we have arranged to have a special representative of H. J. Heinz Co., makers of the famous "57" Varieties, call on our patrons at their homes in company with our representative. These demonstrations will be very instructive. May we put your name on his calling list?

Mrs. Roff's Fancy Packed Raisins Now In

These are absolutely the best raisins packed. Taking first prize at the Panama Exposition, there could be nothing more pleasing to send your friends. We mark boxes and make shipment for you.

Prices 50¢ to \$1.50

Try Our New Salt Rising Bread

A revival of the old fashioned Salt Rising Bread. Its genuine good taste will surprise. Liked by many because of its distinctive, appetizing flavor. It will be a great novelty ... 10¢ a loaf

10-Days for \$37.50

Ocean excursion from PIER 16, SAN FRANCISCO, leaving at 4 P. M. every THURSDAY and returning a week from the following Monday.

The trip includes BERTH and MEALS without extra charge

The ROUND-THE-SOUND EXCURSION, sometimes called the "SUITCASE CRUISE," is the lowest priced, as well as the most attractive sight seeing trip from San Francisco. It is a real ocean voyage and brings good health and vigor. A trip like this is an absolute tonic for people tired of hot weather, or for sufferers from malaria.

But the highest charm is sightseeing; see the GOLDEN GATE with its finest of all views of the Exposition; the PACIFIC OCEAN, with sea life, birds and fish; the LIGHTHOUSES and HEADLANDS and the famous STRAITS OF SAN JUAN DE FUCA, 60 miles long and 20 miles wide, with forests and snowcapped peaks bordering; then SEATTLE, TACOMA, EVERETT, BELLINGHAM, ANACORTES, VANCOUVER and VICTORIA. Ample stops at all points.

A big steamship leaves SAN FRANCISCO every day

For LOS ANGELES, Monday, Wednesday and Friday, 4 p. m., and Sunday, 9 a. m.; for SAN DIEGO, Monday and Friday, 4 p. m.; for SEATTLE, Tuesday and Saturday noon and Thursday at 4 p. m.; for BUREKA, Thursday, 4 p. m.; for BUREKA, July 27, 31, Aug. 4, 12, 16, 20, 24, 28, 31:30 a. m.

You Can Be Beautiful

Surety, Quickly

By Miss Valeska Suratt

Beauty Secrets That Are Real! Gen-
Revealed by Valeska Suratt, the
Brilliant Actress, Famed for
Her Self-Made Beauty.

cost you many dollars if you could be
the money you will find in your

hair will not come out by the handful on the comb or brush as it did before, and you will be almost as proud of your head of hair as I have a right to be mine.

MRS. PLIMMER.—As you were uniformly and able to secure the attention of the audience, for removing superfluous hair at the drug store, write to my secretary as follows: "Secretary to Vanessa 3444, Thompson Bldg., Chicago," enclosing the enclosed card.

MOST OF US do not realize how marvellously beautiful and how quickly the skin may become the proper method pursued. Years of time and effort are spent, with expensive results, in vain, before it is ascertained, and with only one result, disappointment. I have had the same experience. Long and strenuous and waited for the beauty promised, until I decided to find the cause.

that the simplicity and ease of the proper method of beautifying the skin are really the chief reasons why it is so popular. It can be done to the skin is shown by the results of my following prescription of glycerine in a full pint of hot water and add one ounce of each of the following:—
Sulfur, one ounce.
Sassafras, one ounce.
This will furnish you. Stir until cooled and then ready to apply. This should be used on the face, neck, arms, hands and shoulders, liberally, every day. This Sassafras is the same as the one you can get the hexolin at any drug store. Sassafras is the best, army

MRS. N. R. S.—Here is my famous wrinkle formula. It is a genuine indicator of age. I have known that has such prompt results. It will remove all wrinkles from the face. Take one ounce of glycerine and two ounces of alcohol to

SINIS. W. R. O.—In a great many hair powders there are chemicals which make the powder visible. That's why you see faces so full of white powder. My own formula. No one can detect it. Use it! It gives an extraordinary result. You can get "Laska Sunst Face Powder," can now obtain it. Write me at once for the formula. If you find difficulty in getting it write to my secretary as suggested.

MRS. ANXIOUS—A remarkable preparation for the treatment of wrinkles, freckles, and all skin troubles. It is a formula composed of a good many delicate ingredients which would cost a good many dollars were you to buy them separately. It makes the skin youthful and plump, and all lines of age, wrinkles, and freckles disappear. It is very remarkable way, and you will look years younger.

AFFLICTED—You will notice a tremendous increase in your hair's length, and its softness, if you will make it grow by using this simple and safe treatment every day or two. Mix one ounce of pure olive oil with one pint of water. Boil the mixture until all the oil is absorbed, and then add a half pint of water. Boil again until the water is reduced to one pint. Strain the oil through a fine cloth, and use it on your hair, if you prefer it, and add to this one ounce of pure olive oil. Use this treatment at any drug store. This is the only preparation which will make your hair grow, and which will not break over a pint of this oil, which would be sufficient for a year's use.

1146-1148 I Street

church will be the entertainment of Wednesday evening, October 20, at the Hotel Fresno, when the opera "A Night in Italy" will be presented. The opera is a clever little story laid in the country of musical genius, and written by Miss Harriet Bennett, with music adapted from the different operas. The personnel of the cast includes five talented young buds—Misses Harriet Bennett, Amy Way, Doris Hudson, Carolyn Garrison and Pamela Tyler. Some Hawaiian music will also be a feature of the evening.

Miss Anne Sample, Miss Leora Schaeffer, Sam Sample and Hal Collins motored to Porterville yesterday to be the week-end guests of Mr. and Mrs. James Nicholson.

Miss Edith Hamilton of San Francisco arrived last night for a week's sojourn in Fresno as the guest of Mrs. P. T. Barker.

Mr. and Mrs. E. F. Steadman left last evening to spend the remainder of the month in the Exposition City. Upon their return they will make their home at 2412 Mariposa street.

Mrs. Clarence Cartwright has her house guests, her brother and his wife, Mr. and Mrs. Lawrence Daniels, who recently arrived from Hovd, Oregon, to make their home in Fresno.

Miss Ida Elder is the week-end guest of Mr. and Mrs. M. V. Carrington at their country place near Selma.

Dr. C. Nissler of Freiburg, Switzerland, is making a week-end stop over in Fresno, where he will be entertained by Mr. and Mrs. Felix Lueker. Dr. Nissler, who is a doctor of engineering, is making a tour and is visiting various points of interest, with engineering projects his main interest. He has just come from the Yosemite Valley, and will leave on Monday for Huntington Lake to overlook the power plant there.

Mrs. W. R. Van Wagner left yesterday for San Francisco where she will spend a week.

Mrs. William Fraser McDowell, of Evanston, Illinois, national president of "The Woman's Foreign Missionary Society," and Miss Florence of Baltimore, Maryland, national treasurer, will be the guests of honor at a reception on Thursday evening to be given at the First Methodist church.

The reception is scheduled for half past seven, and shortly after eight, Mrs. McDowell will give an address. A general invitation is extended and all are welcome. The speaker has been enthusiastically received by the heads of Europe, China and Japan and the occasion promises to be one of unusual interest. Mrs. McDowell and Miss Florence will be the guests of Mr. and Mrs. A. V. Lisenby while in Fresno.

William White motored to Palo Alto yesterday morning to spend the week-end in the W. D. Weaver home.

Mrs. C. H. Danks will entertain the Tarko Embroidery club Wednesday afternoon at her home on Kearney avenue.

The North Park Circle of the First Presbyterian church will meet at the home of Mrs. R. P. Prescott, No. 1122 Yosemite avenue, next Tuesday afternoon at 2:30 o'clock.

Word was received last night of the arrival of a little daughter in the W. H. Freyman household in Seattle.

The Narcissus Embroidery Club will be entertained on Tuesday evening by Miss Martha Greener, at her home, 2345 Madison avenue.

Miss Edith Harvey, who is at Stanford University this year, is taking an active part in college affairs. She is a recent pledge of the Alpha Phi Sorority and was given the incentive role in "Stop Thief," which is to be put on by the Sword and Sandals Dramatic Society.

St. Agnes Guild of the St. James Pro-Cathedral will meet tomorrow afternoon at the home of Miss Marjorie Harris on Mildreda avenue.

The Olive Chapter of St. James' Guild will meet at the home of Mrs. George R. Anderson on Tuesday afternoon at 2 o'clock.

Knox Circle of the First Presbyterian church will meet Tuesday afternoon at half past two in the chapel corner of Los Angeles and M streets.

Mr. and Mrs. A. C. Maule of Whittier, are the house guests of Mr. and Mrs. J. H. Newlin for a few days, while en route homeward from an eastern tour.

A quiet wedding was solemnized at the parsonage of the St. Paul's Methodist church, at 10:30 yesterday morning. Rev. Hodgson officiating, when Miss Hazel Siler became the bride of Benjamin F. Lawson. Only the immediate relatives of the couple were present. The bride and groom left immediately for San Francisco on a brief honeymoon after which they will return to their newly completed home at 2623 Mono avenue.

Mr. and Mrs. E. F. Harter announce the engagement of their daughter, Miss Elva Harter to William Dishman, son of Mr. and Mrs. W. D. Dishman of Elk Creek. The marriage will be solemnized in the near future.

Mr. and Mrs. Simpson and Fred Berger are giving a number of friends a party Friday evening at a dancing party. Those present were the Misses Ruth Glaston, Meda Lash, Opal Simpson, Eda Wilson, Clara Capps and Messrs. J. R. Larson, Martin Adolphson, Bert Burnham, Edward Holm, Edward Dalton, Albert Yates and Wm. Simpson.

ROCKEFELLER JR. RETURNS EAST

DENVER, Colo., Oct. 9.—John D. Rockefeller, Jr., tonight, departed on his return to New York after a three weeks' visit to Colorado. He was accompanied by Charles O. Heydt, his secretary.

During his visit to Colorado, Rockefeller inspected fifteen or more coal-mining camps of the Colorado Fuel & Iron company in Colorado and the Sunrise Iron Mine in Wyoming. He held numerous business conferences with the officers of the company, in collaboration with McKenzie King and the company officers, he prepared the Rockefeller industrial plan which has been adopted by the Colorado Fuel & Iron Company directors and the coal-miners employed by the corporation.

WINE MEN PLAN PROTECTIVE FIGHT

Urge Internal Revenue Commissioner to Visit State

SAN FRANCISCO, Oct. 9.—In an effort to prevent the wine industry of the state from being further embarrassed and possibly forced out of existence by the war tax on brandy, wine growers representing sections of Central California met at the Palace hotel today with the California congressional delegation; and after a long conference a telegram was sent to W. H. Osborn, commissioner of internal revenue at Washington, urging that officials come to California and make personal canvass of the situation with a view to making recommendations to Congress when that body convenes on December 6th.

The wine men have but little time to make their fight, for unless some change is made in existing legislation the present war tax on brandy used for fortifying wines, which is 55 cents a gallon and which is declared to be altogether too high, will automatically be raised to \$1.10 a gallon, a figure which will practically force the industry out of existence.

Comparatively little fear is entertained that the latter figure will be permitted to go into effect and the wine growers will devote most of their energies to securing a reduction of from ten to fifteen cents on the existing tax.

In addition to the wine growers present today the meeting was attended by United States Senator James H. Phelan, Congressman Julius Kahn, E. A. Hayes, John E. Baker and members of the State Viticultural Commission.

As aids to the California congressional delegation which will put up the fight for the wine industry, it was decided to have representatives in Washington from the raisin grape growers, the table grape growers and the growers of both sweet and dry wine grapes.

PRESIDENT AND HIS FIANCEE SEE GAME

Later the Party Dine With Wilson at White House

WASHINGTON, Oct. 9.—President Wilson and Mrs. Norman Galt, his fiancée, returned to Washington tonight, much pleased with the reception they had met in New York and Philadelphia on their first public appearance since their engagement was announced. The couple completed two busy days by watching Boston defeat Philadelphia in the world series and joining with their fans in applauding spectacular plays.

The return to Washington from Philadelphia was made on a special train, which covered the distance without stop in three hours and thirty minutes. As the party left the train, the president shook hands with the engineer, L. G. Bramble.

The party dined at the White House, where the president, his fiancée and his fiancée, Mrs. W. H. Bolling, Mrs. Galt's mother, Secretary and Mrs. McKim, Miss Helen Woodrow, Bones and the Misses Lucy and May Smith of New Orleans, cousins of the president, Colonel E. T. Brown of Atlanta, Ga.; Secretary Tumulty and Dr. Cary T. Grayson, the president's physician.

On his way back to Washington the president seemed very happy. He said he had enjoyed the game very much, especially the last inning, with its exciting action.

"We had a wonderful trip, haven't we?" remarked the president.

In Philadelphia the president and Mrs. Galt received constant ovations. All the way from the railway station to the National League ball park, they were applauded by crowds. At the park they were met by a cheering throng. The president kept his own score card and followed the game closely. Mr. Wilson and his bride-to-be kept up a running fire of comments on the game.

After the game the president and Mrs. Galt, and those with them, hurried to waiting automobiles through cheering crowds that almost blocked them. They were cheered almost continuously during the ride to the station where another throng had gathered. The president shook hands with his escort and also greeted the station master. As the train pulled out, he and Mrs. Galt stood on the observation platform, waving their farewells.

OHIO GOVERNOR IS GUEST AT SAN DIEGO

Willis Pleads for Continuation of Political Parties

SAN DIEGO, Oct. 9.—With Governor Frank J. Willis of Ohio as the distinguished guest, Ohio day was celebrated at the Panama-California exposition today. The governor and his party arrived at noon.

There was a military escort for Governor Willis and he was received at the exposition by Vice-President George Burnham, who is acting president in the absence of President G. A. Davidson, now in the east to inaugurate President Wilson to come to the exposition on his honeymoon.

In an interview Governor Willis pleaded for a continuation of political parties. He advised voting against the non-partisan amendment which will be submitted to California voters October 26.

ADVENTISTS TO MEET IN SOUTH OF STATE

Foreign and Domestic Missions to Be Given Special Attention

LOMA LINDA, Cal., October 9.—The most important council ever planned by the leaders of the Seventh-day Adventist denomination in the seventy-one years of its history will be held here November 5 to 27. Every officer and departmental secretary form the headquarters of the General and North American Division Conferences at Washington, D. C., will attend, as well as every union conference president in North America, the majority of the state conference presidents and the superintendents of the mission fields in Australia, South Africa, China, India, the West Indies and South America. It is expected that the presidents of the European Division Conference also will attend, thus having every part of the earth represented.

Officials of the denomination have been arranging the agenda of the subjects to be considered, for several days past, and the question of increasing the strength of the church in foreign fields will be one of the most important of the council. Treasurer W. T. Knox has been busy arranging the budget for appropriations to carry forward missionary enterprises, and he states that plans will be presented calling for an increase over what was given last year, of 100 per cent in the appropriations for China, India, and other heathen lands.

A. G. Daniells, president of the General or World Conference, will present to the council the needs of the mission fields in the Far East, he having returned recently from a year spent in touring India, China, Japan, Korea, the Philippines and Australia. If the plans he has mapped out are adopted, the appropriations for mission work by the Adventists the coming year will reach nearly a million dollars.

Plans also will be made for advancing the work in North America. Proposals for the betterment of the different departments, such as the home missionary, publishing, medical, young people's, educational and religious liberty, will be submitted by the secretaries of each, while the union and local conference presidents will make requests for more preachers and other gospel workers as well as funds for their respective territories.

Among those who will attend the council will be: Elders A. G. Daniells, president General Conference; I. H. Evans, president North American Division Conference; W. T. Knox, treasurer General Conference; W. A. Spicer, secretary General Conference; G. E. Thompson, secretary North American Division Conference; M. E. Kern, secretary young people's department; Frederick Griggs, secretary education department; N. Z. Town and W. W. Eastman of the publishing department; C. S. Longacre, secretary religious liberty; A. J. Brown, secretary home missionary department; B. G. Wilkinson, president Columbia Union Conference; F. M. Wilcox and E. R. Palmer, editor and manager, respectively, Review and Herald; W. W. Prescott, editor Protestant Magazine; Dr. H. W. Miller and L. A. Hansen, of the medical department.

SEES ANNIHILATION OF INDIAN RACE

Cannot Match Whites Or Blacks in Struggle for Existence

SAN FRANCISCO, Oct. 9.—Annihilation is imminent for the North American Indian; he does not stand an equal chance with the negro, or the most ignorant alien that comes to America; he has no voice in the control of the \$200,000,000 worth of property owned by redskins in the United States.

These were some of the views expressed today by Dr. Joseph K. Dixon, leader of the Rodman Wanamaker Historical expeditions, in an address at the Panama-Pacific Exposition on "The Last Great Indian Council," in connection with Indian Council Day exercises.

One of the resolutions, introduced by Alvin E. Hope, chief of the Bureau of Education, asks that congress shall place the administration of Indian affairs beyond the control of politics by the establishment of a non-partisan commission, and asks that full citizenship be given to North American Indians.

The Howard Air Tight Overdraft Heating Stove 2 Styles-2 Sizes

Is a departure from the ordinary both in construction and principle. Has been on the market long enough to be thoroughly tried, tested and indomitable by thousands of users.

The heat is radiated directly to the floor. The diaphragm check draft prevents the waste of heat by escape up the flue.

Heat results from a chemical union of the oxygen of the air with the fuel. If the fuel is soft coal the importance of a hot overdraft becomes evident from the following reasons:

Using as an example a certain soft coal mined in the Middle West, a chemical analysis shows that 16 per cent is carbon, 44 per cent combustible gases, and the remainder water and ashes.

This 44 per cent of combustible gases is capable of producing just as much heat as the carbon, provided it does not escape unburned. The first effect of heat is to convert this volatile part of the coal into a light gas. Of course, this gas tends to hasten out through the pipe, but if its passage be somewhat obstructed, as by the Howard overdraft damper, and if a supply of free and hot oxygen be passed over the fire, and forced to mingle with these hydro-carbon gases, as is made possible by the Howard overdraft arrangement, their complete combustion may be accomplished, and thus a large quantity of fuel is utilized that would be lost from an ordinary straight draft stove.

District Club Events

Clubwomen boast of and are complimented on their breadth of vision, and probably the broadest topic ever approved by the clubwomen of the United States is the Lincoln highway.

The General Federation of Women's Clubs, through its numerous branches in every part of the country, has through its active support, given the most valuable aid to the development of the Lincoln highway.

The Lincoln Highway association has now arranged to place before these club branches an opportunity of securing a most concrete and interesting story of the building of this great memorial to Abraham Lincoln, toward which this great organization of women has done so much. The Lincoln highway, a stupendous conception, has been photographed. The motion picture film of the highway produced this summer by the association's officers, portrays in an ever interesting sequence the varied sections, people, action, life across America. The great project is shown in the very progress of realization by a film which is destined to form a valuable part of the historic record of the progress of this age. The association has brought this film to the attention of the many branches of the General Federation organization with the suggestion that the film be included as part of each club's winter program in an evening devoted to good roads and the Lincoln highway.

The film will be shown first at the Panama-Pacific exposition, after which it will be open to hundreds of women's clubs.

TODAY'S BEAUTY SUGGESTIONS

Face powder simply covers up an unattractive complexion and leaves no lasting benefits. Those who have tried a simple spumax face lotion find it much better, as it removes skin discolorations, such as freckles and tan, and makes the skin smooth, white and velvety. This lotion is made by dissolving four ounces of spumax in one-half pint hot water, then adding two teaspoonfuls glycerin. This complexion beautifier does not rub off or show like powder, and gives a more refined appearance. It removes both shininess and sallowness, rapidly giving the skin a permanent healthy, youthful appearance.

An especially fine shampoo for this weather can be had at trifling expense by dissolving a teaspoonful of canthox in a cup of hot water. Pour slowly on scalp and massage briskly. This creates a soothing, cooling lather that dissolves and removes all dandruff, excess oil and dirt. Blowing leaves the scalp spotlessly clean, soft and pliant, while the hair takes on a glossy richness of natural color, also a stiffness which makes it seem very much heavier than it is. After a canthox shampoo arranging the hair is a pleasure.

Story of Fair Rosamund (Paper). Committee: Mrs. Ellis, Mrs. Cady, Mrs. Andrews, Mrs. Clough. Shakespeare. May 15, Tuesday—Leader, Mrs. Miller; hostess, Mrs. Boney. "I do love the man and do honor his memory this side of idolatry."—Ben Jonson. "The merry-minded Shakespeare." Comedy and Shakespeare's Comic Art. Illustrations from "Much Ado About Nothing," "Twelfth Night," "As You Like It," "Merry Wives of Windsor."

A new club in the district that makes its appearance in club life in the historic year of 1915, is that of the Drama club of Merced, whose literary pursuits are guided by Mrs. W. P. Miller of this city.

Program of the Merced Tuesday club, 1915-1916:

The officers are: President, Mrs. C. D. Radcliffe; vice president, Mrs. O. A. Baker; treasurer and secretary, Mrs. J. H. Simonson, and the program committee includes Mrs. N. C. Ray, Mrs. M. Meany, Mrs. J. H. Simonson, Mrs. C. L. Landrum, Miss M. Ryan.

October—First Tuesday—Leader, Mrs. Miller; hostess, Mrs. C. D. Radcliffe. "My mind to me a kingdom is."—Percy. "Souls that have toiled and wrought, and thought with me."—Tennyson.

The Bible. Books of Ruth and Esther. The Handmaid and the Queen. "Within this ample volume lies the Mystery of Mysteries To reach to fear, to hope, to pray, To lift the latch and force the way."—Scott.

Panama-Pacific Day. October—Third Tuesday—Hostess, Mrs. Carter Landrum, "I Love You, California." Art, Sculpture, Pageantry, Music. Architecture—What has this exhibition done for California? (Paper). How does it compare with other exhibitions? (Paper).

Committee: Miss Stoddard, Mrs. O. Cates, Mrs. Cornell, Miss Bigley. November—First Tuesday—Leader, Mrs. Miller; hostess, Mrs. C. D. Radcliffe. "The humblest author may profess to have something to say by this time; that neither Homer nor Shakespeare said."

Modern drama. Selected New Poets. November—Third Tuesday—Hostess, Miss Stoddard. "The world is full of poetry—the air is living with its spirit; and the waves dance to the music of its melodies."—Edwin Markham. Percy Mackaye. Star Young Edgar Lee Macey. Brain Hooker, Ina Colburn, Ella Wheeler Wilcox, Josephine Preston Peabody, Alice Brown, Robert Frost, Arthur Davison Peck. "This is my own—my native land."

Following the meeting of the Drama Women's Club, held at Mrs. Elmer Dickey's last week, the following program has been announced for the winter work of the club:

October 15, Art Day. Meeting at the home of Mrs. J. P. Williams, who will be assisted in explaining the work of E. H. Peeling and Mrs. G. W. Oosterhout.

October 25, Myth Day. Meeting at the home of Mrs. W. B. Nichols, with Mesdames Graham, Young and Hunter assisting.

November 5, Browning: at the home of Mrs. Z. M. Dickey.

November 19, Modern Drama: at the home of Mrs. W. P. Miller.

December 3, Travelogue, Mrs. Anna Mills Johnson leading.

Christmas adjournment will follow this meeting.

January 1, open house at the clubhouse in the club room in Central Block hall.

January 7, Domestic Science, at Central Block hall, the meeting to be in charge of Mrs. E. C. Hobbs, L. Hughes, W. L. Hoskins, A. C. Miller, Charles McCargle and J. H. McCracken.

January 21, Civics, in Central Block hall, with Mrs. A. N. Loper leading.

February 4, Children's Day, at the club room, with Mrs. H. Brewer leading, assisted by Mrs. E. C. W. Struggles and Mrs. Charles Hurst.

February 18, Modern Drama, with Mrs. W. P. Miller leading.

March 4, election of officers, with parliamentary drill following.

March 18, Modern Drama, Mrs. W. P. Miller leading.

April 1, Social Day, at the home of Mrs. P. H. Wilson, assisted by Mrs. C. C. Threlkeld and Mrs. S. E. Burum.

May 20, Optional, with Mrs. C. B. Briant leading, and assisted by Mesdames Kramer, Lushbaugh, Loe and Winford. This meeting concludes the yearly calendar of the club.

The Drama Women's Club is one of the most active social organizations in the city and has taken an important part in the social and civic affairs of the town. It was organized in 1913, and federated in 1915. In 1915 it obtained membership in the S. F. W. C. The membership now numbers 65 and several will be elected to membership during the winter. The newly installed officers are:

President, Mrs. J. L. Rhodes; vice-president, Mrs. A. O. Miller; recording secretary, Mrs. C. A. Tillotson; corresponding secretary, Mrs. G. Brewer; treasurer, Mrs. G. W. Osterout.

The Wednesday Club will celebrate "President's Day" this week at the home of the executive, Mrs. J. R. Webb, on M street.

The Query Club will hold its meeting on Monday afternoon at the home of Mrs. DeWitt H. Gray, 476 Van Ness avenue. Mrs. W. P. Miller leading in the study of Mrs. Brown's drama, "Children of Earth."

The Tuesday Morning Class will resume its meetings at the home of Mrs. Frank H. Short this week. Mrs. W. P. Miller reading "The Gold," by Henry Arthur Jones.

The Leisure Hour Club holds its meeting this week at the home of Mrs. J. C. Cooper, Mrs. W. P. Miller presenting Tennyson's "Queen Mary."

The Parlor League Club will celebrate "President's Day" on Thursday afternoon with an informal reception and a short musical program.

The Thursday Night Class will devote its study period this week to the study of modern drama.

The Friday Club will hold its meeting at the home of Mrs. William C. Horcher, 1210 E. Center, in the study of English history at the time of Henry VIII.

The Ladies Improvement Club of Crest will give a parcels post enter-

Radcliffe, hostess: "His Life," Mrs. Ellis, leader: "His Country," Mrs. Radcliffe, "Symbolism," Mrs. Russell, "Influence on Drama." Hauptmann, "And Then Came May." Mrs. Bester, hostess: Mrs. Miller, leader.

Lord Dunsany, Frank, M. L. Loe, hostess: J. Hartley Maudsley, English, Mrs. Covell, Rader, Wilfred Gibson, American, Mrs. Henderson, J. M. B. Rader, English, Mrs. Bester. Reading One-Act Plays.

Reading One-Act Plays—Mrs. Morell, Mrs. Miller, leader: Lord Dunsany, "A Hilarious Tale," J. Hartley Maudsley, "Happiness," Marston Wentworth's "War Brice."

The program for the Exeter Women's club is completed and the 1915-1916 year-books are now at the printer. A very interesting year is anticipated with the following program:

October 12, President's reception. Open to non-members. Hostesses Mesdames A. D. McLean and C. Kimball Crane.

October 26, Book, Rev. Mr. John Van der Boort, recent events, Mrs. William Plam.

November 9, Music, "Barrie and His Comedies," Mr. Hunting, Fresno. Hostesses, Mesdames C. E. Johnson, Horace Evans.

January 23, Music. The First Arts Building at the P. P. I. E. Mrs. C. W. Kunkle, Mrs. Ralph Van Cleave.

December 14, Music—Reading, selected, Mrs. W. P. Miller, hostess. Mrs. C. J. Burnett, Mrs. S. C. Jones.

December 25, Children's Day.

January 11, Domestic Science Demonstration.

January 25, Musical Tea, hostesses, Mrs. Charles McMillan and Mrs. Milo Potter.

February 8, Hygiene Day. Music: "Sanitation in the Home," Mrs. L. S. A. D. McLean.

February 22, Optional.

March 7, Current Events, Mrs. D. Rowland, Lecture, R. P. Anderson, Secretary, Fresno County, Mrs. C. A. Horcher, "The Problem of the Greatest Asset," hostesses, Mrs. C. T. Buckman, Sr., Mrs. A. A. Neil.

March 21, Music, "Book Review—Masterlinck's 'Blue Bird,'" Mrs. C. Kimball Crane.

April 11, New Members' Day. Current Events, Miss Edith Crane.

April 25, Club breakfast. Election of officers.

The officers for the ensuing year are:

President, Mrs. Robert Sutter Richardson, Mrs. C. E. Anderson, Mrs. D. R. Griffith, second vice-president, Mrs. Horace J. Evans, secretary, Mrs. W. K. McCallin, financial secretary, Mrs. D. Rowland; treasurer, Mrs. Carrie Anderson.

Committee: Music, Mrs. Huldrie Richardson, chairman; Mesdames Chas. McMillan, D. R. Griffith, C. L. Burnett, H. A. Owen.

Entertainment—Mrs. A. D. McLean, chairman; Mesdames John Van Cleave, E. H. Miles, C. E. Crane, A. E. Young.

Optional—Mrs. H. C. Meryman, chairman; Mesdames C. F. Bateman, C. W. Kunkle, J. C. Paine and T. C. Ostrander.

Children's Day—Mrs. C. F. M. C. chairman; Mesdames, Ralph Van Cleave, Arthur Percival, Horace Evans and Miss Edith Crane.

There are sixty-one members of the club this year—a larger number than ever before in the history of the organization.

Following the meeting of the Drama Women's Club, held at Mrs. Elmer Dickey's last week, the following program has been announced for the winter work of the club:

October 15, Art Day. Meeting at the home of Mrs. J. P. Williams, who will be assisted in explaining the work of E. H. Peeling and Mrs. G. W. Oosterhout.

TO OPERATE STILL UNDER \$5,000 BOND

F. M. Roessler Given Chance to Save Unfortified Wine

The F. M. Roessler distillery, which was seized by Federal officers, Friday, for alleged violation of reports and illegal operations, was turned back to Roessler yesterday afternoon at 4 o'clock, under a \$5,000 bond.

The padlocks from the still were removed by Deputy District Collector, L. T. Stephenson and auctioneer S. P. Hunter. Mr. Roessler will be permitted to continue the manufacture of wine, pending the outcome of the suit for forfeiture, which will be filed if a settlement is not made.

Roessler was expected to return to the city from San Francisco last night. George Roessler, the latest son-in-law, stated that the implication that the distillery had been run illegally was false, and that the same methods had been employed by his father as those followed for the past 25 years.

The elder Mr. Roessler returned from San Francisco for a few hours Friday night, but took the next train for San Francisco, to take the matter up with Joseph J. Scott, international auction collector, who ordered the seizure. The \$5,000 bond was posted yesterday afternoon and the wine maker was allowed to save the unfortified vats of wine that would have otherwise spoiled for the lack of bragg.

Very gallon of brandy made for use in fortifying the vats can be accounted for according to George Roessler. It is all contained in white tanks and the percentage can be determined, he says.

VALLEY BANKERS HOLD MEETING

Colonel Harris Weinstein of San Francisco, was scheduled to give a paper on "Rural Credits" in the next meeting of the San Joaquin Valley division of the California Bankers' association, on November 6, at Fresno. The committee meeting of valley bankers at the Hotel Fresno last night. The place of the meeting was not chosen.

The committee presented last night were: E. L. Manning, Fresno; Arthur Woodson, Merced; E. L. Osterhout, Modesto; A. W. Quinn, Exeter; W. L. Benz, Bakersfield.

HAIR FLIES AT ORPHANAGE

The hair flew at St. John's orphanage, Forty-ninth street and Wyandale avenue. Fifty union barbers were cutting the hair on 600 little heads. It was the first of a series of Sunday visits the barbers contemplate making to charitable institutions in the city.

The roof of the orphanage building was the scene of the wholesale clipping. Fifty chairs were occupied most of the afternoon. The fifty barbers, dressed in every case with the feathered edge, which means to remove all of the hair save enough in front to permit the boy to comb it.

Some time ago members of the Journeymen Barbers' Union decided that they should devote some part of their day off, which is Sunday, to some good purpose. One of them suggested the idea of donating a haircut to the orphans and invalids in local institutions. It was approved unanimously.

There seemed to be some doubt, however, that the institutions would permit such a service on Sunday, and it was not until the last moment that the barbers were allowed to carry out their plan at the orphanage. But as one of the sisters at the institution said, "I suppose God will approve kindness of heart, whether it be expressed on Sunday or any other day."—From the Philadelphia Public Ledger.

DOCTOR GIVES BLOOD IN VAIN

Though Dr. J. Franklin Hill, internist at the Baltimore hospital, gave twenty ounces of his blood to C. Stanley Mackey, leader of the Philadelphia band and member of the Philadelphia orchestra, it failed to save the musician's life.

Mr. Mackey underwent an operation at the hospital a week ago, after which blood poisoning developed. It was decided that only a blood transfusion could save his life. There was no time to advertise for a man to sacrifice five quarts of his blood, and Dr. Hill volunteered. Immediately after the operation Mackey showed improvement, but he had another relapse. Dr. C. A. Hyster, also connected with the transfusion operation, but before arrangements could be completed, Mr. Mackey died.—Philadelphia Dispatch to New York World.

Entertainment on Friday afternoon and evening, October 15, at Westman hall. The object of this entertainment is to raise funds for the new library. Various committees are working to make this event a great success.

The Women's Club of Chukanga held its first meeting of the season yesterday afternoon at the residence of Mrs. R. C. Baker on Sunset boulevard. No formal program was given, as the occasion was devoted to welcoming the newly installed president, Mrs. E. N. Tiffany.

A meeting of the East Side Country Club of Parlier was held at the home of Mrs. J. B. Crocker Friday afternoon. Mrs. Richard Stanton, as leader, gave the life and several readings of Robert Louis Stevenson's "The Red Rover" and Harold Coker, while the latter had charge of the Bible study. After the program, refreshments were served.

The program presented at the monthly entertainment given by the week of the Associated Old Settlers was one of the most attractive given under the management of this organization since its formation a few months ago. Within the handsomely appointed rooms of the club, the line of the Associated Old Settlers, in the north end of the McKittrick field, were gathered members, together with invited guests. The features of the evening consisted of music, vocal and instrumental, and hand-dance. Mrs. E. C. Peters rendered popular selections at the piano. D. K. Carr rendered songs and was the director in very amusing features, in which he was admirably supported by E. O. Peters, Elmer Housden, Robert Brown and Harold Coker, while the little Misses Sumner added greatly to the enjoyment of the occasion with recitations. E. O. Peters gave familiar melodies and an old-time dance. At the conclusion of the program, dancing was enjoyed.

Artistic Picture Framing

The superior results of our framing department are made possible by personal skill, artistic selection of the proper moulding and recourse to the most comprehensive assortment available.

Our stock of ready made frames includes a complete line of the famous "Arts & Crafts" designs, the very newest on the market.

Philharmonic to Open With Clarence Eddy, October 22

This opening concert of the Philharmonic Society will be given on Friday night, October 22 at 8 o'clock p. m., in the First Methodist church, by Clarence Eddy, the organist.

The name of Clarence Eddy is known throughout the musical world. He is recognized by the best authorities as one of the world's greatest organists and his reputation extends from ocean to ocean. His teacher, August Haupt, the master organist of Germany, declared that "in organ playing the performance of Mr. Eddy are worthy to be designated as em-

inent, and he is undoubtedly a peer of the greatest living organists." After a concert given by Mr. Eddy at the Paris Exposition of 1889, Alexander Guilmant, the most famous French organist, paid him the following tribute: "Mr. Eddy's great virtuosity and his masterly interpretations elicited the warmest applause. We are astonished at the ease with which he was able to control the magnificent instrument of 'Cavaillé-Coll, knowing that he had barely a few hours in which to familiarize himself with all its resources. Mr. Eddy is a great artist and he has won the esteem of French organists. For ourselves, we

are happy to extend to him our sincerest congratulations." Following a recital given at the famous Saint Cecilia academy, in Rome Mr. Eddy was made an honorary member and among the encomiums he received was the following expression from the great composer, Scambiati: "He is one of the greatest organists of the present epoch."

Mr. Eddy was born in Greenville, Mass., and began studying the piano-forte under Laura J. Billings at the age of 11. His first lessons on the organ were from J. Gilbert Wilson two years later, after which he studied a year under Dudley Buck, in Hartford, Conn.

He was for two years organist of Bethany church at Montpelier, Vt., and then went to Berlin, where he studied the organ and composition under August Haupt, and the piano under Albert Loeischhorn.

After a highly successful concert tour in Germany, Austria, Switzerland and Holland, Mr. Eddy returned to this country and located in Chicago, where he became organist of the First Congregational church for two years and later of the First Presbyterian church for 17 years. In Chicago he gave upwards of four hundred recitals, including a series of one hundred programmes without a change of repertoire. This made him famous and his reputation rapidly grew by reason of his numerous recitals all over the country, as he was called upon to dedicate new organs in nearly every state in the Union. He has probably opened more new organs than any other living organist.

Mr. Eddy has been identified officially with every important exposition since the one at Vienna, in 1874; namely those at Philadelphia, in 1876; Paris in 1889; Chicago in 1893 with 21 recitals; Buffalo in 1901; St. Louis in 1904; Jamestown in 1907, with six recitals; and at the Panama Pacific Exposition with 20 recitals.

Mr. Eddy's repertoire comprises practically everything which is in organ, as well as hundreds of manuscripts which have been dedicated to him. His four organ collections published by Edward Schuberth & Co. of New York, and one by the Oliver Ditson Company of Boston, are extensively used throughout the United States.

The entire Philharmonic course will consist of five concerts, four of which have already been arranged for. Besides Mr. Eddy's recital, Mrs. Carrie Jacobson Bond will appear in a program of her own compositions, and Mrs. Permelia Newby Dale, the Chicago contralto, will sing. The dates of these and the two remaining concerts will be published later.

Tickets which were subscribed for last year may be obtained at Bowman's drug store, on the 13th day of October, Wednesday, from 10 to 12 a. m., and 2 to 5 p. m.

JALTA, RUSSIAN BLACK SEA RESORT

WASHINGTON, D. C.—Jalta, the Newport of Russia, to which even such favored regions of the world as the garden lands of California and the Riviera must yield when climates are compared, is today a stronghold of society utterly unguessed in war, a lonely, unvisited little village whose prestige and fame have departed over night, a Newport unattended, forgotten by the press and by all the people, who, in peace times, eagerly read about all the social splendors there, begin a statement given out by the National Geographic Society. "Jalta, normally, would just be entering upon the height of its season, its gayest, most important two months of the year, had not a world war closed it, together with Monte Carlo, Karlsbad, Interlaken and scores of other places of 'good tone,' beauty and amusement. The Imperial court, the statesmen, diplomats and members of the great Russian command, now carrying the intolerable burdens in the war, would be gathering there in times of quiet, and social Russia would follow in their course."

Jalta is a beautiful place built on the shelf of a mountain whose foot bathes in the blue and mildest waters to the found all around the coast of the Black Sea. This little seaport, in the government of Taurica, on the southern coast of Crimea, thoroughly deserves the distinction of being the vacation-home of celebrities. Behind it, and between it and the north, the solid mountain rises, which merge into deeper and deeper shades until at the bare summits they are greenish-brown, rise to heights of from 2,500 to 3,000 feet. These are the southern fringe of the Jalta Mountains. The tops of these peaks are often covered by mist, while in Jalta and on its bay rests the mildest of spring weather. Snow never falls in Jalta, which boasts an annual mean temperature of 55 degrees Fahrenheit. Its climate is said to be superior to that of Nice. Its summers are not oppressively hot, there is less rain in autumn and in winter, the cool is less crisp in winter, and the sunshine of autumn is said to fall balmy here than anywhere else in the world.

"The scenery at Jalta, from whatever direction, is completely satisfactory. Its beauty is an intimate beauty, with which the stranger is soon upon easy terms, not the stand-offish, cold beauty of the major Alps. The town is a gem of white houses, set into the dark green mountains, and climbing by steps to the shelf upon which stand some of its most sumptuous villas. Its bay is very open, and the beach along the waterfront is narrow. The hotels and pensions are mostly in the lower town, the level which

TALKS OF HEALTH

By DR. W. A. EVANS
Noted Chicago Health Authority

You are 40 years old. Until now you have worked and saved, but in your working and saving you have planned for today, tomorrow, and the day after. It has been in your mind that when this day has been used up you would have another day. The thought that the days would finally run out had not come home to you. Now it is running through your mind that some day there will be an end to your days, and for the first time you are planning how much you can get done in the time allotted you. If the days are to be few, you must cut a small piece of cloth; if more, a larger piece.

Is there any way by which you can estimate what is your expectation of life? Beginning must be made with an expectation of life table. The insurance companies have such tables. They are based upon the facts in many million cases. But they may not constitute a fair criterion for you. Their tables are based upon the facts in the lives of people who were able to pass the medical examinations and to pay their insurance premiums. They are selected cases, and the life expectancy average is not so high as your tables would indicate.

In the year 1910 the expectation of life of the average person 40 years of age in Massachusetts, Ohio, Indiana, and Michigan was 24.5 years. Such a person had a right to plan on living to be 69 1/2 years of age. But this should only furnish the starting point for the calculations of the individual man. Before laying out his plans he must form an opinion as to whether his expectation was less or more than the average.

The first step in this process is to have a physical examination. The physicians are far from being all wise, but most of the gross diseases of the body reveal themselves to the careful examiner. The life insurance companies have found that it was good business judgment to have a physical examination made of each applicant. Of course they have found that the results were not perfect. Some men have been passed who had organic disease, and some have been rejected who lived a long time after rejection. In spite of these experiences insurance companies have found it good business judgment to have their applicants examined physically.

Now the tendency among insurance companies is to have the insured examined every year. Clearly the man of 40 should have a physical examination as the first step in arriving at an opinion as to whether he has an above or a below average expectation of life.

Inherited tendency is of importance in determining how long a person will live. Longevity is a matter of inheritance. Not all the members of a long lived family live to be old, but those who escape the hazards of early life and go over the usual number of organs and good habits will. One not infrequently hears a statement like this: "The members of my family die at 68." A person who lives beyond 40 can expect with a reasonable degree of certainty that he will die at his family dying age or within a few degrees of it.

The next point to be considered in the stock taking is one's habits. Generally speaking, men of abstemious habits outlive the average. The moderate eaters have an advantage over the gluttons; the non-drinkers over the drinkers; there are some claims to the contrary. I know. Some heavy drinkers, some continual smokers, and some old gluttons have lived to a very ripe old age. Some of these men of bad habits have been celebrities. Goethe and Victor Hugo were of them. But Metchnikoff, after a very careful analysis of all the evidence, was convinced that glutinizing, drinking, whisky, and smoking tobacco shortened life.

The person undertaking to solve this question would take his personal history into account. There are certainly no exceptions which are exceptionally trying on vitality but which, in his case, may not have any organic enough to have caused a developed organic disease. If a person had many of the contagious diseases of childhood, or if he had pneumonia in his maturer years, the effects are liable to show in later years, so it is with

spreads just back of the beach and quay. Some of the homes higher upon the hillside are the magnificent estates of the foremost of the Russian nobles. The present Tsar, his father and his grandfather, had palaces in Livadia, a near neighbor of Jalta's.

"There is no industry and little trade carried on by the people of the village, who live almost entirely by catering to vacationists and regular visitors. Smoke and soot do not deface the picture, and even the railroad does not approach the town. The guests come by steamer from Sevastopol, Novorossiysk and Odessa. Of course, as befits a fashionable resort, it is expensive. Hotels and boarding houses charge high, and the well-to-do Russians is generally a free spender. October and November are the first months of the year at Jalta, although people come to enjoy its beautiful and its climate throughout all twelve months. Jalta is not much sought by people outside of Russia, for the reason, perhaps, that it takes generations to win the fame among distant people such as is that possessed by the German and Bohemian baths, the Riviera, and Tyrol.

"Jalta has a population of 14,000. It is an ancient city, and is thought to have been a place of great importance in a remote past. The history of the place commences in the 12th century, when it was mentioned by the Arabian geographer, Ibn Edrisi. At one time, it belonged to the patriarchs of Constantinople. It began its career as a playground and recreation paradise for wealth and fashion in 1838, when it was made the chief town of a district."

UNDERTAKERS BAR COLORED MEN

SAN FRANCISCO, Oct. 5.—The color line was drawn today by the California Funeral Directors' Association which is holding its eleventh annual convention here. When the application of Smith & Williams, two colored undertakers of Los Angeles for membership was presented, the association decided it would confine its rolls to members of one color, and refused the southerners membership.

Kenneth Warren, of Pasadena, president of the association, in a speech last evening denounced the use of all undertakers' banquets. He also urged the members to take their women folk with them when they held their periodical feasts.

rheumatism. A person who has had more than his portion of rheumatism, neuralgia, lame back, is reasonably certain to find, as he begins to show his age, that his rheumatism "took some of the 'rapidity for wear' out of some of his tissues."

If a person has worked at some kind of trade or in any other way he has been poisoned by lead he can expect that his tissues have been aged and that he will die before his family's death age. Likewise, if he has had syphilis he may expect it to lessen his years.

With this data in hand a person can figure with some degree of success upon the years which remain to him and may lay out plans for life work based thereon. This man should have data on one aspect of the question that it will be impossible for him to get. It is important for him to know how long he will be fully efficient and how long half efficient. Up to the present time about the only basis for study has been length of life. The talk now is about efficiency and before very long data will be available on that score.

Up to a few years ago it was assumed that because the average of human life was growing longer and the death rates were decreasing, the death rates at every age period were decreasing. The life insurance people, and particularly the Mutual Life Insurance Company of New York, showed that the saving in human lives was attaining in children. Middle-aged people were having higher death rates than during the earlier years when vital statistics had been kept.

THE WEATHER

FRESNO, Oct. 9.—Local forecast: Generally fair weather Sunday and probably Monday; light northwest wind.

Local data: 5 a. m. 5 p. m. Barometer 30.04 29.95 Temperature 53 53 Wind direction S.W. S.W. Wind velocity 4 8 Humidity, per cent 66 66 Average daily high temp. for October 58 Average daily low temp. for October 37 Highest and lowest Saturday 52 and 31 High and low this date last year 59 and 31 Seasonal rainfall to date None Last year's rainfall to this date 22 inches Normal rainfall to date 26 inches Time of sunrise October 10, 6:02; of sunset, 6:30.

General Conditions.

Attending a change to cooler and a slight fall in the barometer over the Pacific there was more or less cloudiness over Nevada and parts of California at 8 p. m. Saturday but conditions are not threatening. The barometer is relatively high above the coast and the weather in this valley probably will not become threatening during the next day or two.

San Francisco, Oct. 9.—Forecast: San Joaquin Valley: Fair Sunday; light northwest wind.

KEEP LOOKING YOUNG

It's Easy—If You Know Dr. Edwards' Olive Tablets

The secret of keeping young is to feel young—to do this you must watch your liver and bowels—there's no need of having a yellow complexion—dark rings under your eyes—pimples—a bilious look in your face—all eyes with no sparkle.

Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the most effective for biliousness, are gentle in their action, yet always effective.

They bring about that exuberance of spirit, that natural buoyancy which should be enjoyed by everyone, by toning up the liver and clearing the system of impurities.

You will know Dr. Edwards' Olive Tablets by their olive color. 10c and 25c per box. All druggists.

POULTRY RAISING BY AMATEURS GROWS RAPIDLY IN IMPORTANCE

By REESE V. HICKS.
Former President of the American Poultry Association.
Copyright, 1915.

The economic importance of poultry raising by amateurs scarcely can be estimated. It is known that the number who keep chickens for their own use is increasing by thousands every season. Mr. Hicks points out some of the reasons for this increase, and gives suggestions for the amateur engaged in poultry keeping.

Ten years ago poultry raising was regarded as work fit only for women and children. The man who devoted his entire time to the poultry business, or who spent a few hours each day in taking care of his chickens was derisively termed "a chicken craze" in the last decade the public attitude toward the poultry business has undergone a radical change.

More and more each year it is being recognized that poultry raising on a small scale is an established source of revenue to residents of villages and cities as well as to farmers. Increased interest in poultry keeping is due to many causes. The "back to the farm" idea has been the subject of articles in practically every daily newspaper. Added to this has been the campaign by federal and state officials for better farm conditions generally. Boys' and girls' poultry clubs and local poultry shows have aroused interest in better poultry. All these have caused hundreds of people who previously looked upon chicken raising as a hobby to investigate carefully the advisability of keeping a few hens on the back lot.

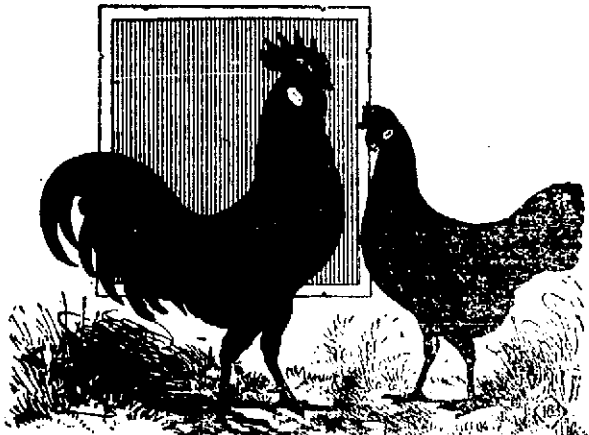

The soaring prices of meat gave impetus to poultry keeping. In the last ten years the price of beef has increased from 25 to 30 per cent, according to locality and distributing facilities. The average citizen naturally looks for a cheaper source of meat. When he goes to buy poultry or eggs he comes face to face with the increase in prices there. It is here that he comes to the point of considering what he can do in a small way by keeping a few hens and thus cut down the size of his meat bill.

Start Need Not Be Costly.

The beginner or amateur should not conclude that he requires a great deal of money to make a start, because he should not start on too large a scale. While money usually can be made in the poultry business, yet like every other business it requires hard work, some experience, and a little capital to get adequate results.

The beginner will make mistakes and have setbacks, and if he starts on too large a scale he will lose. Instead of proving a source of revenue and profit, it will be more likely a source of loss.

The number of hens that can be kept on any given ground space depends largely on the care that is given

Single Comb Black Leghorns

In England the Black Leghorn ranks high as a utility fowl, but in America it has not been bred widely. Of late, however, there has been a revival of interest in this variety, and some fanciers are predicting a boom in Black Leghorns. They point to the fact that this variety always presents a neat appearance, and is more attractive than a white bird, as well as its plumage, such as is found frequently when the birds are kept in limited quarters.

Only their color has prevented the Black Leghorns from attaining widespread popularity. This variety is supposed to be the original Leghorn, the kind native to Italy, from which the White Buff and other varieties have sprung. It is noted for egg production. The Black Leghorn has

the hens. A space 10 by 20 feet is sufficient for ten to fifteen hens if it is spaded up once a week so as to keep the ground fresh and clean. The house should have not less than three to four square feet of floor space for each bird.

For a house the cheaper the cost the better, provided it is strong and light, and has sufficient ventilation and light. It should be not less than five feet high in the rear, and from 7 to 8 feet high in the front. It should have a shed roof, covered with the best grade of prepared roofing, and the front of the house should be in the rear, over dropping boards two feet above the floor, so as to allow the fowls opportunity to exercise over the entire floor space.

There should be two windows; one of glass to let in the light, and the other covered with either muslin or burlap, for ventilation, and this latter window should be kept open all the time possible. The door should be at the side or front. Nest boxes should be under the windows and arranged with a cover that can be let down at night to prevent the fowls from soiling the nests. The fixtures, nest boxes, drinking fountain and feed hopper should be simple, easily removable for disinfecting purposes and cleaning.

Hens Cost From \$1 to \$3 Each

An economical house for 25 hens may be built for from \$20 to \$30. The hens themselves will cost from \$1 to \$3 each, according to the quality, variety, and time when bought.

The fall is as good a time as any to start in the poultry business on a small scale. A beginner wanting at this time should buy hens that have finished their molting and are ready to begin laying again. These should lay through the winter when the price of eggs is high. Pullets will lay a few more eggs than hens, and when ready to lay by November will lay through the winter eggs than the older hens, but usually they cost more than hens.

It is not necessary to have male birds with the hens unless it is desired to breed young chicks. Many amateurs buy pullets annually, while others buy baby chicks each year and raise their own layers. While it is cheaper to have a male bird in the breeding yard in the spring when it is desired to use the eggs for hatching purposes and raise laying pullets for the next fall, yet there is considerable work and risk for the experienced poultryman in the incubating and raising of chicks. The safer plan is to buy either chicks or mature fowls, and sell the eggs produced by the home flock.

Where a surplus of eggs is produced, there is no trouble in disposing of them in the neighborhood at a premium above the price asked for so-called "fresh" eggs at the stores. Any prudent housewife will be glad to secure eggs from a neighbor, and pay a trifle more for them, knowing that the eggs are fresh, are absolutely fresh and dependable, and hence worth a premium above what she would have to pay at the corner grocery for eggs, not known to be new-laid.

Give Extra Care in Fall
As eggs are highest in price from October to January, it is important that the fowls be given extra attention in fall and winter so they will produce the most eggs during this period. On stormy days the fowls should be kept in the house. They should be fed three times a day, in the morning, at noon and late in the afternoon. The grain feed should be scattered in the litter on the floor. This litter should be straw, but hay or dry corn stalks chopped up also make a fairly good litter.

The grain feed should consist of equal parts of cracked corn, oats and wheat, or a good scratch feed can usually be bought at the local poultry supply store reasonably, at from \$1.75 to \$2.25 a hundred pounds, according to the contents of the mixture, the quantity in which it is purchased, and local prices.

A dry mash should be kept in hoppers before the more active breeds like Leghorns, all the time. For heavier breeds, like Plymouth Rocks, the dry mash hopper should be kept closed until 10 o'clock, then opened and closed again in the afternoon, so the fowls may overeat and not exercise enough. The dry mash should be composed of equal parts of wheat, bran, corn meal and wheat middlings, to which has been added 10 per cent. of commercial beef scrap.

If a large number of fowls are being fed, a mixture of alfalfa meal and ground oats in one-half the proportion of the three main ingredients should be added. But where only a few hens are kept, the bran, corn meal and middlings, with the beef scrap added, will make an ideal dry mash.

Table Scraps Make a Rich Feed.

The table scraps should be saved and fed to the hens. Table scraps make rather a rich feed, and therefore should not be thrown indiscriminately

"THE NIGGER" RETURNS TO FRESNO PHOTO

William Farnum As Phil Morrow in "The Nigger"—At Fresno Photo Theater

Edward Sheldon's masterpiece "The Nigger" is playing at the Photo Theater today after having turned away a score of people the last night that it was presented.

In Phil Morrow, the governor of a Southern state and a professor of "Nigger" history, who discovers that he himself has the blood of a nigger in him, William Farnum attains the most remarkable characterization even his fine art has ever accomplished.

Tomorrow brings William Farnum in "The Nigger" to the Photo Theater, the first Gold Medal play, "The Nigger," 1915.

cheesy substance that has a tendency to be better to destroy the affected fowls, unless they are extremely valuable.

When colds are first noticed, put enough permanganate of potassium in the drinking water to color it a light purple and give no other water for a few days.

Often a slight outbreak of diarrhoea is caused by giving too much rough food in the form of table scraps or some sudden change in the feed. The best cure for this is to remove the feed that caused the trouble, and give the fowls a treatment of cream salts mixed in the drinking water.

Don't Expect Too Much.

The average beginner should not expect too much from his poultry for the first season, because he is likely to neglect feeding his birds regularly, or fail to give as careful attention to keeping the house, dropping boards and drinking vessels clean, as a more experienced man would.

To sum up: Work and constant attention to details will bring ample returns for the money and time invested.

Overworked Women

AMBITIOUS that their homes shall be kept neat and attractive, children well dressed and family well nourished, thousands of women in our homes are sacrificing their health to duty. They cook, wash, iron, dust, mend and sew, until some female trouble fastens itself upon them and their every day life is a continual struggle with weakness and pain.

Lydia E. Pinkham's Vegetable Compound

is the greatest American Safeguard to woman's health. For three generations it has been relieving women from the worst forms of female ills until there is hardly a town or hamlet where women do not reside who have been restored to health by its use.

How Three Overworked Women Found Help.—Their Own Statements Follow:

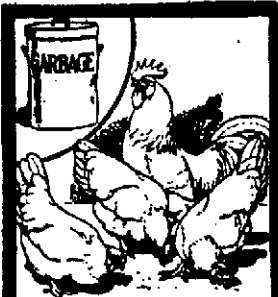

CUMMING, GA.—"I tell some suffering woman every day of Lydia E. Pinkham's Vegetable Compound and what it has done for me. I could not eat or sleep, had a bad stomach and was in misery all the time. I could not do my housework or walk any distance without suffering great pain. I tried doctors' medicines and different patent medicines but failed to get relief. My husband brought home your Vegetable Compound and in two weeks I could eat anything, could sleep like a healthy baby, and walk a long distance without feeling tired. I can highly recommend your Vegetable Compound to women who suffer as I did, and you are at liberty to use this letter." Mrs. CHARLIE BAGLEY, R. 3, Cumming, Ga.

FLORENCE, So. Dakota.—"I used to be very sick every month with bearing down pains and backache, and had headache a good deal of the time and very little appetite. The pains were so bad that I used to sit right down on the floor and cry, because it hurt me so and I could not do any work at those times. An old woman advised me to try Lydia E. Pinkham's Vegetable Compound and I got a bottle. I felt better the next month so I took three more bottles of it and got well so I could work all the time. I hope every woman who suffers like I did will try Lydia E. Pinkham's Vegetable Compound." Mrs. F. W. LANSING, Box 8, Allyn, Wash.

ADRIAN, Mich.—"I feel good, with no more weakness and backache, and I can work as hard as I want. When I was sick I could hardly do my work. When I was sick I had to sit down and when I would get up I would feel so weak that I could not go to bed down I feel I am getting better. I feel so good that my folks think I am going into a consumption. One day I read what Lydia E. Pinkham's Vegetable Compound had done for women. I showed it to my husband and he said, 'Why don't you try it?' I did, and after taking a bottle I felt better, and after three bottles I am well." Mrs. A. E. BAKER, a Teacher, Adrian, Mich.

Every sick woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial, for it cannot harm her, and there are a hundred chances to one that it will completely restore her health.

THE LYDIA E. PINKHAM MEDICINE COMPANY, LYNN, MASS.

Where Do YOUR Table Scraps Go?

You can turn them into eggs and chicken dinners by keeping poultry in your back yard.

The International Correspondence Schools will show you how to make more money with a home poultry flock. Or they will fit you to conduct a large and profitable poultry farm, by training you in the methods used by the most successful poultrymen.

\$2 a Year Profit from Every Hen

Fresh eggs are higher in price every year. Poultry raisers who know how to raise eggs to sell the year around—at top prices, and to produce big profits when grown, fed and sold right. Poultrymen who use scientific methods make every fowl earn \$2 a year.

Hundreds of money-making amateur poultry raisers are their success to I. C. S. training.

"To the I. C. S. Course in Poultry Farming I attribute my success in raising 1,000 fine chicks, 100,000 eggs, and 10,000 chickens. I am now a successful poultryman, and I am now a successful poultryman."—Mrs. J. C. S. Course in Poultry Farming.

Fresno Musical Club Will Open Season With Fritz Kreisler, Tomorrow Night

The Kneisel Quartet, who are among the later season attractions to be brought to Fresno by the Musical Club

The Fresno Musical Club opens its season's series of concerts tomorrow evening at the White theater with Fritz Kreisler, violin virtuoso, the attraction.

The Century Magazine, in speaking of this organization on the musical development of America, said editorially: "It is both proper and obligatory to say that perhaps the largest influence in our musical improvement has been

the playing of the Kneisel Quartet. This quartet was founded in November, 1885, by Mr. Henry L. Higginson of Boston. Franz Kneisel, the leader of the quartet, is a Hungarian by birth and a graduate of the Vienna Conservatory of Music. He became concert master of the Boston Symphony in 1885, resigning in 1903. He has been the first violin and director of the Kneisel Quartet since its foundation. In recognition of his services in the development of music in America, Mr. Kneisel has been honored by being offered the position of conductor from three great orchestral societies—the Philadelphia Orchestra, the Philadelphia Society of New York, and as

director of music at Yale University. "Louis Sverenski, viola, has been a member of the Kneisel Quartet since its foundation. Hans Letz, the second violin, was concert master with the Thomas Orchestra in Chicago, and joined the Kneisel Quartet six years ago.

William Wilcke, violoncellist, was a member of the Rotterdam Orchestra and solo cellist with the Philharmonic Orchestra at Leipzig. Hans Richter engaged him as the first cellist of the Covent Garden Grand Opera Royal Orchestra in London, which position he resigned to come to America and take up the Quartet work.

Keep Your Eyes on the Store Windows

The public eye likes interesting sights. And next week—beginning Monday—the city will be full of them. They will be in the show windows of the enterprising merchants.

They will be in the garb of near and dear friends—friends introduced to you through the advertising columns of the Republican of this city.

The Show Window Display is part of a continent wide demonstration in the interest of better business.

Just as the merchants of this city are vying with each other, so is the city as a whole in competition with hundreds of other cities in the United States and Canada.

On behalf of the merchants and the newspapers we invite you to inspect the store windows next week.

You will have no trouble distinguishing the displays for they will bear signs reading:

INTERNATIONAL NEWSPAPER DISPLAY WEEK

We Sell These Standard Products — All Advertised in the FRESNO REPUBLICAN

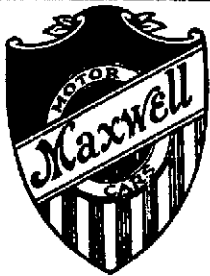

The Store Windows Will Be Well Worth Seeing

CAMPAIGN BEGINS IN SAN JOAQUIN VALLEY

Itinerary for Meetings to Be Held During the Coming Week

The campaign in the San Joaquin Valley in behalf of non-partisanship with open Monday evening when Thos. F. Griffin of Modesto and John F. Neelan, president of the State Board of Control, will speak at Selma. The meeting will be held in the City Park and W. H. Shaffer will preside. The gentlemen named will hold meetings during the week as follows:

Reedley, Tuesday evening, Grand Theater.
Lemoore, Wednesday evening.
Coalinga, Thursday evening, in Liberty Theater.
Hanford, Friday evening.
Tulare, Saturday evening, in New Theater.
For the opposition to the non-partisanship measure the itinerary is as follows: The speakers being Henry Hawson and L. B. Cary for all the meetings except Dinuba, where Mr. Cary will speak.
Parlier, Monday evening.
Riverdale School House, Tuesday evening.
Dinuba, Wednesday evening.
Corcoran, Friday evening.
Lemoore, Saturday evening.

URGE COOPERATIVE CIVIC CENTER WORK

Reorganize and Map Out Work for Year in Meeting Here

Co-operative work in the operation of the civic center movement in the school houses of the San Joaquin Valley was the keynote of the discussion which occupied the greater part of the reorganization meeting at the Fresno Normal school yesterday. The movement was launched last year. A continuation of the work along a large scale was planned for this year, yesterday.

The executive committee for the San Joaquin valley centers will be held in two weeks for the purpose of mapping out a definite schedule of work for the year. Hopes were expressed that a community center will be established in every school district in the valley where the residents may attend the entertainments, concerts, lectures and musical programs.

Walter Bachrodt of Selma is president and W. B. Chasens is Fresno, secretary and general manager.

WATER IS SHUT OFF DAMAGES DEMANDED

Suit Instituted Against Fresno Water Company By R. D. Sibley

Because the Fresno Water Company shut off the water from his house at 223 Elizabeth avenue after he refused to pay an increased rate which he believed to be unjust R. D. Sibley, through L. L. Cary, as attorney, has brought suit against the Water company for damages demanding the sum of \$299.99.

Sibley had been paying \$1 per month for water at the home cited and prepared a piece of ground for lawn but no lawn had been put in. The water company notified him that he would have to pay \$1.50 per month for water which included the lawn. In that the lawn had not yet been put in he declined and tendered the usual payment of \$1 per month. The water company declined this and the result was that it shut off the water.

The company when asked to install a meter declined to do so unless Sibley would pay the cost of installation, which it was said would be \$13.

N. Y. RESERVE

NEW YORK, Oct. 9.—The statement of actual condition of clearing house banks and trust companies for the week shows that they hold \$189,371,729 reserve in excess of the legal requirements. This is a decrease of \$6,093,410 from last week. The statement follows:

Actual condition: Loans, etc., \$2,524,147,000; increase, \$13,707,000. Reserve in cash vaults, of which \$157,254,000 is specie, \$24,286,000; increase, \$1,614,000. Reserve in Federal Reserve banks, \$147,450,000; increase, \$725,000. Reserve in other depositories, \$22,077,000; decrease, \$1,511,000. Net demand deposits, \$2,573,151,000; increase, \$28,772,000. Net time deposits, \$122,055,000; increase, \$11,774,000. Circulation, \$13,700,000; decrease, \$89,000. Aggregate reserve, \$27,922,000. Excess reserve, \$189,371,729; decrease, \$6,093,410.

Summary of state banks and trust companies in Greater New York not included in clearing house statement:

Loans, etc., \$58,772,300; increase, \$2,162,200. Specie, \$1,015,200; increase, \$1,153,100. Legal tenders, \$8,845,000; decrease, \$122,100. Total deposits, \$125,418,500; decrease, \$332,200. Banks' cash reserve in vault, \$19,821,500. Trust companies' cash reserve in vault, \$19,287,900.

SECOND FIRE AT TARPEY VINEYARD

Barn and Hay Destroyed in Two Blazes Within Week

For the second time within a week, a hay fire, involving hundreds of dollars worth of property, has occurred at the M. P. Tarpey vineyard. Both contingencies are believed to have been of incendiary origin.

Yesterday morning at 4 o'clock a large barn containing 100 tons of hay was burned to the ground. Monday night the largest barn on the vineyard and 300 tons of hay were burned. The total loss is in the neighborhood of \$14,000. That the damage was confined to the one building in each case is due to the fact that the ranch is equipped with a high water pressure fire apparatus.

M. P. Tarpey expresses the belief that both fires are of an incendiary origin. He declares that he knows of no reason for such an action on the part of any one.

The loss in both instances was fully covered by insurance.

TO RETURN MONEY TO SCHOOL BOARD MONDAY

Firm of Humphreys-Schutz Paint Company Is Dissolved

A complete restitution of the \$8,638.90, taken from the Fresno district public school fund, will probably be made Monday by former School Trustee H. T. Humphreys. Such was the announcement made by F. E. Cook, his attorney, yesterday.

In connection with his raising of the sum, the firm of Humphreys-Schutz Paint Company, Fresno and 1 street, dissolved yesterday when Frank H. Schutz purchased Humphreys' interest. The firm will be known as the Schutz Paint company in the future.

Cook stated last night that the greater part of the sum taken from the fund had been raised, and that in all probability Humphreys would give a full accounting to the board of school trustees Monday.

The hearing of Humphreys on the embezzlement charge will be held before Judge Graham October 21.

FIRE DESTROYS RANCH BUILDING

Fire on the Catehart ranch, six miles north of Fresno on Phelan avenue, destroyed a cutting shed and 3,000 trays yesterday afternoon at 3:30 o'clock. The shed caught from a grass fire, and the flames were confined to the one building by the efforts of neighbors and workmen. Two or three times the residence and other buildings were threatened, but a shift in the wind averted the danger, and the fire fighters succeeded in extinguishing the blaze.

PREDICT FAIR WEATHER TODAY

Generally fair weather is predicted by the government weather bureau for today. The probability of fair weather is also mentioned for Monday. Attending a change to lower temperatures and a slight fall in the barometer over the plateau region, parts of California and Nevada were cloudy yesterday. The barometer is relatively high along the coast and threatening conditions are not expected for a day or two.

SAY GERMANS CAUGHT IN PINK MARSHES

Russian Sympathizer Organizes "Marsh Wolves" to Attack Invaders

PARIS, Oct. 9, 5:30 p. m.—Important German detachments are enmeshed in the immense marshes of Pinsk, in the Russian province of Minsk, where the rivers have overflowed owing to daily torrential rains, says a dispatch from Petrograd to the Tass News Agency.

The Pinsk marshes cover an area of more than 1,000 square miles in the basins of the Pripiet, Strupna, Elster and Goryn rivers, which flow through them.

Hundreds of Germans are reported to have been lost in the bogs, with their artillery, automobiles and convoys. Many deserters are said to be roving about the country in bands.

A landed proprietor named Sabounevic has organized a powerful detachment of partisans, among them many Cossacks, who are hunting down the German bands. Sabounevic's men, mounted on small horses, are said to be operating with extraordinary rashness. Sweeping down upon a village where the general staff of a German division was quartered, the dispatch adds, the officers were dispersed and panic-stricken.

These "marsh wolves," as the Germans call them, have thus far evaded the two squadrons of hussars which have been assigned to capture them.

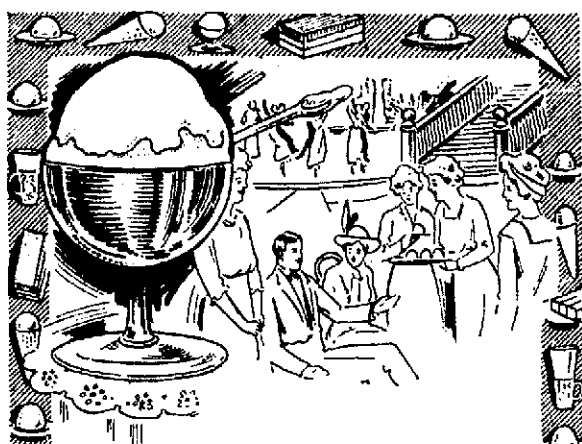

FOUR OF SERIES OF SHOCKS FELT

SAN FRANCISCO, Oct. 9.—Two of the 12 earth shocks recorded over a period of five and a half hours Thursday night by seismographs at the University of California were of such violence that the writing pens were thrown from the drums of the instrument. Not since the great quake of 1906 has this occurred, it is said.

According to a report of the university scientists the origin of all the shocks Thursday night was local, within three miles of the university campus at Berkeley. Only four of the shocks were perceptible without the use of seismographs.

INSURANCE COUNCIL

SAN FRANCISCO, Oct. 9.—The National Insurance Council, made up of 115 insurance societies and associations, was formed here today in the concluding business session of the World's Insurance Congress. Charles H. Holland of New York was made honorary head of the governing committee of fourteen, and Mark T. McKee of Detroit, secretary and treasurer. Resolutions advising uniformity of state insurance laws and condemning excessive state taxation of premiums were adopted by the executive committee of the congress.

THEATER FRESNO

WHITE

Fun will reign and comedy will be king at the Orpheum this week. This week's show at the White theater will open Thursday night headed by a stellar card, The Four Marx Brothers. "Home Again" is the title of the picture musical comedy the Marx Brothers furnish. There are eleven other people in the cast besides the four brothers. The act is without any tire-some ballet work, but with plenty of novel individual music and a cataract of fun.

Incidental to the Schneider reception in the second scene, Arthur Marx offers a crooning advertisement on the harp. Leonard Marx plays an "opera-face" piano on keys and strings at once, and Miss Lily De Rex and Roy Ross interpret the modern dance to the wildest music. Each one of these is a little vaudeville in itself within the big act.

DeVine and Williams will create many a laugh of pure delight with their comedy sketch called "The Traveling Salesman and the Female Drummer."

Comedy chatter with a sparkle of wit to it is the basis of Weber and Elliott's offering.

Years ago, but still not so many years ago at that, a child actress named Alice Lyndon Doll scored an emphatic hit in vaudeville. Because so many grand opera stars are now in vaudeville, Miss Lyndon Doll realizes the necessity of securing a novelty for her debut. She associates herself with two very attractive young women, Mary Campbell and Jane Shaw, and together the trio have a musical offering of the most attractive kind.

In describing their offering as "a little bit of the ordinary," Brown and McCormick almost in a word tell the entire story. They are entertainers of the versatile type, being very good acrobats as well as exceptionally clever dancers.

A theatrical croquette, with all the greens necessary to make it appetizing is served by Wilson and Lenore. The component parts of this delicacy are song, dance, whistling and accordion playing, and the fact that it is an edible delicacy is proven by the number of servings Wilson and Lenore are compelled to serve.

Queenie Dunedin is frequently termed a feminine Sylvester Schaffer. She prefers, however, to be known as "The Variety Girl." Miss Dunedin is entitled to either of these, because of her remarkable versatility. She is a musician, dancer, singer, comedian, and monologist and wire-walker. All these things she does remarkably well. Just to make it more difficult, her monologues are delivered, perched on a slack wire.

Alexander

Expectation is rife over the engagement of Alexander and his own company, who opens at the White theater today, starting with a matinee at 2:15, this evening at 7:15.

Mr. Alexander is acknowledged by press and public to be very original in his methods, as all will testify who witnessed his performances on previous engagements. The audience may ask Mr. Alexander about anything and he will tell you what is on your mind. Questions that concern love affairs, business problems, the whereabouts of missing relatives, any short questions that you want answered. Mr. Alexander does not offend the most fastidious. There are no dull moments in Mr. Alexander's entertainment and he includes many other interesting features including "The Growth of the Mango Tree," "The Spirit Hand of Demothores," "The Enchanted Clock of Colistra," and "The Great Indian Rope Trick," also Alexander's famous trip to Spookville.

Special matinee for ladies only, will be given on Wednesday. All questions will be answered in a confidential manner. There will be no per-

KINEMA

A special Paramount feature will be given at the Kinema theater today. It so happened that "Carmen" displaced the regular feature, so that this Sunday's program becomes unusually strong.

The play is called "Heart of Jennifer," written by Edith Delano, author of Mary Pickford's "Tops." The star is Broadway's beautiful favorite, Hazel Dawn.

Hazel Dawn is likeable, bushy personality and graceful ways and mannerisms scintillate all the way through this latest Paramount picture. It is distinctly a play for a girl of her type—sparkling vivacity and pertinent independence.

The story is that of a woman's strong love for her husband, which prompts her to place upon herself the guilt of the crime committed by her sister. Thus the role calls for intense tenderness, pathos, at times, while it yet touches of the true outdoors and vigorous life in the woods at other times. In fact, there is a sterling and rare quality of variety in this play that should entrance most any audience.

"Two-Gun" Hart in Ince Production Today

The man who surely smiles, yet has a heart as big as the moon—"Two-Gun" Hart, returns to the Kinema today. "Pinto Ben" is a red-blooded, known to every school child—and Pinto Ben is on the screen today with "Two-Gun" Hart in another of his favorite roles. There is a dash to the cattle stampede, there is a dash and sparkle to "Two-Gun" Hart that has never been equalled.

Tomorrow Brings the Funniest Looney Picture

Tomorrow one will see the famous "Looney" in the clutches of five-act. He is caught napping and zip! he gets shanghaied in the twinkling of an eye. And then he starts on a wonderful voyage over the bounding main—the Spanish main—his cork, water-tight and heavy-duty, afloat—Looney becomes a regular sailor luffie. He even does a harp, and the person who doesn't roar with laughter at this latest and newest Looney should receive a medal. It is a real sermon, one that hasn't been equaled by Looney himself until today.

Jack Barrymore in a Paramount Feature Tomorrow

Jack Barrymore, America's most aristocratic comedian has another appearing vehicle. The "Unwristable Duquenois" is one of those big plays of Broadway that kept New Yorkers in convulsions for over a year—and now with Barrymore starring, it reaches the heights of funniness. First he is seen as the wealthy young clubman, then through a series of screaming incidents becomes a tramp. The road all the way back to his former surroundings is paved with rollicking good humor, with a touch here and there, of real drama, which but serves to show what a great actor Jack Barrymore is after all.

Mary Pickford Next Thursday in "Esmeralda"

The idolized little Mary returns again this week, too, this making an all star week at the Kinema. Of course, it is a Paramount five-act play with the winsome and magnetic Miss Pickford, whose role this time is one of tender charm and unusual personality.

Performance Monday night on account of the Musical Club date.

STOP THAT LOUGH Before it is too late with S. B. Lung Tonic. Never fail to give results. Only at Smith Bros' Drug Store.

THEATER FRESNO

In point of attendance and appreciation, too, the past week at the Theater Fresno has been a remarkable one in the annals of theatrical doings.

"The Yellow Ticket," from the brain and pen of Michael Morton, has been the attraction, and each night has seen a worthy presentation of this scathing drama, with a representative audience present to enjoy the unveiling of brutal methods pursued by the secret police of Russia.

With a matinee this afternoon at 2:15, and a last performance this evening, "The Yellow Ticket" will become a part of local theatrical history, leaving behind only a memory of a most remarkable dramatic production.

"Officer 666" Comes to Make Us Laugh

With wit and uncomminated humor to commend it to Fresno theatergoers, "Officer 666" comes to the Theater Fresno Monday evening for a week of fun making.

This clean American play is the work of Augustin McLaughlin and is notable for the power it contains to arouse the human love for laughter.

"Officer 666" has been a great favorite in the largest cities of the United States, and has even started a wave of laughter that reaches around the world.

Now Fresno will have a chance to see this wonderful vehicle of merriment, produced by a most capable cast, selected from the ranks of the "Post Players," dramatic interpreters of recognized ability.

Mr. Layton, who came to Fresno under contract as the leading man with the Post Players.

Mr. Layton is well known theatrically, as one of the most popular actors on the Pacific Coast. His first appearance in "Officer 666" and will later be featured in many top notch dramatic offerings which are coming to the Theater Fresno.

NEW JITNEY "SUB" CLAIMANT

The controversy between Henry Ford and Prof. Parker as to who was the originator of the plan for a diminutive submarine boat has been met by a statement of L. Y. Spear, president of the New London Ship and Engine Company at Groton, a subsidiary plant of the Electric Boat Company.

In 1910 Mr. Spear had plans drafted for three submersible boats, each capable of accommodating a crew of three, or, if necessary, five men. The boats were built in sections at the Fore River shipyard and sent across the Atlantic. The plates were quickly assembled after reaching their destination, which is not made public.

Detached oil engines and electric motors were installed and the submarines were equipped with two standard size Whitehead torpedoes. The boats, put in commission in 1911, were capable of traveling 60 miles and could develop 10-knot speed on the surface or nine knots submerged.

The hull sections were built and shipped from Fore River secretly, and were reported the total cost of the miniature submarines was less than the sum mentioned by either Ford or Parker. It is also said that the craft have been doing excellent work during the present war and are still afloat and searching for marine prey, according

KINEMA
(MOVING PICTURES)

EMPIRE

One of the most interesting moving pictures that has ever been given in Fresno is the reel to be projected at the Empire at the matinee this afternoon and given with the shows tonight and two evenings following. The pictures are extraordinarily clear and show Fresno as seen in panoramic view from the top of the Griffith-McKenzie building, the Fresno fire and police departments, the more important buildings and scenes from the interiors and exteriors of many of the leading business houses and manufacturing enterprises.

This is the first time that a picture of this kind has ever been made in Fresno and it gives a clearer idea of the activity and appearance of the city than could be gained from actual visiting the places shown. Particularly good is the view from the top of the Griffith-McKenzie building as it shows the city in a grand sweep. It is a view that few are privileged to secure.

Big Time Features on the Bill

The Empire has on the vaudeville program for the matinee this afternoon and the evening performances for the first three days of the week some extremely good acts secured from the big time.

Warden & Geatin, coming from the Empress, have a spectacular sing-along with electrical effects which make a sensational climax to a good bill. This act is a distinct novelty.

Toin Kerr and Irene Burton, another pair taken from the Empress, have a singing duet as their feature. This pair are one of the features for the first half of the second week. They use their fiddles in a way that is original and the effects are surprising.

Another headline group on the bill is the Lyric Four, all men, with comedy and harmony of a kind that can not be excelled. They possess excellent voices and their offering is one that will satisfy the most exacting.

A single, also graceful bill, for this time, Bert Waide, monologist, decimates to comedy and has a line of it that goes well with the splendid bill that has been secured for the first half of the week.

La Velle & Robinson, novelty cartoonists, are one of the best teams in this difficult line and their art offerings are very much better than are usually shown.

TORN TROUSERS CAUSE DEATH

A coroner's jury has decided that Lawrence Singleton, 23 years old, of State Hill, in the lower end of York county, was accidentally killed.

Singleton was knocked down by his brother-in-law, Roy Reynolds, 21 years old, in a quarrel on the public road, and his head came so violently in contact with the earth that his neck was broken. Reynolds is under surveillance, and it will remain for district attorney Gross to decide whether or not he shall be tried for murder.

Singleton was the husband of Reynolds' sister, and the brothers-in-law were out for a stroll with 17-year-old Clifford Burkins. They came to a turn-up patch, and Singleton crawled through the barbed-wire fence to get some turnips. As he did so his trousers were caught and torn. This angered him, it is said, and the quarrel ensued. He called Reynolds a vile name, and it is alleged he responded with the blow, which indirectly produced death.

York, Pa., Dispatch to Philadelphia Record.

To last reports—New London, Conn., dispatch to New York Sun.

"ALEXANDER" AND "DANCING DUB" AT WHITE

LYRIC

Flamboyant vaudeville will be featured at the Lyric today only in a Pathé program of drama, comedy and education. The dramatic feature will be "The Monopolist," a three-part Balboa drama. "The Kangaroo" is a single reel educational subject showing that most peculiar of all animals, the Kangaroo in his native haunts.

There will be two comedies entitled "Some Baby," an American production, and "Hot Stuff," a Pathé production. This program will be shown today only.

Corrigan Coming

The feature of the program for Monday and Tuesday will be the virile American dramatic star in the story of a magnificent sacrifice, "Greater Love Hath No Man" from the novel of the same name by Frank L. Packard. The picture is in five acts and in addition there will be three other reels of comedy and drama.

The story of "Greater Love Hath No Man" is as follows:

Doctor Morton is killed by his son, Harold, who persuades Varge, the adopted son, to assume the blame. For his foster-mother's sake, whose grief would be twice-fold, Varge consents, and is convicted to life-time imprisonment.

During his imprisonment, an attempt is made by a number of convicts to kill the guard and make their escape, and Varge, with his super-human strength, aids the guard until the warden's endeavor.

At a fire in the warden's house, Varge saves the life of Janet, the warden's daughter, when he first realizes that he loves her. Afraid of his love, he makes his escape, and reaches a coast town, joins a crew bound for the fishing banks.

As fate would have it, the schooner on which Varge is working is wrecked and Varge being saved, is brought to shore, where he meets Janet, who was visiting friends there. Although warned by Janet Varge is caught by the warden and put in the town lock-up.

Breaking jail, Varge again makes his escape, and after some time makes his way back to the warden's house to catch a glimpse of Janet, who persuades him to take her with him. To save her from himself, Varge goes back to the prison and gives himself up.

Mrs. Morton, on her death bed, asks to see Varge, and after her death Harold confesses and kills himself, thereby freeing Varge, who marries Janet.

Free Matinees

Beginning Monday Lyric programs will be increased to eight reels. Beginning next Saturday there will be a free matinee for children every Saturday from 10 o'clock until 12 o'clock. As a special attraction for next Saturday the management has purchased attractive souvenirs which will be given to every child regardless that admission will be free.

ABOUT TIME

One evening the young minister, who had seemed rather attracted by "Rip Van Winkle," was dining with the family. "Little Sister" was talking rapidly when the visitor was about to ask the blessing. Turned to the child he said in a tone of mild reproach:

"Well, it's about time," answered "Little Sister," in an equally reproving tone. "We've been expecting it for a year, and she has, too!"—From The Philadelphia Public Ledger.

WHITE THEATER—"Alexander," the man who knows—Orpheum vaudeville.

Japanese Geisha Girls Visit Fresno to Give Performance

Miss Yashida Tsuyako and Miss Hana Aatanabe, two of the Japanese Geisha girls playing an engagement here.

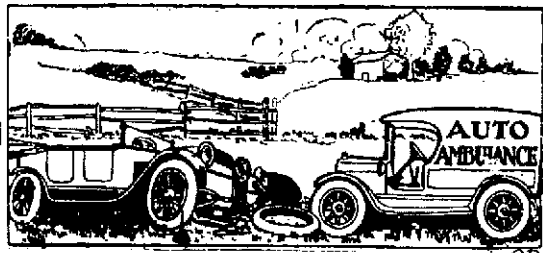

The Japanese Geisha Girl—or rather a troupe of 30 of them—garbed in her native costume, appeared before the local Japanese last night at the Majestic theater on F street, in the opening night of a series of three engagements.

Don't Loose Your Temper or Soil Your Hands but Telephone for the "F. V. W." Tire Service Ambulance

When Tire Troubles Overtake You

THE unexpected may happen any moment—but don't get red in the face and loose your self possession. A blow out or a puncture is a looked-for opportunity to test our "ROAD SERVICE," and you'll be mighty thankful for this service, when mishaps occur, and you're not dressed fittingly for tire changes.

Phone 798

The "F. V. W." Tire Road Service is free to all motorists, irrespective of make of car, or where you have your tire repairing done.

—we want to serve you in every way possible.

Experts sent out day and night to any point within ten miles of Fresno to make tire changes or put on new tires.

All of our service stations are stocked with "United States" and G. & J. tires and tubes.

These quality tires also installed by "F. V. W." TIRE AMBULANCE.

FRATERNAL SOCIETIES

Modern Woodman

Sunset Camp, No. 7199, M. W. A., held its regular meeting last Monday evening in I. O. O. F. hall. Three applications for membership were accepted. The new rituals have arrived and will be used for the first time next Monday evening, at which time something special will be prepared for the members and visiting neighbors who attend.

The district deputy, J. A. Rogers, has been visiting all the camps in the Valley, pushing the preparations for the meeting of Monday evening, October 25, when a class adoption of candidates from all the active camps in the Valley will be held in I. O. O. F. hall in Fresno in honor of former head banker and present chairman of the board of directors of the society, Neighbor F. H. Korns, and State Deputy H. V. Ross.

Degree of Pacahontas

Pacahontas Council, No. 144, Degree of Pacahontas, held a well attended meeting with Elizabeth Russell in the chair, on Thursday. Sister Nadine Stephens returned from her vacation and was cordially welcomed back into the council. The relief committee was glad to report that there were no sick members in the council.

The council urges all the members to make an extra effort to attend the meeting next Thursday night, as matters of importance will be brought before the council.

Independent Order Foresters

Court Fresno, No. 763, Independent Order of Foresters, will hold a short business session next Thursday night, commencing promptly at 8 o'clock. After the business session, the regular monthly club will hold its meeting. The playing will commence at 8:30 and close at 10:30 o'clock. At

this state. Following their engagement here they will go to Los Angeles. Six hundred Japanese attended the opening night. The dances were taken from the various periods of Japanese history, and were graciously received. The cherry blossom dance and chorus has the Japan of 300 years ago as a setting. It more nearly approaches the American idea of a chorus. A complete orchestra of Geisha girls furnished the musical and vocal numbers for the entertainment.

All of the shows are open to the general public.

CANAL BUSINESS TO BE HANDLED BY RAIL

NEW YORK, Oct. 9.—Dealers in perishable freight consigned from the Pacific by way of the Panama Canal have taken steps to have ships now loading or unloading in Pacific Coast ports and about to sail, unload their cargoes for shipment by rail, because of the closing of the Canal as a result of earth slides. Such action was taken by the Dried Fruit Association of New York, co-operating with the National Wholesale Grocers' Association and other interested organizations.

HANDSOME BUNGALOW SOLD
Sibley & Company announce the sale of a bungalow at 1932 Roosevelt avenue from G. B. Ellis to Minnie Ruland, the price paid being \$3000. The house which has just been completed is a five-room bungalow and is a handsome building. Two lots are included in the deal.

the close of the game, refreshments will be served. All those who have participated in the former games are requested to be present, and invite their whist-playing friends.

Woodmen of the World

The presence of C. L. Sherriff, the new district manager, will mark the launching of a "red-letter" membership campaign in Manzanita Camp, No. 150, Woodmen of the World, next Tuesday night. Sherriff succeeds J. D. Jones, who has been transferred to Sacramento, where Sherriff was formerly located.

Sherriff will have his headquarters in Fresno with clerk J. L. Hurlbert in the Woodmen building. The meeting next Tuesday night will begin at 7:30 o'clock. Plans will be discussed for an "Old Guard" meeting in the near future.

Fraternal Aid Union

Council No. 241, Fraternal Aid, will meet on Tuesday evening in Old Fellows' hall. Every member is cordially invited to attend, as this will be a meeting of special interest, as the election of officers to the district convention to be held in Visalia, October 19, will take place.

Pythian Sisters.
The next regular meeting of Prosperity Temple, No. 67, will be held Monday night, at the A. O. U. W. hall. All members are urged to be present.

There was a good attendance at the meeting last Monday afternoon. Brother Charles Jackson was reported as having been out of bed, but is slowly improving. Sister Myers' son is convalescing after a serious illness of typhoid fever.

The Stitch and Chatter Sewing club was delightfully entertained at a party given by Mrs. Anna Chinn at her home, 237 Blackstone avenue, last Wednesday afternoon.

An informal hour was spent over needlework and late in the afternoon tempting refreshments were served. The club will be entertained three weeks hence by Mrs. Joe Smith at her home, 1428 J St. All Pythian Sisters are members and are invited to attend the club meetings.

Acacia Circle.
Acacia Circle No. 18 met in W. O. W. hall Thursday evening. A pleasant and profitable session was held. There were four visitors present from 742 Circle.

Neighbors Gilliam, Sunderland, Moreland and Spears. After lodge closed all enjoyed cards and light refreshments. The Thimble club will meet with Mrs. S. G. Bowen, 275 Diana street Wednesday.

Knights of Maccabees

At a regular review of Fresno tent, No. 81 last Wednesday night it was voted to organize a membership campaign in the form of a contest. The members on the losing side are to furnish a banquet to all who present the night this contest closes.

Harry H. Brownson was selected as captain of the white side and H. L. Howard was selected as captain of the red side. These captains will choose a first and second lieutenant from members appointed to their respective sides. The numerical standing of each side will be reported at each regular review. Prizes will be awarded for members secured. After the review a lunch and smoker was enjoyed and the summer record of the orders work was reviewed by E. L. Dumps, who has recently returned to take charge of the field work in the upper San Joaquin valley.

Spanish War Veterans.
Sarah A. Jagger Auxiliary, U. S. W. V., held the annual muster at the regular meeting Monday evening at the A. O. U. W. hall.

Lois Rollins, department inspector, praised the splendid way in which the work was carried out, and the fine attendance present. A banquet was served after the meeting to which the comrades of the U. S. W. V. were invited. Captain Stephenson was chosen toastmaster. Lois Rollins and other prominent members of both the auxiliary and the camp were called on for speeches. At the conclusion of the banquet dancing was enjoyed until a late hour.

Degree of Honor

The Degree of Honor held a very interesting meeting Friday afternoon. Three applications for membership were received. The sick committee reported that all the members who were ailing were on the road to recovery. The resignation of C. of H. Lulu Carrick was accepted and Mrs. Maud Posner chosen as her successor.

Next Friday afternoon was set aside for a social meeting to which all members and visiting members are invited. A banquet will be served and a campaign for new members will be inaugurated.

Loyal Moose

Fresno Lodge No. 445, Loyal Order of Moose, will on Wednesday next, October 12, celebrate the anniversary of the installation of a Moose lodge in Fresno. There will be an interesting program. In fact one had well expect all others heretofore presented by the lodge. There will be refreshments and a general good time is promised to all Moose and their friends. An active membership campaign was started to double the membership of the lodge in a meeting last Wednesday. Prizes are to be given to the membership bringing in the most candidates before the first of the year.

P. O. E.
The following delegates from the Fresno lodge of the P. O. E. are attending the meetings of the California Elks State Reunion Association, now in session in San Francisco: C. H. Staples, H. C. Wilson, A. V. Akers, J. Vernard, W. A. Burrell, J. G. Ferguson, A. C. Lough, H. T. Maxim, D. O. A. Broder and L. L. Hobbs.

Fraternal Brotherhood

Fresno Lodge No. 91, Fraternal Brotherhood, will enter a competitive county campaign for membership with other lodges of the Valley shortly. Already considerable interest is being evidenced in the contest. W. W. Edwards was reported to be recovering from illness, in a meeting last night. E. P. Otto and wife were visitors in the meeting. The lodge will hold a social next week.

SECOND FIRE AT BEACH RESORT

ABERDEEN, Wash., Oct. 9.—Incendiary fire last night wiped out all the business section of Westport, a beach resort near the mouth of Gray's Harbor except two stores. Among the buildings destroyed was the post-office and discovery was made this afternoon of theft of \$500 in stamps. This is the second fire to visit Westport within the week. The first on Tuesday after having destroyed a hotel and two other buildings. Every beach resort on the harbor but one has been destroyed by fire during this summer and fall, the exception being Pacific Beach.

Wheat or Meat

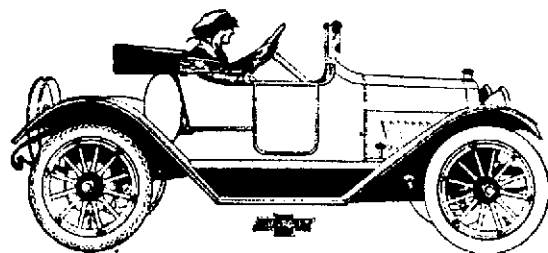

Every year more and more people give up the eating of meat altogether, while many more refrain from eating it to a greater or less extent. Meats and heavy foods have their place, of course, but should be eaten sparingly if one would keep in perfect health. There is more ill-health resulting from over-eating, or the use of heavy, indigestible foods, than from all other causes combined.

The remedy is to select lighter foods—things that are more easily and quickly digested.

One of the very best things in this connection is the prepared breakfast food known as "FORCE." Made from whole wheat, scientifically cooked and blended with barley malt, "Force" is the ideal food for old and young alike. "Force" builds bone, muscle and nerve—it nourishes without stimulating—and will fill you full of pep.

Get it at your grocer and ask for the little folder which contains many valuable recipes for using Force in various forms. When ordering, insist upon "Force." Accept no substitutes.

BELIEVE GARRISON ESTIMATES READY War Defense Plans Are Soon to Be Given President

WASHINGTON, Oct. 8.—Secretary Garrison's estimates on army needs in connection with the national defense program being framed for presentation to Congress by direction of President Wilson are believed to have been completed and approved by the President, although no intimation of the increase to be asked in the coming military budget has been given out.

War Department plans, it is understood, contemplate an increase in expenditures on the military establishment on a par with any increases to be urged. It is generally admitted that Secretary Daniels will recommend an increase of a million and a quarter dollars or more over last year's navy budget.

Wheat or Meat

Why Cereal Foods Are
Steadily Growing in
Popularity

Every year more and more people give up the eating of meat altogether, while many more refrain from eating it to a greater or less extent. MOTORIZING PROBLEMS

Kindly answer the following in your valuable column.

I have a Maxwell runabout No. 1-D 500, with a two-cylinder horizontal opposed on the 4 1/2-inch bore and a split-shaft magneto and coil, made by the Maxwell-Brisson company, Tarrytown, N. Y. (a) What year was this model made? (b) What is the horsepower of the engine? (c) Both spark plugs fire at the same time and for every revolution of the flywheel, at the firing stroke in one cylinder and when the exhaust valve is open in the other cylinder. Is this the way they are supposed to fire, or is there something wrong? The engine runs smoothly.

Ans.—This car was made during 1909 or 1910. For definite information write Maxwell Motor Co., Newburgh, Indiana. According to the S. A. formula the horse-power should figure 18.2.

Both spark plugs should not fire at the same time. When one cylinder is on compression stroke the other is on exhaust stroke. The firing should take place on cylinder at top of compression stroke, and the other cylinder should be on exhaust stroke at the same time. A close inspection of this should locate the trouble.

This summer I had my first experience with a four-cylinder engine in a (broad) marine motor equipped with low-tension magneto and coil.

A battery of six cells was used for starting purposes only, and then switch to magneto. I found that with batteries testing 25 amperes they quickly exhausted their strength. In the early part of this month a set only lasted three days. I applied to an electrician for relief. He examined the wiring and said it was O. K., and could not tell what was the trouble. I will thank you if you will give a statement of what was wrong and how to proceed to correct the same. The engine and batteries were installed under a hinged decking and forward of a bulkhead in the boat. When the switch was thrown to "battery" the amperage in cells was reduced by 7 1/2 amperes.

Ans.—A battery of six dry cells is not sufficient for low-tension ignition.

You should use at least eight or ten connected in multiple series. Wired in this manner the cells will prove more enduring. In low-tension ignition the duration of contact at the electrodes is such that greater current consumption takes place than with the high-tension system. Especially is this true with the multi-cylinder motor.

I have a 1915 four cylinder automobile and wish to put it up for all winter in a new cement garage which is not heated. Kindly advise what I should do to the car; also to storage battery and tires.

Ans.—The car should be placed on jacks and the tires deflated in order to relieve the pressure. Some persons, exercising extreme care, have the tires removed and stored in a cool, dry room which is dark.

The gasoline should be drained from the tank and carburetor. The water should be drained from the cooling system and when this is done, the motor should be allowed to run for a few seconds to dry the cylinder castings, etc., thereby preventing rust. It is well to inject oil in the cylinders in order to prevent the pistons and rings from rusting.

All the brass or nickel trimmings should be gone over with a little oil to prevent corrosion.

It is best to put the top up and cover the whole car with a sheet. The storage battery should be disconnected and either recharged about every month during the winter or else dismantled. The storage battery should be overhauled at least once a season and during the winter is a good time to leave it with the battery manufacturer for care and attention.

If your car is equipped with a clutch of leather face construction it is advisable to treat the leather with a little mastic or car oil. This will prevent it from hardening.

All parts which are apt to rust should be gone over with oil. Care should be taken not to store the car in a stable or any place in close proximity to stable refuse. The ammonia fumes will affect the paint, causing it to crack and peel.

It is not necessary to drain the oil from the crank case; however, fresh oil

HELPFUL HINTS

The porcelain of the spark plug will sometimes crack and permit a short circuit within the plug. This is often hard to detect unless the porcelain is removed and carefully cleaned. The slightest indication of a fracture is sufficient to condemn the porcelain.

Gear case grease should not be too stiff. It should be able to flow between the teeth of the gears freely. For this reason a lighter grade of lubricant should be used during cold weather.

Check valves, which control the flow of oil through the pump where pressure feed lubrication is used, should be cleaned occasionally to insure positive working.

When a motor knocks it means that something is wrong. Wherever there is a rattling, knocking, or loose which ought to be tight, and remember that lubricants are of vital importance. It is very difficult to get too much oil in the crank case. Here you should keep sufficient oil, but not an over amount. If you do happen to get too much oil in the crank case, the spark plugs will foul and you will have trouble with misfiring cylinders.

When a gasoline feed pipe is looped or otherwise bent in order to avoid the rigidity and liability to breakage of a straight pipe, the check and consequent interruptions of the flow of fuel are likely to occur after filling the tank unless sufficient gasoline is poured in to produce the pressure required to drive out the air that will be trapped if the loop or bend is made in the fuel pipe. If the loop is turned so as to be horizontal, however, there will be no such trouble. Incidentally, a complete loop is the best safeguard against crystallization and consequently breakage of the pipe.

should be used before the car is placed in service again. Since there is no heat in your garage, would suggest that the tires be removed and stored elsewhere. The garage should at least be kept dry.

I have a motorcycle, single cylinder, it works good at all times except when engine gets warmed up, and I throttle it down to turn corner. Then the engine will knock ten or twelve times and then pick up and run smoothly as long as I keep it running with full gas. Can you tell me what is the cause of this knock? Engine does not knock when I start with engine cold.

Ans.—Perhaps the spark is too far advanced for slow engine speed. In slowing down for corners, etc., it is not good practice to force the motor to pick up the load again with spark advanced. You might also note if cylinder is badly carbonized. This will cause preignition and a knock.

When starting, stopping, or running in low my car emits more or less smoke. What causes this? Have to trouble running in high and am careful to keep oil level between petcocks. Will using tablets harm the engine?

Ans.—When a motor has been used for a long time it is often advisable to use oil of a heavier grade to reduce smoking. If the cylinders are true, new piston rings should stop it. When the motor is accelerated more or less oil is bound to work into the combustion chamber if pistons and rings are not tight. A good grade of cylinder oil should be used, in which case tablets should not be necessary.

I was unfortunate in having the rear of the wooden body of my car cracked about three feet. Will you kindly state in your paper whether this can be repaired or not?

Ans.—Most any skilled bodymaker should be able to make the necessary repairs. A new panel or section may be required if the damage is considerable. At any rate it should not be necessary to have a new body.

What substance can be applied to the leather washer of a tire pump so as not to allow the air to leak through? I have been told to oil the leather, but the oil will after a time be forced through the leather.

Ans.—A little neatfoot oil or castor oil applied to the leather washer of the plunger should make it work better. When the leather gets dry the air is bound to leak past. If the oil does not prove of service, you had better install a new washer.

My car has a large exhaust pipe entering the muffler and shows much noticeable increase in power with the output employed. I am told that there should be a difference in power, but taking my car as an example, I think there should be none.

Ans.—With a properly designed exhaust pipe and muffler, no appreciable decrease in power should be noticed at normal speeds. At very high engine speeds, however, a muffler lessens the power, because the exhaust gases do not have a free exit. If there is any resistance, more or less back pressure is created, which, in turn, is bound to reduce the power. While this reduction is only slight, nevertheless, it can be noted.

Would you please let me know what is meant when they say "gear 4 in 1" and how can I find out how to do it? Thanking you in advance.

Ans.—The rear axle gear ratio is usually meant by such a term. You can determine the gear ratio of the different gears by counting the teeth of each and dividing the number of teeth of the smaller gear into the larger. The term 4 to 1 gear ratio means that the crank shaft of the motor completes four revolutions to one of the rear wheels. From this you will note that no gear reduction takes place in the transmission, but that direct drive is considered.

I have placed new jackets in the valve caps of my motor and no matter how tight the caps are screwed down there seems to be lost air. The threads of the caps are rather coarse and I would like to know what to use so that the leak can be stopped and yet the caps not burn fast.

Ans.—Make a heavy paste from flake graphite and kerosene, apply the paste over all the threads and on the shoulder of the caps. Use plenty of graphite. This compound should prevent any leaks past the thread and yet should not allow the cap to burn fast. This mixture is used freely in repair shops where such troubles arise.

WINNING. Man, Oct. 5, 28 Redmond Roblin, late premier, and three other former cabinet ministers, Hon. J. McQuinn, J. H. Brown and T. P. Cole, were committed for trial this afternoon by Magistrate McDonald on a charge of conspiracy to defraud the province in connection with the erection of the parliament buildings.

WAR CORRESPONDENCE

Socialist Campaign

LAUSANNE, (Correspondence of The Associated Press).—In order to move doubts among the French working people regarding the part England is playing in the war, the British Socialists have by the consent of the French government arranged a series of lectures covering its great industrial cities of France and lasting for the period of two months. The speakers selected are Adolphe Smith, a well known writer and speaker who served as a volunteer with the French during the siege of Paris in 1870 and Adolphe M. H. Mr. Smith speaks French like a native, but Mr. Hodge's speeches will be translated.

In a trip to France to arrange these meetings, the two "organizers of fraternity" were received by President Poincaré, Minister of Munitions, and other high officials. These officials not only consented to the meetings but aided arrangements, as the object is to combat the propaganda of the small minority of British peace party socialists, who have given the French workingmen an exaggerated and false attitude of British labor toward the war.

Adolphe Smith will give a general account of the British effort and Mr. Hodge will tell what the British working classes are doing. The first meeting will be held in Paris attended by Wilson, Keir Hardie, and other French government officials, university professors and representatives of the press at the ministry of Public Works, Lyons, Bordeaux, Marseilles and the manufacturing cities will be covered by the speakers.

Banks Prosper

BERLIN.—The great banks of Berlin appear to have had fairly satisfactory business results during the first half of the current year. The Deutsche bank even reports that its business has been good, but the source of its earnings were partly different from those of last year. An Esen bank attached to the Deutsche bank had even larger earnings than for the first half of 1914.

The Berliner Handels-Gesellschaft, another of the big institutions of the city, also did comparatively well, the reduced earnings from brokerage operations and stock and bond flotations having been counterbalanced by interest receipts on loans and discounts. And profits were made by financing the manufacture of war supplies, and surplus deposits could also be put at a fair profit into the Treasury bills of the Empire. The leading director of the Dresdner bank says that the business results of that institution have been very good. He mentions the fact that many foreign securities were sold for the bank's customers. He mentions Scandinavian securities as an example but says that still more Rumanian bonds were sold.

Destitution in Poland

LODZ, Poland, (Correspondence of The Associated Press).—An increased number of beggars is a sight common to all cities in territory occupied by the military forces, but nowhere in the other cities visited by the Associated Press correspondent who has been in this area, such numbers nor do they display such pertinacity as here. In Lodz they follow the pedestrian for square after square, hands stretched out, whining constantly. They await one outside the shops which he enters; they even enter the shops and restaurants.

This is but one of the signs of the appalling destitution which has already come upon many of the inhabitants. Actual hunger is a daily quest in thousands of homes; in other thousands it stands at the door. The coming of the winter, with its going on there will be misery and want indescribable. The city grants weekly payments to the needy, but they are only a drop in the bucket amounting to from \$1 to \$1.50 a week for a family. Provisions are very dear and the necessities of life have increased greatly in cost. To have a pair of shoes halfoiled, for instance, costs \$4.50. It used to cost \$1.25.

Rabbi Treistmann, chief rabbi of the Lodz district, told the Associated Press representative that the destitution prevailing among the poorer people was beginning to show particularly in the great increase of the infant death rate. "The babies are dying at a sad rate," he said.

Here—and the same thing is even more apparent in Piotrkow—is to be observed one of the saddest results of the destitution due to war. This is the great number of young girls, some of them mere children, who have had to choose an evil way to keep from starvation.

Lodz is preeminently a manufacturing city. The great majority of its inhabitants normally work in factories, and there are now closed. There are, for one thing, no raw materials to work on.

The closing of these factories and the resultant unemployment of thousands naturally crippled the buying power of these thousands, and countless small shops went to the wall. Many persons turned to peddling on the streets, selling mainly cigarettes, cigars and matches. But this month an order goes into effect forbidding this free trade in tobacco and placing the business "in regie" that is, under the exclusive control of the government.

Russia Gets Supplies

SEOUL, Korea.—Russia has placed an order for 800,000 pairs of army boots with the Chosen Trading company which is operating day and night.

Advices here indicate that Russian army officers are purchasing all available cattle and sheep in Mongolia. The figures are estimated at millions of heads. The live-stock will be for the most part butchered in Mongolia in special abattoirs and then forwarded to the Russian armies.

British Economy

LONDON.—One of the first reforms proposed by the Women's War Economy League is to induce the people to try to get along without sweetmeats. Other needed economies relate to the \$35,000,000 spent annually in motor-cars, motorcycles and cycles and \$20,000,000 on imported gasoline. Britain spends also \$15,000,000 on skins and furs, \$7,500,000 on ornamental feathers, \$35,000,000 on silks, \$25,000,000 on wines and spirits and nearly \$10,000,000 on tobacco. The league also urges strict economy in coffee, tea, and all imported articles of food, drink and wear.

Pension Questions

LONDON.—Higher pensions for disabled officers of the army and navy and for their widows, orphans and dependents have been proposed by a Parliamentary committee of which Poyser Law is chairman. But even this falls far below the scale granted in the United States.

Substantiated would receive under the new arrangement \$750 a year when completely disabled, with an additional

\$50,000 for each year of service in excess of 15 years up to a maximum of \$1,250. An officer of rank corresponding to major in the army would get a maximum of \$850 if partially disabled, and \$1,000 if totally disabled. For Lieut-Colonels and navy commanders the minimum for partial disablement is put at \$1,000 and an addition to \$500 to their ordinary pensions if entirely disabled.

The widows and dependents of subalterns have a graduated scale proposed for them, with \$500 a year in the case the officers is killed in action, \$375 if disabled by disease contracted on active service and \$250 in the case of other injuries or disease.

It is proposed in addition to make educational grants in special cases for the education of officers' children.

Alpine Forts

LAUSANNE, Switzerland.—The Italian troops have had some extraordinary surprises in their mountain warfare against the Austrians, says a special correspondent of the Gazette de Lausanne who has been at the Italian front. The paper says: "They have found at regular intervals from the Stelvio Pass to the Adamello Glacier, a distance of about sixty miles, a series of forts for lodging Alpine troops on and near the peaks. These forts have turned out to be built on cement floors and the walls of the forts lined with sheets of steel sufficiently thick to turn bullets. Each fort has accommodations for twenty persons. It is extremely rare to find any Austrians together in the high regions, but neither the size of the forts nor their number seemed to have attracted suspicion because few Italian Alpines ever go up into that part of the Tyrol. Each of these armored positions is defended by machine guns. The approaches are so difficult and exposed that it would seem as though a couple of machine guns and a dozen men would hold a fort against a regiment, but the Italians have found ways of overcoming them. Where there are glaciers the Alpines cut narrow trenches in the ice and gradually work their way up, protected from rifle and machine gun fire, to where they can reach a fort."

Winter snows are already falling in these high regions and it is not unlikely that both sides will be reduced to inaction during the hard winter in the Tyrol, but military operations will continue in the low countries at the head of the Adriatic and elsewhere. Further south should the Italians send an expeditionary force across the Adriatic to operate below Trieste.

Admire Kitchener

LONDON.—Lord Kitchener seems to be the only cabinet minister who has impressed the imagination of the English child, according to an examination of fifteen-minute impromptu essays written by 3,081 school children at the instance of Dr. C. W. Kimmins of Southwark. The war lord was constantly referred to, but not a single other minister was mentioned.

The essays classified showed the girls reached the pitch of warlike feeling at the age of ten and boys at eleven years. From the age of eleven onwards the pupils began to show anxiety of such questions as the cost of food and the hardships of operations, connecting the forcing of the narrow with a plentiful food supply from Russia. Girls at 12 manifest a maturity in their views of the war at least a year ahead of the boys. Curiously enough, the advance of the war and the retreat from Mons made little impression on the children.

A little girl aged 11 wrote: "The origin of the war was this: That when the German Emperor was at Windsor he insulted Queen Victoria and so King Edward smashed him round the ears. The German Emperor said, 'I'll be avenged' and hence the war."

A boy of 12 wrote: "The advantage of the war is that the men have learned to knit" and another boy wrote: "The main disadvantage of the war is that girls must remain old maids because there will not be any men left."

NEW YORK, Oct. 8.—The first transaction in the \$500,000,000 Anglo-French five-year 4-per cent bonds on the New York stock exchange was for the amount of \$10,000 at 95. The bonds, "when issued," were listed on the stock exchange for the first time today.

You Are Invited TO THE Grand Opening NEW GARAGE Wednesday Night

Corner Mono St. and Van Ness Boulevard (Formerly K Street)

There will be music by Falkenstein's orchestra and a free dance, to which everyone is invited.

We open the finest garage in Central California on Wednesday night, one complete to the least detail, and equipped in every particular.

We want you to come and inspect our new home. You are welcome; bring your friends with you.

J. C. PHELAN

Corner Mono St. and Van Ness Boulevard (Formerly K Street)

LOWE
VULCANIZING WORKS

Put Your Worn Casings to Work!

These old casings, that you think of no more value can be made into a tire that will run 3000 to 5000 miles.

Bring us two old casings, and learn how motorists are getting extra tire mileage.

Tires rebuilt for \$1.00—without stitches or rivets.

We use the only process known for rebuilding tires, without endangering the inner tubes, with rough stitches or rivets.

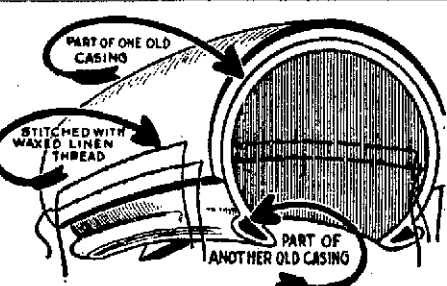

PUNCTURES REPAIRED 10c—guaranteed vulcanizing.

Detroit Electric \$1975 to \$2275

—if you want an economical car

—then choose the Detroit Electric. Compared with other cars its operative cost is far lower. Cost of current for battery charging averages \$5 to \$7 per month. Even this is being constantly reduced. Life of time on Detroit Electric is much longer than on other types of cars. There is no over-powerful engine humming away at over 2000 revolutions per minute to better the mechanism, so that Detroit Electric owners are saved the costly repair, replacement, and adjustment expenses which confront most gas car owners each month. Every part of the Detroit Electric is built so well that durability is absolutely assured. Please for a road demonstration.

Prices range from \$1975 to \$2275

AGRICULTURAL DEPARTMENT

EDITED BY W. G. HUMPHREY

Feeding Silage

Silage is not attractive in appearance but it certainly gives attractive results as a feed. It is palatable, cheap and succulent, and it cools the blood, improves the handling qualities of the skin and hair, tones up the digestive system, and improves the health generally. Breeding females are in good condition for producing healthy offspring and after parturition are better able to give plenty of milk than when on a dry ration. It is a large extent it is a preventative of digestive troubles, and with dairy cows it lessens considerably the chances of milk fever and other ailments. By using silage a sure crop of desirable roughage is guaranteed, a large yield per acre at a comparatively small cost per ton is secured; the stock carrying capacity of a farm is increased; the nutrients of the entire plant are conserved in efficient form; being succulent, silage furnishes pasture conditions at any desired time; and it keeps well and stores economically.

Palatability of Silage.
Silage is palatable because it is green and preserved with the exception that the sugar has been converted into acetic acid that stimulates appetite and gives a good flavor. It is possible to have too much acid in the silage. A very sour silage is not palatable. If the plant silage contains too much sugar, too much acid will be produced if it does not contain much sugar, not enough acid will be produced to give the desired flavor and aroma to the silage.

Relative Feeding Value of Silage.
Silage is not a magic foodstuff. There is not quite as much food value in it as there was in the plant from which it came. It is not a rich food and stock are therefore compelled to eat a rather good quantity of it. A good silage will safely eat 40 pounds of it in a day. Combined with other feeds richer in protein, it meets the needs of the animal. The great things must not be expected of it. It is fair to expect that an acre of corn will produce a silage that will have a greater feeding value than the same acre handled in the usual way. But the added feeding value will usually not be more than a third or a fourth.

Length of Time to Stand Before Feeding.
In about five days the chief fermentation will have taken place and the silage will be made. But the top silage will have been exposed to the air, putrefactive bacteria will have been active, and the top silage will be spoiled. This should be removed sufficiently to get at the good silage. While the main fermentation process is going on, there are some ripening processes that continue for three or four weeks. These will add to the palatability. Some of our most successful feeders of silage feed the silage from the day it is put in the silo. This silage is taken out of the silo at the top of the silo. This practice is to be recommended where practicable.

Taking Silage Out of the Silo.
The silage should be removed in such a way as to keep the surface level. No more should be silaged up than is taken out. As little surface as possible should be exposed. The silage should be taken out of the silo at the top of the silo. This practice is to be recommended where practicable.

Spilled Silage on Top.
When the silo stands for a time after filling there will be some spoiled silage on top. The amount spoiled may be lessened by any covering that will exclude the air. This spoiled silage is not fit for feeding purposes and must be thrown out. It is dangerous to feed any spoiled silage to horses and mules, and great care must be taken to see that they get nothing but the very cleanest and sweetest silage.

The amount of silage to feed a cow depends upon the capacity of the animal to consume feed. She should be fed as much as she will clean up without waste when consumed along with hay and grain. Ration or lower the amount until the proper quantity is ascertained. Generally speaking, a good cow should be fed three to four times the amount of her feed it should be reduced at once. The small breeds will eat 25 or 30 pounds per day; the large breeds 40 or more; and the medium-sized ones amounts varying between.

Ironical directions for feeding cows can not be given. In general, however, they should be supplied with all the roughage they will clean up with grain in proportion to butter fat produced. The hay will ordinarily range between 5 and 15 pounds per cow per day when fed with silage. For Holsteins, 1 pound of concentrates for each 4 pounds of milk produced will prove about right. For Jerseys 1 pound for each 3 pounds of milk or less will come nearer meeting the requirements. The grain for other breeds will vary with the two according to the quality of milk produced. A good rule is to feed seven times as much as there is butterfat produced.

The following rations have been found satisfactory:
For a 1400-pound cow yielding 40 pounds of milk testing 3.5 per cent milk:

Silage 10
Clover, cowpeas, or alfalfa hay 10
Grain mixture 10
For the same cow yielding 20 pounds of 3.5 per cent milk:

Silage 20
Clover, cowpeas, or alfalfa hay 10
Grain mixture 10
For a 800-pound cow yielding 30 pounds of 5 per cent milk:

Silage 20
Clover, cowpeas, or alfalfa hay 10
Grain mixture 10
For the same cow yielding 15 pounds of 5 per cent milk:

Silage 20
Clover, cowpeas, or alfalfa hay 10
Grain mixture 10
For the same cow yielding 15 pounds of 5 per cent milk:

In case the hay used is not of this kind, some of the extra chop may be replaced by timothy or cuttimed hay. In many instances brewers' dried grains or crushed oats may be profitably substituted for the bran, and oftentimes gluten products can be used to advantage in place of bran or oil meals.

The time to feed silage is directly after milking or at least several hours

before milking. If fed immediately before milking the silage odors may pass through the cow's body into the milk. Besides, the milk may receive some of the silage directly from the skin. On the other hand, if feeding is done subsequent to milking, the volatile silage odors will have been thrown off before the next milking hour. Silage is usually fed twice a day.

Silage greatly increases the milk flow of a dairy cow. If some of its feeding produces unpleasant odors in the milk, milk readily absorbs odors from the air and may absorb the odor of silage. While trouble of this sort is occasionally met with, it may easily be overcome by feeding the silage part of the ration after the milk is removed from the barn.

Feeding Silage to Dairy Cows.
Silage is above all things a feed for the dairy cow. Succulent in its nature, it supplies the cow with the most natural substitute for the spring pasture grass upon which she gives her largest and cheapest yield of milk. Good silage is a better able to stand a heavy grain ration for a long period than when fed on dry feed. Silage has had its place in the ration of all the world's champion milk producers.

The Nebraska agricultural experiment station has shown that silage was equal to sugar beets for milk production. The Vermont station shows an increase in milk production resulting from a substitution of silage for part of the hay, together with a corresponding increase in the yield of milk. Where corn silage and corn fodder from the same field have been fed to cows with a uniform grain ration, the silage produced 12.8 per cent more milk per day than the dry fodder.

For summer feeding, silage takes the place of cooling crops, i. e., green feed crops, and every day a supplement to dry pasture. At the Ohio station two lots of cows were fed, one on a heavy silage ration, with a minimum hay and grain ration in addition, and the other on a heavy grain ration and dry roughage. The average net profit was \$3.58 per month on silage and \$2.47 on the dry ration. The cost of production of milk and butter was reduced nearly one-half by the use of silage while there was an equal amount of nutrients in both rations. It is only fair to state that this experiment was hardly fair to the dry ration as it was made up of too large an amount of high-priced grain feed and too small an amount of cheap roughage. Silage is an excellent feed for the dairy calf and the dairy heifer, and when supplemented with alfalfa hay can hardly be improved on.

However, a ration of silage and alfalfa alone is not satisfactory for cows in full milk. They require some concentrated food in addition to keep up the milk flow and maintain body weight. It is believed that a large allowance of silage is detrimental to the breeding qualifications of the bull. So far as present investigations indicate, it is probably advisable to limit the silage allowance to about 10 pounds of silage a day for each 100 pounds of live weight. This should of course be supplemented by hay, and with a small grain allowance in case of bulls doing active service or growing rapidly.

Calves may be fed twice daily all the silage they will clean up in from thirty minutes to an hour, supplemented by alfalfa.

Silage for Beef Cattle.
Silage will undoubtedly occupy a more important place in our beef industry in the future than it does at the present time. As was recently said by H. E. Dvorachek, "Cattle are too high priced and range is becoming too scarce to economically turn three and four-year-old steers on the range. In order to cut down the time before marketing, it will be necessary to take better care of our calves so that they are kept constantly growing instead of lying weight and quality part of the time, so that they may be turned off as early as possible. Two-year-old silage offers a cheap wintering and growing ration when supplemented by alfalfa." The results of many experiments show that silage should constitute a large part of the ration for beef cattle if gains are to be made. It is a feed that is easy to feed, and it is a feed that will top the market is desired. It is safe to feed cattle all the silage they will eat, but the silage should be properly supplemented.

A recommended daily ration for the year for fattening animals for a 1000 pound steer, 25 pounds of Kaffir corn silage, 7 pounds of alfalfa and 10 pounds of Kaffir corn.

Silage, while a first-class feed, should be considered only as a roughage contributing a relatively small amount of dry matter. Many think when silage is fed that the concentrates are necessary when silage is fed. This is a mistake, as stock are better able to make use of grain feed when getting silage than when fed dry roughage.

The theory that silage-fed cattle shrink when shipped to market is sometimes greater, the fill taken at market is usually good, and if good judgment is used in preparing them for shipping the net shrinkage is no greater than for cattle which have been fed on dry feed. For 30 hours previous to shipping the silage-fed cattle should be substituted for the silage in the ration.

Silage for Sheep.
The Indiana station found silage extremely palatable as a winter feed for breeding ewes and young lambs. Silage-fed ewes gave birth to lambs one pound heavier than ewes receiving dry feed. A pen of breeding ewes at the Oklahoma station fed five pounds of silage each day and one-half pound of cottonseed meal were carried through the winter at a cost of 1.25 cents per day; animal nearly eight pounds per day at a cost of 3.3 cents per pound of gain. They dropped 28.5 lbs. and healthy lambs as a pen fed three pounds of alfalfa hay and one pound of corn chop each. The cost of feed per day with the alfalfa hay was 3.06 cents, while the rate of gain was slightly higher, the cost per pound of gain was 4.8 cents.

For fattening lambs, a goodly allowance of silage in the ration has also proved profitable. In comparison with cattle, the quantity of silage consumed per head is much less with sheep, and a heavy ration for sheep consists of 5 pounds of silage daily. In addition to the silage the concentrated part of the ration should be supplied at the rate of from 3 to 2 pounds per head per day, depending on the kind of sheep being fed and the purpose of feeding. In the average from 2 to 4 pounds of silage

LIVE STOCK AT THE EXPOSITION

The farmer or breeder who wants to see good stock, to hear about it, or to talk about it, will have the opportunity of his life to do so during the next two months at the exposition. No less than thirty-five livestock associations will hold meetings in San Francisco during October and November. Besides, the milk may receive some of the silage directly from the skin. On the other hand, if feeding is done subsequent to milking, the volatile silage odors will have been thrown off before the next milking hour. Silage is usually fed twice a day.

The National Live Stock Association of America, December 2. Any day is a good day to visit the livestock exhibits. There is always something interesting to see. The only difficulty is to get time to see all one wants to see. We went out to the grounds one day last week expecting to take a hasty glance at all the stock, but when we left at five o'clock had not even been inside some of the barns.

There are always many splendid animals in the horse barn, and the California exhibitors may well be proud of the showing they have made. Eastern and Ward have a fine show of Shires from the Blackhawk Farm at Burlington, Mass.; H. Thornberry of Stockton shows a line of gray geldings, saddle horses including Jack Barrymore, champion saddle horse of the world; the Hopland Stock farm shows a band of splendid Hungarian ponies; Edgar De Pue shows a fine lot of saddle horses from the Goodland and Mackay stud, H. J. Learmonth and the White Willow Stock farm of Stockton have creditable exhibits; and the Salvador Stock farm, at Napa, is showing some fine Shires; to say nothing of the sensational exhibit of Percherons by Anita Baldwin and the fine showing of Percheron stallions by Thos. McLaughlin, Dunham and McLaughlin of Oakland.

Every horse exhibited by Mrs. Baldwin took a prize, none of which was lower than third. McLaughlin's Mon, and grand champion over all ages of American bred Percheron stallions. Other California animals also won high places in the judging.

Belvins Brothers of Williams, California, had a fine showing of Jack and Jennies, included in which was a grand champion at the 1914 California state fair, and third at the P. P. E. First and second prizes for first outside of California, the first to Kansas City, owned by H. T. Hineman and Sons, Dighton Kansas, and the second to Belle Bay of the Grand Champion, of the Kingston Valley Farm, Southilton, Missouri. Al A. Merrill, of Wilhams, won a fourth with his Jack Frenchy. Other prizes also went to all these exhibitors.

Among other animals which every stockman will want to see are the Belgian stallion Percheron, Grand Champion, winner of eight P. P. E. ribbons, the Belgian Anna du Beiron, Grand Champion of the 1913 and 1914 Iowa state fairs, and the Clydesdale Charter Oak, 1915 Grand Champion of the Minnesota fair.

The decorations in the horse barns are the most elaborate ever seen at a fair or stock show. It is said that over twenty-five million dollars, in the case of the horse barn, are being expended in the decorations. In addition to painting, bunting, lattice work, etc., a great many potted plants and trees have been used.

There is a good show of poultry that is of great benefit to that industry on the coast.

Among coming livestock association meetings at San Francisco are the following: American Short Horn Breeders' Association, October 22. American Aberdeen Angus Breeders' Association, October 25. American Polled Cattle club of America, October 26. The Polled Durham Breeders' Association, October 26. American Milch Goat Record Association, November 3. American Poland China Record Association, November 3. American Hampshire Swine Record Association, November 6. American Hampshire Sheep Association, November 8. American Down Record Association, November 8.

American Duroc-Jersey Swine Breeders' Association, November 9. The National Duroc-Jersey Record Association, November 9. American Angora Goat Breeders' Association, November 9. O. L. C. Swine Breeders' Association, November 10. American Tamworth Swine Association, November 10. Northwest Angora Goat Association, November 11. Chester White Swine Record Association, November 11. American Shorthorn Registry Association, November 11.

Age may be considered as a daily feed of silage for sheep. For lambs, 1 to 3 pounds a day is usually fed. For breeding ewes, 2 to 3 pounds is the maximum. Silage for sheep should not be too acid.

Silage for Hogs.
F. W. Wolf of the University Farm School, says with regard to silage for hogs: "Silage from either Indian corn or sorghum or other crops is not especially adapted for feeding swine, for the reason that it is bulky, and these animals can not derive sufficient nutriment from the silage to make much gain. Silage, however, is used to some extent by swine breeders in different parts of the country, being fed in small quantities, and especially to brood sows. In this case it is used more as an appetizer and to regulate the system than for the nutriment it contains."

Dvorachek says: "For breeding stock, succulence is very valuable in the winter ration. Silage is too bulky to be fed to the nutriment to fatten hogs. Rich concentrates are necessary to put on a good finish in a short time."

Silage for Horses and Mules.
Circulate 72, of the Missouri station, sums up a series of investigations as to silage for horses and mules. The conclusions are that corn silage can be fed to horses and mules. It is a feed that is easy to feed, and it is a feed that will top the market is desired. It is safe to feed cattle all the silage they will eat, but the silage should be properly supplemented.

A recommended daily ration for the year for fattening animals for a 1000 pound steer, 25 pounds of Kaffir corn silage, 7 pounds of alfalfa and 10 pounds of Kaffir corn.

Silage, while a first-class feed, should be considered only as a roughage contributing a relatively small amount of dry matter. Many think when silage is fed that the concentrates are necessary when silage is fed. This is a mistake, as stock are better able to make use of grain feed when getting silage than when fed dry roughage.

The theory that silage-fed cattle shrink when shipped to market is sometimes greater, the fill taken at market is usually good, and if good judgment is used in preparing them for shipping the net shrinkage is no greater than for cattle which have been fed on dry feed. For 30 hours previous to shipping the silage-fed cattle should be substituted for the silage in the ration.

National Mohair Growers' Association, November 11. The National Pet Stock Association of America, December 2. Any day is a good day to visit the livestock exhibits. There is always something interesting to see. The only difficulty is to get time to see all one wants to see. We went out to the grounds one day last week expecting to take a hasty glance at all the stock, but when we left at five o'clock had not even been inside some of the barns.

E. ribbons, the Belgian Anna du Beiron, Grand Champion of the 1913 and 1914 Iowa state fairs, and the Clydesdale Charter Oak, 1915 Grand Champion of the Minnesota fair.

The decorations in the horse barns are the most elaborate ever seen at a fair or stock show. It is said that over twenty-five million dollars, in the case of the horse barn, are being expended in the decorations. In addition to painting, bunting, lattice work, etc., a great many potted plants and trees have been used.

There is a good show of poultry that is of great benefit to that industry on the coast.

Among coming livestock association meetings at San Francisco are the following: American Short Horn Breeders' Association, October 22. American Aberdeen Angus Breeders' Association, October 25. American Polled Cattle club of America, October 26. The Polled Durham Breeders' Association, October 26. American Milch Goat Record Association, November 3. American Poland China Record Association, November 3. American Hampshire Swine Record Association, November 6. American Hampshire Sheep Association, November 8. American Down Record Association, November 8.

American Duroc-Jersey Swine Breeders' Association, November 9. The National Duroc-Jersey Record Association, November 9. American Angora Goat Breeders' Association, November 9. O. L. C. Swine Breeders' Association, November 10. American Tamworth Swine Association, November 10. Northwest Angora Goat Association, November 11. Chester White Swine Record Association, November 11. American Shorthorn Registry Association, November 11.

Age may be considered as a daily feed of silage for sheep. For lambs, 1 to 3 pounds a day is usually fed. For breeding ewes, 2 to 3 pounds is the maximum. Silage for sheep should not be too acid.

Silage for Hogs.
F. W. Wolf of the University Farm School, says with regard to silage for hogs: "Silage from either Indian corn or sorghum or other crops is not especially adapted for feeding swine, for the reason that it is bulky, and these animals can not derive sufficient nutriment from the silage to make much gain. Silage, however, is used to some extent by swine breeders in different parts of the country, being fed in small quantities, and especially to brood sows. In this case it is used more as an appetizer and to regulate the system than for the nutriment it contains."

Dvorachek says: "For breeding stock, succulence is very valuable in the winter ration. Silage is too bulky to be fed to the nutriment to fatten hogs. Rich concentrates are necessary to put on a good finish in a short time."

Silage for Horses and Mules.
Circulate 72, of the Missouri station, sums up a series of investigations as to silage for horses and mules. The conclusions are that corn silage can be fed to horses and mules. It is a feed that is easy to feed, and it is a feed that will top the market is desired. It is safe to feed cattle all the silage they will eat, but the silage should be properly supplemented.

A recommended daily ration for the year for fattening animals for a 1000 pound steer, 25 pounds of Kaffir corn silage, 7 pounds of alfalfa and 10 pounds of Kaffir corn.

Silage, while a first-class feed, should be considered only as a roughage contributing a relatively small amount of dry matter. Many think when silage is fed that the concentrates are necessary when silage is fed. This is a mistake, as stock are better able to make use of grain feed when getting silage than when fed dry roughage.

The theory that silage-fed cattle shrink when shipped to market is sometimes greater, the fill taken at market is usually good, and if good judgment is used in preparing them for shipping the net shrinkage is no greater than for cattle which have been fed on dry feed. For 30 hours previous to shipping the silage-fed cattle should be substituted for the silage in the ration.

Age may be considered as a daily feed of silage for sheep. For lambs, 1 to 3 pounds a day is usually fed. For breeding ewes, 2 to 3 pounds is the maximum. Silage for sheep should not be too acid.

Silage for Hogs.
F. W. Wood Decay in Orchards

According to Professor W. T. Horne of the University of California, wood decay causes very serious losses in deciduous orchards in California. The best authorities agree that fifty or sixty years should not find a peach tree aged except by the entrance of decay into the wood. Yet, largely because of wood decay, the useful life of a peach tree in California is not half this period.

In circular 137 of the California Agricultural Experiment Station, which is just published, Professor Horne discusses wood decay at some length. We summarize below some of the principal points brought out:

It begins insidiously below dead areas and spreads extensively through the center of the tree, sometimes killing the branches but more frequently weakening them so that they break in times of unusual strain.

Decay of wood is not a natural result of old age or weakness, but is due to the action of wood-decaying fungi. The process of the destruction of wood by fungi is one of digestion and absorption. Where complete it leaves little besides ash, the chemical materials of the wood being split up and passing off as gases.

Infection evidently takes place through exposed wood and more specifically in large deep cracks. The oak root fungus forms and exception in that it is able to kill living bark and penetrate into the wood of saplings.

Fruit trees vary in their susceptibility to decay. The more resistant will doubtless grow for many years as hollow trees.

Statistics which have been gathered show that about 1 per cent of all bearing trees are infected with wood rot. The principal fruit regions all suffer but apparently those with hot and trying summers somewhat more than the cool coast.

Treatments for decaying trees must follow the structural methods and are probably too expensive for general orchard application. Prevention offers the most promise.

Squelching Squirrels.
It appears that the squirrel pest is increasing rather than decreasing under the campaign or lack of campaign which has been continued for the past few years.

While by the legislative act it is expressly made the duty of everyone having squirrels upon their places to immediately destroy same, the only penalty or remedy provided is through the petition of the board of supervisors, which may order the health officers to enter upon the same property and exterminate the same.

The state law is explicit in the matter but county supervisors have found it unsatisfactory to attempt to eradicate this pest. It is dangerous to combine the petition of the board of supervisors with the health officers to enter upon the same property and exterminate the same.

The state law is explicit in the matter but county supervisors have found it unsatisfactory to attempt to eradicate this pest. It is dangerous to combine the petition of the board of supervisors with the health officers to enter upon the same property and exterminate the same.

Boston Red Sox Even Score With Philadelphia Nationals

DOINGS OF THE VAN LOONS---At Any Rate, Mother's Guest Is Polite

By F. Leipziger

FAVORS OF FORTUNE SHIFT TO RED SOX LOSING PHILLIES SECOND GAME 2 TO 1

Pitcher Foster Measures Up Beyond All Expectations and Is Outstanding Star in Thrilling Contest—Smashes Hit in Ninth That Wins for Boston

PHILADELPHIA, Oct. 9.—The breaks of the game, those fickle favors of fortune that sway the pendulum of baseball fate, favored Boston today and tonight the red hosed champions of the American league and Philadelphia, pennant bearers of the National circuit were on their way to Boston with the honors of the 1915 world's series all at once.

President Woodrow Wilson and his fiancée, Mrs. Norman Galt, shared the honors of the second contest with a stoutly built young Boston pitcher, known to baseball fans as George Foster. Foster may never go down in history as an Alexander, a Walter Johnson, or a Christy Mathewson, but when the story of the second battle of the current series is filed away in the archives of the national pastime, it will be found that he did today what no other pitcher could have done. He pitched a perfect game, allowing only one run, one hit, and one error in nine innings.

Three base hits, to strike out eight of their best wielders of the willow, to make as many hits himself as he allowed the entire opposition, including a stinging smash in the ninth that sent Gardner across the plate with the winning Boston run in addition to these meager activities in the box, young Foster sped to first base a couple of times and took throws from his fellow fielders that turned two screaming errors into sensational outs.

Mr. Foster on the field, and Mr. Wilson in the stand were the heroes of the day. Foster won by 2 to 1. The President had a wider margin, for the more than 20,000 baseball enthusiasts crowded in the friendly little Philly park were on their feet for and with Mr. Wilson time after time. They greeted him with cheers when he came and forgot the sting of defeat to send him on his way to Washington with shouts that echoed for blocks around. Mr. Galt was greatly admired by the baseball throngs and was smilingly happy over the attentions showered upon her.

SCORE BY INNINGS

Boston	100 000 001—3
Philadelphia	000 010 000—1

SUMMARY

Two-base hit—Foster. Cravath. Ludrus. Earned runs—Boston, 1; Philadelphia, 1. Left on bases—Boston, 8; Philadelphia, 2. Bases on balls—Off Foster, 2. Struck out—By Foster, 8; by Blayer, 1. Umpires—At plate, Eicher; on bases, Evans; left field, O'Loughlin; right field, Klein. Time, 2:05.

There was also a wonderful difference in the effect of today's play on the crowd. Yesterday there was a lack of excitement which kept the throng in an attitude of indifference most of the time, whereas, today the "Philly Phans" were kept in a state of high excitement by the wonderful play. The roosters aggressively followed each play and at times their applause was almost as generously bestowed upon a visiting player as upon the heroes of the home team.

Gardner and Speaker and Foster of the home team.

Eleven Thousand See Chicago Americans Win From Nationals

CHICAGO, Oct. 9.—The Chicago Americans shut out the local Nationals, 5 to 0 today, and made the series stand 3 to 1 in their favor. John Collins proved to be the hero of the day. He clouted a home run to left with the bases filled in the third, just after Vaughn had walked a man and forced a run across the plate.

The total paid attendance was 11,000; receipts \$2,781.25; National commission's share \$375.12; players share \$4,741.87, and each club's share was \$1,581.88.

Today's game was the fourth of the series, and the last one in which the players share in the receipts. The player's pool amounts to \$15,513.75. This amount will be divided 60 per cent to the winners and 40 per cent to the losers.

Americans 005 000 000—5 10 0
Nationals 000 000 000—0 4 0
Batteries—Scott and Schalk; Vaughn, Adams and Archer.

National commission's share \$3,202.09.
Players' share, \$28,095.66.

SEALS UP ANOTHER NOTCH TOWARD CHAMPIONSHIP FOR 1915

San Francisco Defeats Vernon 4 to 1
While Angels Lose in South—
Hitt Yields 12 Safeties

SAN FRANCISCO, Oct. 9.—San Francisco drew a notch nearer the 1915 championship today by defeating Vernon, 4 to 1, while Los Angeles, now in second position, was trounced by Oakland in the south. Hitt yielded an even dozen of safeties to the Seals, four of them bunched in the first inning, resulting in two runs, enough to win. Vernon's eleven bingles were kept well scattered by Steen, Seaver.

Eddie Burns to Marry California Girl at Close of World's Series

SAN FRANCISCO, Oct. 9.—Eddie Burns, catcher for the Philadelphia team of the National Baseball League in the world's series, is to marry Miss Viola Laporte of Monterey, Cal., immediately after the close of the series. It became known here today.

Miss Laporte is a descendant of the early Spanish founders of Monterey. Burns learned his baseball on the sand lots of San Francisco.

Cardinal Coaches Pleased With Form Players Are Showing

Santa Clara Is Looming Up As Serious
Rival for Stanford in "Big Game"
—Best Team in History

SAN FRANCISCO, Oct. 9.—Stanford University's decisive victory over the Olympic club Rugby team last Saturday has heartened the student body. The first game between the two teams resulted in a scoreless tie, the showing of the varsity fifteen being anything but encouraging.

During the last week, however, the Cardinal players have regained much of their last year's form, and swing and from now on the coaches are looking for steady improvement.

Santa Clara, which superceded the University of California as Stanford's rival in the "big game," is said to have one of the strongest combinations in its history and is being seriously considered as a factor when the two teams line up.

FULLBACK SHARPE SCORES TOUCHDOWN AND CALIFORNIA WINS

University Eleven Kept On Defensive
Greater Part of Game By
Oakland Originals

BERKELEY, Oct. 9.—Dogged, defensive grit, with flashes of aggressiveness, won today for the University of California at American college football, 7 to 0, from the Originals of Oakland. Sharpe, at fullback, distinguished himself in his running and kicking and with the aid of Brooks, left halfback, scored the winning touchdown in the second period.

California was stubbornly defending its territory the greater part of the play, save for the second period and part of the fourth when, in the latter the Blue and Gold men's attack was nullified by continued penalties inflicted because Charles Vay, California's trainer, persisted in intruding on the playing field.

Earlier in the day the University of California freshmen team and the Sacramento Athletic Club played a scoreless tie. The game was featured by halfback play and was replete with fumbles.

WISCONSIN SCORES 25 TO 0.
MADISON, Wis., Oct. 9.—Marquette played easy for Wisconsin today and the Badgers ran up a score of 25 to 0, the largest count ever made by a Wisconsin eleven.

THIRTY-TWO TENNIS MEN ENTER FOR PLAY IN TOURNAMENT

Many Younger Players Will Compete
With Older Stars—Savage and Cobb
Picked to Meet in Single Finals

Thirty-two contenders for honors in the Fresno County Tennis Championship tournament which will be started at the opening games tomorrow evening, had registered with the Fresno Tennis Association when the entry list was closed at noon yesterday. All the old stars and champions are listed for the 1915 play and quite a number of the younger tennis men of Fresno announced themselves.

A. O. Warner, H. A. Savage and Frank Hanna, members of the Fresno Tennis Association will meet at the Commercial at 3 o'clock this afternoon to arrange the playing schedule and also to make arrangements for placing the double entries. Clyde L. Smith will be actively in charge of the event. The tennis games probably will extend through the coming two weeks.

Savage and Cobb are stars. Pairings for the preliminaries were announced yesterday. The two principal contenders for the final in singles are said to be H. A. Savage and Lee Cobb. Savage was one of Cobb's most serious contenders in the 1914 event and won the Fresno City Championship Title. Savage is a product of the college tennis courts and has played with many of the present day intercollegiate stars. Savage played at Harvard and won his letter and a place on the Varsity team at the University of California.

Cobb has a hold on the Bonadici (Cuba) prize by winning the 1914 singles and will be awarded the trophy if he comes through successful again this year. Cobb has been playing with Southern California tennis men for the past season and is in fine form for the contests on the local courts. Cobb's home is in Sanger.

Strong Double Entries

Local tennis fans predict there are several pairs in the field that will give A. O. Warner and Archie Jack, holders of the doubles titles, a hard run. Among those who are slated for a try in the finals is the team of "University" and "Redwood" professors of the State Normal School who are showing fine form in practice work-outs. Savage and Cobb will no doubt get a place on the finals.

Elliot R. Bradley is one of the local players who has a lot of experience that should put him in good stead in the coming play. Bradley is a member of the Golden Gate Tennis Club and has played in a number of San Francisco meets.

The pairing for the preliminary play are as follows: H. L. Maupin, Jr. and H. O. Savage; H. M. King and Dr. H. W. Sorenson; D. C. Avery and Sig. Levy; C. R. Adams and John Costes; R. O. Simon and Clyde L. Smith; A. O. Warner and Ed. Huggins; H. L. Ellithorpe and Conrad Warner; Norval Redford and C. E. Jolley; George McKinley and Cleave Leaf; H. W. Edwards and L. Wright; Elliot R. Bradley and Newton Bramblett; Archie Cunningham and H. B. Laid; Archie Jack and R. J. Bouthel; Lee Cobb and R. P. Feichlin; J. B. Close and J. W. Warner.

SALT LAKE TAKES SEESAW GAME FROM PORTLAND SCORE 8 TO 7

Munsell Is Driven From Box and
Superseded By Williams—Pitcher
Lush Hits Home Run

SALT LAKE CITY, Oct. 9.—Salt Lake defeated Portland here today, 8 to 7. The game was a seesaw affair and after Munsell had been driven from the box, Williams took the mound and hit the victors until the ninth, when they reared, but fell one short. Pitcher Johnny Lush hit a home run in the second inning.

SCORE BY INNINGS

Portland	000 000 000—0
Salt Lake	000 000 000—8

SUMMARY

Errors: Dierick, 1; Berck, 1; Kauter, 1; Ryan, 2; Zacher, 1. Home run: Lush. Sacrifice hit: Zacher. Stolen bases: Berck, Ryan, Ryan on bases. Lush, 1; Munsell, 1; Williams, 1. Struck out: Lush, 1; Williams, 7; Lush, 13 at bat off Munsell in 3 innings; two runs, 7 hits, 25 at bat off Williams in 5 innings. Runs responsible for: Lush, 7; Munsell, 4; Williams, 1. Credit victory to Williams. Left on bases: Portland, 7; Salt Lake, 8. Wild pitch: Lush, 2. Double play: Gudrun to Hitt to Lush. Hit by pitcher to Hitt. Caught by Ruff. Time, 1:55. Umpires: Hitt and Gudrun.

GIL ANDERSON IN NEW RECORD FOR AUTO SPEED

Racer Averages 102.6 Miles An Hour In 250-Mile Contest For Astor Cup

NEW YORK, Oct. 9.—A new world's record in automobile speed was made today when Gil Anderson, of the new Springfield Ray speedster, driving at the average rate of 102.6 miles an hour, won the 250-mile automobile race for the Astor cup and \$50,000 in prizes. His time was 2 hours, 21 minutes and 42 seconds, making a world's record by ten minutes, 42 seconds.

Terrific speed characterized the race throughout. Twenty of the speediest automobiles in the world had entered but more than half the drivers were forced out by engine trouble. The weather was ideal. Both Anderson and Rooney, who finished second, beat the former world's record.

After Anderson, the finishers were: Tom Rooney, second 3:25:28, beat the former world's record of 3:25:28, average speed 101.19 miles an hour. Ed O'Donnell, third, 3:58:55, fifteen minutes and 13 seconds behind Anderson, average speed 94.45 miles an hour. Cooper Out Early.

Earl Cooper was forced out at the 48th mile by a broken valve. Barney Oldfield was forced out of the race on the 14th mile on account of a broken piston rod. An accident also forced Mulford out at the end of 16 miles.

At 100 miles, Reia was leading, his time being 37 minutes, 26 seconds, an average of 104.47 miles an hour. Rooney was second and Anderson third.

Reia was forced to drop out of the race by a broken connecting rod shortly after finishing the first 100 miles.

The officials announced at the end of 100 miles that Anderson, who was leading, was many seconds ahead of the world's record for cars of 400 cubic inches engine capacity.

Vall, who was replaced by Bergdall, was forced to retire because he was overcooled by fumes from the castor oil used for lubrication.

At the 20th mile Burman, Anderson and Rooney were tied. Their time was 2:34:14, a new world's record.

De Palma dropped out at the 20th mile on account of engine trouble. He was then fifth in the race.

The following are the numbers, drivers and cars entered:

No.	Driver	Car
1.	Dustin	Peugeot
2.	Altkin	Peugeot
3.	Oldfield	Dodge
4.	Burman	Dodge
5.	Anderson	Stutz
6.	Wiley	Peugeot

14.	Haupt	Duesenberg
15.	Henderson	Duesenberg
16.	Pullen	Maxwell
17.	Mulford	Peugeot
18.	Lenberg	Delage
19.	De Palma	Stutz
20.	Alley	Ogre

Madera Tigers to Play H. S. Eleven Sunday

MADERA, Oct. 9.—The Madera Tigers are rapidly rounding into shape for the 1915 football season. Hard practice is had in every night. The team that will meet the Madera high school Sunday afternoon at the ball grounds at 2:30 will be selected from the following players: Koonce, T. Smith, Owens, Ferritt, A. Smith, Britton, Dixon, Shima, W. Smith, Franchi, Brammer, W. Schmitz and Roy Scott.

A dance will be given Saturday, Oct. 16, to defray the expenses of uniforms, Fresno, Coalinga and St. Mary's have already been heard from and in order to complete the schedule Captain Franchi would like to hear from any teams in the valley wishing games.

Athletes of Sonora H. S. Start Practice

SONORA, Oct. 9.—Athletic teams of the Sonora high school are being organized and training will begin soon. The first important event, it is expected will be when the best athletes will be sent to Fresno in the spring to compete at the track meet. If they make good there it is promised that they will have a chance to try for honors at the university meet at Berkeley, where last year several Tuolumne athletes proved their merit.

Maxwell Motor Cars

Best Treatment for Catarrh S. S. S. Removes the Cause

Specialists in Catarrh troubles have agreed that it is an infection of the blood. The laboratories of the S. S. S. Co., at Atlanta, have proven it. Once you get your blood free from impurities—cleansed of the Catarrh poison, which it is now a prey to because of its unhealthy state—then you will be relieved of Catarrh—the dripping in the throat, hawking and spitting, raw sores in the nostrils, and the disagreeable head and breath. It was caused, in the first place, because your impure blood was easily infected. Secondly, a slight cold or contact with someone who had a cold. But the point is—don't suffer with Catarrh—it is not necessary. The remedy E. S. S. discovered over fifty years ago, tested, true and tried, is always obtainable at any drug store. Get S. S. S. at once and begin treatment. If you are in a long standing case, be sure to write the S. S. S. Co., Atlanta, Ga., for free expert medical advice. They will tell you how this purely vegetable blood tonic cleanses the impurities from the blood by literally washing it clean. They will prove to you that thousands of sufferers from Catarrh, after consistent treatment with S. S. S., have been freed from the trouble and all its disagreeable features and restored to perfect health and vigor. Don't delay the treatment. Take S. S. S. at once.

World's Champion Racing Dogs On Way to War

SEATTLE, Oct. 9.—One hundred and six dogs, including seven from the Allan Darling world's champion racing team arrived from Nome today on the steamship Senator, on the way to France for Abnath service in the war. The dogs were accompanied by Lieutenant Bass of the French army and A. A. Allan, noted trainer of dogs. The Senator brought also \$50,000 in gold bullion from the Nome placer mines.

COOPER'S 20-FOOT LEAD WAS WORTH \$20,000 AT MINNEAPOLIS

Story of Fresno Racer's Exciting Contest With Teammate He Didn't Recognize, Is Learned

The story of how Earl Cooper impeded to drive the race of his team over the finish line at the Minneapolis races just twenty feet ahead of his teammate, Gil Anderson, has just been learned.

It seems that the concrete track at Minneapolis had a great many undulations or waves which caused the cars and drivers so severely that they were unable to drive without relief. Forward of Cooper's car was a mile and a half, when Cooper was taking a brief respite and had turned his car over to a relief driver, he was sitting in the fifth place, relaxing. Harry Stutz was discussing with some one else whether Anderson's car was an ahead of Cooper's or not, and calling up the judge's stand it was decided they were both on the same place. Cooper learned that he had only three seconds to gain and maintain if he would win the race, and when he stepped into his car a few moments later, he started out after Anderson as a terrific pace. It was not until he was abreast of the other Stutz, that Anderson realized that something was not fore so well, and Eddie O'Donnell on his last lap drove with his left hand, and with his right arm held up his mechanical. He had fainted dead away—the grunting, bounding strain had been too much for him.

One of the features of the race was the presence of the changes by the three winners, despite the unusually severe conditions. Cooper was forced to change his car five in the five hundred miles, Anderson but three, and Eddie O'Donnell, who finished third, did not change at all.

Had it not been for the rough track, and the fact that he needed relief, Cooper would probably have let Anderson win the race. Other drivers did not fare so well, and Eddie O'Donnell on his last lap drove with his left hand, and with his right arm held up his mechanical. He had fainted dead away—the grunting, bounding strain had been too much for him.

Motorcyclists to Ride to Smith Mountain

Members of the Fresno County Motorcycle club and their friends will start their social trip to Smith Mountain above Sultana at 5 o'clock this morning. The riders will meet at the courthouse fountain.

The forty mile trip will be by way of Fowler, Parlier, Reedley, Dinuba and Sultana. Parlier will be served at Dinuba at 11 o'clock. A program of novelty races, a tug of war and a hill climbing contest will be held at the destination.

Lemoore Cubs to Play Jacob's Cowboys Today

LEMOORE, Oct. 9.—The Lemoore Cubs and Jacob's Cow Boys will clash today for the second time, the Cubs having won the first game by the score of 3 to 4. The Cubs are coming back with a stronger lineup and an imported battery, also a prize of \$25.00 on the side for winners.

Battery for Cubs will be Miller and Wright for Cow Boys: Wight and Cubes.

PENN. STATE WINS

PHILADELPHIA, Oct. 9.—A forty-yard run by Berryman through the entire Pennsylvania team and a successful forward pass to Higgins, who ran 25 yards to the Pennsylvania goal gave Pennsylvania State College, the touchdown in the third period of the game with the University of Pennsylvania here today and enabled State to win 13 to 2.

WEST SIDE DUCK SHOOTING AS IN FORMER YEARS

Passing of Swamps Followed By Disbanding of Gun Clubs—Coming Season Will Be Quiet

LOS ANGELES, October 9.—When the season opens for the shooting of ducks on October 15 the usual local interest will not be manifest. In fact the day has just with only a place and manner, when the vast slabs of the San Joaquin valley dried, hundreds of sportsmen to its advantage. From all parts of the state with dogs and guns in quest of the waterfowl, they came. The swamps which afforded landing grounds for those hundreds of birds in bygone years are no more.

The various gun clubs that lasted many seasons have disbanded, some moving to other parts with the exception of the Los Banos gun club, composed of wealthy citizens of San Francisco. This club is expected to hold a lease which expires next year. Fields and farms have taken the place of swamps. Several canals have been put through these lands to carry the water for irrigating purposes, also fences and cross fences are in course of construction. Notices in regard to these places have been posted warning the sportsmen of "trespassing."

Even the "Wear Valley" that has gained a livelihood three-fourths of the year for a quarter century tramping from one ranch to another, are confronted with the placard, "no trespassing" and instead of their usual tramp and coffee.

There is still remaining vast territory for ducks to alight, but owing to the lack of water, it is thought their stay will be short, so far as game is concerned. The warning notices likely giving a like impression to the sportsmen.

FOSTER HITS 750
Foster tonight had an average of 150 for four times up. When he first hit 150, the Boston pitcher immediately shifted his position and threw a ball at a fast one and slammed it high up against the right field wall for the first extra base hit of the series. In the sixth Foster shot a single to center. In the ninth, with Gardner on second and the score a tie, he slammed a home run, his first of the season, to second when Fisk made a futile effort to cut off the winning run at the plate.

It was a hard hitting game on both sides, but the Sox got the breaks and their pitcher, after the Phils' batter hit ball after ball with a smashing force that ordinarily would land them in the base hit column, but the drives went within the reach of the fast Boston outfield and the local players were turned back to their benches.

In the fifth inning it looked very much as if the Philadelphia players were going to bat out a victory. "Gravy" Gravano laid into one and sent it whizzing down the left field foul line to about the level of the foul line, where it was caught by a fast thrower in deep center and Gravano scored. The best Whitford could do, however, was an infield out from short to first, which advanced Ludger to third.

Vigorous Rally in Fifth
With one out, the infield came in to protect the plate and here stepped in one of the breaks that influenced the result. Nibhoff caught a fast one from Foster square on his bag and the fans roared as it sped away on a line only to smash with a "rip" into the hat of Boston's big guardian of the first bag, one Hoblitzel. This play took all the steam from the Phils' attack and Burns dashed the fast fading hopes of the fans on the rocks by swinging his life away on three runs. Burns was not out, but he did hit the ball that he could not find it at all.

Mayer justified the confidence placed in him by Manager Pat Moran. He was calm and at all times he held the Boston attack well in hand. He struck out seven men and allowed but two bases on balls.

The fact that President Wilson and Mrs. Galt were to witness today's game gave an unusual air of excitement to the preliminary game. The crowd at Boston was very early and had the Presidential box, which with the national and city colors, it was just after 2 o'clock, time for play to be called, that a shout from the park gave the signal that the President and his party were on their way. Mrs. Galt just behind him, Mrs. Galt was quickly recognized by the crowd and had to join the President in acknowledging the tribute of the throng.

Mrs. Galt Center of Interest
Invaded the playing field to get a close view of the next first ball of the game, and there was some little difficulty in clearing the diamond before the game could begin.

For some time, as units, and the players as individuals, gave an exhibition of real world's series baseball today and left nothing to be desired in the skillful handling of the sphere and correct judgment in the field and on the bases.

FAVORS OF FORTUNE SHIFT TO RED SOX SECOND GAME 2 TO 1

Continued from Page 24
The Red Sox, and Bancroft, Whitford and Stock of the Phils, seemed to be all over the playing field when their presence was most sorely needed in their fighting play tonight. Spectacular response from the spectators, heaped in stands and bleachers.

Mayer Checks Speaker
Manager Pat Moran of the Phils placed his faith today in Leskue Mayer, the Chicagoan, understanding that he was a far better game than the detailed score will show. Although he allowed more than three times the number of hits registered after he was removed from duty, and kept the fence wreathers of the Red Sox crew batting pop flies most of the way. Three times this Speaker had the good fortune to lead off for the Sox, but each time he was held in check by the Boston pitcher.

Take the pitcher's chest and check by the Sox infielder. This was not the entire battle record for this, however, for in the first inning he shot a scorching double to right which sent Foster from first to third, and was home for the first hit of the game.

Foster Hits 750
Foster tonight had an average of 150 for four times up. When he first hit 150, the Boston pitcher immediately shifted his position and threw a ball at a fast one and slammed it high up against the right field wall for the first extra base hit of the series. In the sixth Foster shot a single to center. In the ninth, with Gardner on second and the score a tie, he slammed a home run, his first of the season, to second when Fisk made a futile effort to cut off the winning run at the plate.

It was a hard hitting game on both sides, but the Sox got the breaks and their pitcher, after the Phils' batter hit ball after ball with a smashing force that ordinarily would land them in the base hit column, but the drives went within the reach of the fast Boston outfield and the local players were turned back to their benches.

In the fifth inning it looked very much as if the Philadelphia players were going to bat out a victory. "Gravy" Gravano laid into one and sent it whizzing down the left field foul line to about the level of the foul line, where it was caught by a fast thrower in deep center and Gravano scored. The best Whitford could do, however, was an infield out from short to first, which advanced Ludger to third.

Vigorous Rally in Fifth
With one out, the infield came in to protect the plate and here stepped in one of the breaks that influenced the result. Nibhoff caught a fast one from Foster square on his bag and the fans roared as it sped away on a line only to smash with a "rip" into the hat of Boston's big guardian of the first bag, one Hoblitzel. This play took all the steam from the Phils' attack and Burns dashed the fast fading hopes of the fans on the rocks by swinging his life away on three runs. Burns was not out, but he did hit the ball that he could not find it at all.

Mayer justified the confidence placed in him by Manager Pat Moran. He was calm and at all times he held the Boston attack well in hand. He struck out seven men and allowed but two bases on balls.

The fact that President Wilson and Mrs. Galt were to witness today's game gave an unusual air of excitement to the preliminary game. FOUR RUGBY VICTORIES FOR STANFORD TEAMS IN YESTERDAY'S PLAY

Varsity Squad Trounces San Francisco Barbarians 80 to 3—Freshmen Win From Berkeley H. S.

STANFORD UNIVERSITY, Oct. 9.—Five Rugby games were contested here today by the star teams of Stanford University, four of which were victories for the wearers of the Cardinal.

The Varsity team fairly routed away from the Barbarians, of San Francisco, the final score being 80 to 3. The freshmen team, having the better of weight, won a closely contested match from Berkeley High school, and the third Varsity took the Oakland Technical school into camp, 11 to 0.

Promont High School, of Oakland defeated the fourth Varsity, 11 to 0.

The most exciting game of the day was between the second Varsity players and St. Ignace college. Time was called with ten minutes still to play, on account of darkness. The score was 2 to 0 in favor of Stanford.

Princeton Field Goal Wins From Syracuse

PRINCETON, N. J., Oct. 9.—Princeton defeated Syracuse today, 1 to 0. Shortly after the beginning of the third quarter, Tibbott kicked a field goal from the 32-yard line. The visitors were stronger than was anticipated, but Princeton's defense stood firm. Forward passing marked the game.

Bitterly Contested Game Won By Yale 7 to 6

NEW HAVEN, Conn., Oct. 9.—Yale defeated the powerful Lehigh eleven today, 7 to 6 in one of the most bitterly contested football games seen here in years. The visitors' scores came through two field goals by Cahill. Lehigh gained ground almost at will by brilliant forward passing and long runs.

Chenoweth of Lehigh fractured his ankle in a scrimmage. Several Yale players left the game on account of injuries.

Harvard Wins Easily From Carlisle Indians

CAMBRIDGE, Mass., Oct. 9.—Harvard scored a comparatively easy victory over the Carlisle Indians today, rolling up 29 points in three periods on fast work by the backs. In the first period, with a number of substitutions in the Crimson line, the Indians rushed the ball 80 yards on land forward passes and line plunges, for their only score.

Forward Pass Features Cornell Victory 46-6

ITHACA, N. Y., Oct. 9.—Cornell outwheeled and outplayed Williams today, and the New Englanders were defeated, 46 to 6. The game was played in a pouring rain. Williams made its only score in the second period after a 40-yard pass by Pollard and a long forward pass.

St. Louis Browns Win Two From Cardinals

ST. LOUIS, Oct. 9.—The American took a doubleheader from the Nationals here today, 5 to 1 and 5 to 2, bringing the total of their victories of the series thus far to three, while the Nationals have succeeded only in tying one game and have won none. Turlock Athletic Club New Organization to Hold Boxing Contests

TURLOCK, Oct. 9.—Steps have been taken by about 35 young men of this city who are interested in boxing and other athletic sports to organize the "Turlock Athletic Club." A meeting will be held next Tuesday night to perfect the organization by the election of officers, and to discuss the details of the club, which will be held in the Sallis addition, just outside the city limits, and it will be fully equipped with athletic paraphernalia. A swimming pool is also contemplated.

The club is being organized for boxing contests, which will be conducted in strict conformity to the state laws governing such sports, and it is planned to engage some of the "top notches" from the Bay Cities for the boxing events. It is expected that the club will be completed and ready for use by November 1. Among those taking an active part in promoting the club are William Whitaker, Frank H. Howard, J. E. Williams, George P. Huber, Al Hollin, George Johnson, Ray Shelton, Homer Holt and Carl Andre.

PRESS CRITICISM ANGRERS ARMY MEN

Morale at Front Is Being Injured Declare Munition Workers

LONDON, Oct. 9, 1915. A party of munition workers visited the British club in Flanders accompanied by the Parliamentary under secretary for home affairs, William Bruce, say in their report.

"There is bitter and widespread resentment among the officers and men at the front at the constant appearance in certain newspapers of articles disparaging the efforts this country is making. The men who have endured and are enduring the worst hardships and are campaigning with positive cheerfulness, and what they are doing out there and what the civil population is doing at home to carry on the war."

Concerning munitions, the conclusions are thus summed up:

"The supply of shells must not be merely liberal, but unlimited."

"As regards the German position in this respect, we were repeatedly told, and could also be for ourselves, that their expenditure of shells was out of all proportion to ourselves. Their supply must be cut off."

"The necessity for doing the best possible in all departments of munition works is emphasized."

MUST DANCE UP TO STANDARD

Dance according to the standard rules be blacklisted.

That's the new order the Philadelphia dancing masters are considering as a means of elevating the business of teaching dances. Thirty of them, assembled in Students' chamber hall, last night, and Joseph Tannelli, principal of the dancers' journal school department of the association, advised the blacklisting of any person or persons found disobeying the rules on any of the city dance floors. Here are the rules unanimously adopted:

"Thorough all exhibition, kicks and open movements."

"Return to simplicity in all formations. Only the most correct positions will be tolerated, and feet must remain on the floor."

"In the positions in dancing will not be tolerated in any of the dancing schools of the city. From the Philadelphia North-American."

BIG SHIP RUNS DOWN SCHOONER; ALL SAFE

NEW HAVEN, Conn., Oct. 9.—According to a wireless report received here this morning by the New York, New Haven & Hartford railroad, the South River Tonnage ran down a small schooner in the Race off Fishers Island at 11 o'clock last night. The passengers of the Tennessee were removed to the steamer Concord, which proceeded to New York. No lives were lost, so far as known.

FASHION'S LATEST WORD IN SMART CREATIONS

BY FRANCES MARSHALL

What About the Winter Suits and Coats?

Flaring Skirts and Flaring Coats, High Collars and Long Sleeves, Much Fur Trimming and a Straight Carriage.

The women of New York are wearing high collars and assuming a military carriage. These two details have not yet reached all the other fashion centers of the United States, but they are on their way. Before winter fairly sets in the collarless frock for the street and the carriage that is still reminiscent of the debutante slouch will be things of the past. The collarless effect will be decidedly out of fashion this winter. So whatever else you do or don't do in remodeling your old suit, be sure to put a high collar on it. In Washington and many of the other smaller cities last winter the models that came in with high collars had to be remodeled with low collars, because the people didn't like them. This year the high collar will be accepted everywhere.

The military carriage that is becoming fashionable is in part due to the high collar. For the high collar and the straight shoulders below it demand that the woman wearing them hold herself as straight and erect as possible. The models and mannequins who wore the new suits before the buyers this autumn had adopted this military carriage, and the women who buy the suits will have to do likewise. This new upright carriage is by no means an unnatural or strained posture. But it is decidedly different from the curved posture of a year ago.

The buyers are thanking their stars for such color as there is in the autumn suits. They got tired of blues and blacks. Of course they know that these colors are most serviceable and that they usually look smart, but they long within their hearts for a season when bright red, golden brown, sapphire blue and old rose suits will be in high favor.

This season the somber colors lead. African brown, dark green, plum and the ever-demand black and blue. But probably as the season advances the colors that smite the eye will become more acceptable—

and then the buyers of suits for the retail trade and the saleswomen who sell them will be happy. For to every one suit of other colors they sell six of blue and perhaps three of black. It is a gala day indeed when they sell one of the festive-colored suits. This season dark brown will doubtless have a little more vogue than it has ever had before. Smartly dressed women are beginning to realize that the color known as African brown is a good substitute for the honored black and blue—navy blue, raven blue, crow blue or midnight blue, that is almost black.

Beware, if You Are Pale and Thin. It will be a trying season for the pale, thin-faced woman. So get all the outdoor exercise you can and don't let yourself grow thin. For the high collar of her or braid directly against the face looks best when the cheeks are a little plump, and neither pale nor wallow. There

will be little opportunity for the relieving touch of white that we have had for several previous seasons. The collar of the blouse will not show over the top of the coat collar, and even if it did, even the collar of the blouse will frequently be dark. After all, the suits of this coming winter are to be about as nearly sensible as suits could be. Listen to a category of their good points and then say at your peril that fashions are leading women to extremes: Collars are to cover the throat and chest and yet are to be so made that they can be turned down when protection is not needed. Skirts are to flare comfortably, but are not to be excessively wide—about two and a half yards at the bottom will be average. Skirts are short. How short? The newest models are sixteen inches from the ground, but in few cities save New York will they be worn so short. A clever Washington buyer said sixteen inches in New York meant about an inch and a half in

Washington, or in any other city of its size. And apropos of this, the French women themselves do not wear such excessively short skirts as do the New York women. And with their short skirts, the French women wear high boots, that almost meet them. The sight of a woman in New York with low shoes and at least eight inches of stocking above it showing is not at all unusual—and not at all French in inspiration. The coats of the autumn cover the hips but they flare, and do not restrict easy walking. The waistlines are semi-fitted. The prediction for tight-fitting coats has not yet been fulfilled and probably will not be this winter.

There is quite a flare below the hips, and the fulness about the waist is only lightly belted in, in most cases. The semi-fitting waistline is still in vogue.

As for sleeves, they are long, neither tight nor full. They are made with fairly long cuffs, fitting well down over the wrists, to protect them from cold.

Now the dress reformer who wants to make out a case against the prevailing mode will have to look somewhere beside in the suit department. It is an easy matter to buy ready-made coat suits this year, for from their very build these suits fit most persons and are becoming to most persons. Out-of-town buyers know that the women of the smaller fashion centers demand better material than most New York women wish in ready-made suits. So they buy suits in good material. And as each buyer knows the peculiarities of the women of her own region, she buys especially for them—buys fashionable clothes just enough modified to give greatest satisfaction to her clientele. That is why women can buy smart and serviceable suits ready made.

Rose satin frock, with bands of black and white, the bands catching up the skirt.

Serge frock, trimmed with bands, Tete de negre serge, cut on semi-sleeves and vest of striped taffeta. princess lines.

Velvet frock of burgundy red.

Taffeta and lace flowers, with silk flowers applied on the bodice.

Velvet coat suit, with fur trimming. Notice the fur-topped boots and the flaring coat, longer at one side than at the other.

Black velvet coat, trimmed with white fur, open at the waist.

Hat of black velvet which shows the influence of a German military model.

Black velvet coat, with leather belt. The walking skirt of brown cloth is circular in cut, fastened with big pearl buttons down the front. The brown felt hat is trimmed with a black velvet band.

Work and Play in the Household

EDITED BY
FRANCES MARSHALL

Flowers in the House At Very Small Cost

Every Woman Can Work Out a Plan for Providing Inexpensive Flowers.

Every housewife realizes the decorative value of flowers about the house, and often looks longingly at the florist's windows as she passes them, wishing that she might put in orders for roses or carnations, at regular intervals, to keep the house fresh and springlike.

Some women, who have a knack for raising flowers in the house and sun-dial windows, where the flowers can get plenty of heat and light and air, can have blossoms all winter long if they care to take the trouble to do so. But small quarters and the lack of time to care for plants make it impossible for many flower-loving housewives to have shelves of flowering geraniums or fuchsias always at their command.

Evergreens.

Instead of using artificial flowers—which, at best, are poor imitations, and collect dust—why not work out several schemes for keeping the house supplied with something fresh and green at very small cost?

A trip to the woods is the best way to accomplish this plan. Small evergreen trees, two or three feet high, can be pulled up or dug up, and, if planted in a jardiniere full of sand, and kept slightly moistened, will stay fresh and green for three or four months.

Boughs and branches of laurel and balsam, kept in fresh water, will also stay green for a long time. Small twigs of balsam, of symmetrical shape, make a very attractive table centerpiece which will keep for at least three or four weeks.

Fish Globe Flowers.

Bulbs, of course, can be grown in a variety of ways in the house—in water, in moss or in earth—but the fact that it takes them so many weeks to grow roots and then so many more weeks to come to blossoming time makes them rather unsatisfactory for anything but an early spring show of color. However, a glass fish globe can be used for forcing tulips. The globe should be of good size—ten or twelve inches high—and requires the outlay of perhaps 25 cents or \$1. But it can be used year after year. A piece of nine-inch glass should be cut to fit snugly over the top of the globe. Moss and earth from the woods—rich and loamy—should be put in the bottom of the globe and the bulbs planted in this. The earth should be well moistened, the globe covered, and placed in the sunshine. The cover should be left on all the time, and probably no additional moisture will be needed for the earth, for as the moisture rises it is condensed on the sides and top of the globe and returns again to the earth.

One housewife had lilacs of the valley in blossom two weeks after planting them in a globe of this kind. After that, she went to the woods for hepaticas and planted them in a globe of the same kind. She kept her fish globe full of flowers by planting one sort of bulb after another all winter long.

Another way to have flowers in the house throughout the winter without spending a really big amount of money for them, is to plan to spend a certain amount weekly. It can be anything from 25 cents to several dollars. But 25 cents will give worth-while returns.

For the first few weeks buy substantial things, things that will give a background of green for several weeks. A fern the first week, as big as you can get for a quarter, would be a good investment. Then you could save the next week's money and the third week get 10 cents' worth of ferns, of the small variety, for a table centerpiece. If you did not buy any flowers the next week, you would have an extra quarter saved to buy roses or some other extravagance when they were needed for a special occasion. Invest in a couple of inexpensive but pretty baskets, as these make flowers "go farther" and leave to arrange flowers nicely by practicing with them every time you buy them.

Renovating Furniture.

Autumn is a discouraging time for the proud housewife. The moths and dust of summer have corrupted a good deal of her prized possessions; or else, for some reason, they look shabbier and less attractive than they looked when she put them away. Perhaps they really are no shabbier. Perhaps they just look so because she has thought a good deal about them and put them on a high pedestal in her memory. Home possessions and furnishings take on great proportions when we are traveling away from them.

Anyway, autumn is the time to renovate furniture. Spring is a bad time for furniture means less in summer than in winter and moreover summer suns and dust damage it alarmingly. So get out your portieres and curtains and other draperies, and your cushions and pillows, and take off the slip covers from all the furniture, and then take stock of the condition things are in.

Begin with the wood of the furniture. First rub it all with a little oil. An hour or so later, after the oil has had time to soak in, wash the wood with soap and lukewarm water. Dry it immediately after rinsing off the soap with clear water, and then oil it well again. The soap and water will really clean the wood, the first oiling will protect it from all other dirt, and the second will make it look actually shiny will turn out to be beautiful.

If there are white spots on the furniture get them out with a little alcohol mixed with oil and then immediately rub them with clear oil. If the spots are alcohol spots, which are sometimes found on chiffoniers or bathroom furniture, rub them off with a cloth dampened in water and a little ammonia.

Don't be discouraged even if there is a stain in the wood. A little patience and skill will get it out. Cover it first with a pad of brown paper and over this put a wet cloth. Then apply a very hot iron to it. A hot poker or shovel will do so well, but neither of these is so easy to handle as a flat iron. The steaming process, which results will expand the dent and bruised fibers of the wood and plump them out so that they will retain the hollow. After this clean and polish the bruised spot.

If your brass beds look shabby, buy some of the lacquer that comes by the bottle and relacquar them. First, however, try giving them a bath. Bathe them in lukewarm water and dry them immediately. Then rub them with a chamomile dipped in whitening powder.

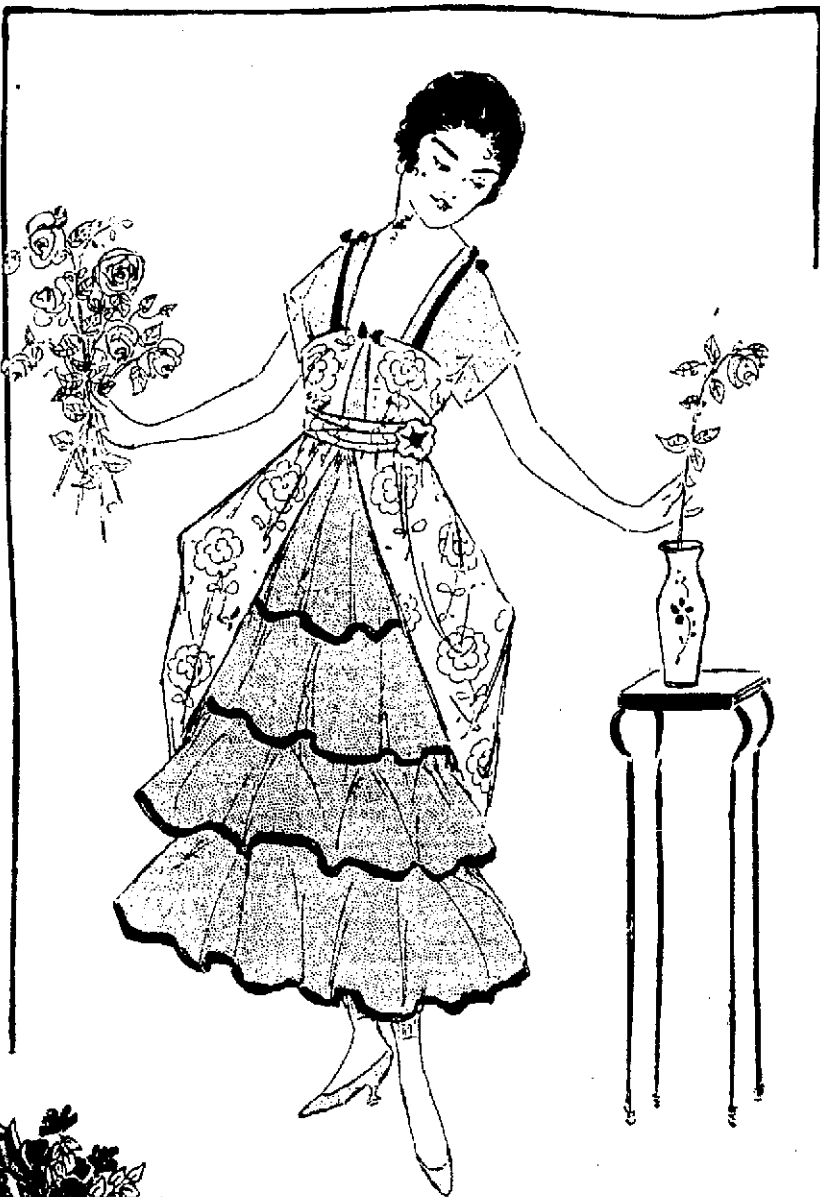

BUTTERFLY PATTY-CAKE PANS.

Small butterfly patty-cake tins can be had for 10 or 12 cents each, and now that the butterfly is having its heyday we might as well have our patty-cakes in style. These little tins could also be used for jelly molds. But whether they are used for cake or jelly they must be carefully used.

If cakes are baked in them, they must be thoroughly buttered in every cranny, so that the cake will come out whole. If jelly is molded in them, it must be carefully unmolded, after the outside of the tin has been moistened with a warm cloth, so that none of the jelly will stick and spoil the shape of the butterfly.

FOR SPICES.

A convenient tin spice case is made with eight small drawers, each labeled with the name of a different spice needed in everyday cooking—sage, cinnamon, cloves, mace and pepper among them. It stands about twelve inches high and is painted yellow, white or red. It sells for 25 cents.

These Cider Recipes Are Worth Using

Keg of Delicious Sap Lasts Short Time if You Make Jelly
Sauce and Beverages of Sparkling Apple Juice that
Members of Whole Household Will Like.

Whether it is the good hard cider, including just long enough in the cask to possess a brisk hardness, or whether it is the bubbling cider just run through the cider mill, sweet and mild—it is all cider, and it is all deliciously suggestive of the return of autumn and the long evenings indoors. And thank the powers which bring the ever-changing seasons, it is autumn again and it is cider time.

Even the small household should be able to use a whole keg of cider, for there are more ways of using cider than most housewives imagine.

Here is a recipe for the good old English mulled cider:

Beat three eggs and add a few tablespoons of sugar, according to taste. Have a quart of cider boiling and pour it over the eggs, stirring it constantly as you do so. Now put the mixture back on the stove and boil again. Remove in glasses or stews if you are afraid of breaking the glasses.

Cider cup calls for a pint of cider, one wine glass full of sherry, two tablespoons of brandy, the seed of a lemon, half an orange sliced thin, three slices of cucumber, if in season, sugar to taste, a little grated nutmeg and a liqueur glass of Curacao. The ingredients should be mixed fresh and served in tall glasses with spoons.

How to Make Cider Jelly.

Here are two rules for making cider jelly. The first one to be made in small quantities for immediate use calls for two ounces of gelatin in a little water. Add it to two and a half pints of cider and one pound of sugar till it begins to thicken. Strain through a cloth and turn out into a jelly mold. When cold and set serve with cakes and cream.

The other jelly recipe calls for good cider, which should be washed, stemmed and cut into quarters and put in the preserving kettle with four quarts of fresh cider to every eight quarts of apples.

Boil until the apples are very tender and then strain measure and for every pint of juice add a pint of sugar. Stir the sugar and juice until the sugar has dissolved and then put on the fire till it boils. Then draw off from the flame and strain carefully. Repeat this boiling and straining process three times. Then pour into jelly moulds that have been brought to the boiling point, and set in the sunshine to cool.

Cider Cake.

Here is a delicious cider cake rule. It calls for one cupful of butter, two cup-

The woman who wisely spends even the small sum of 25 cents a week for cut flowers can occasionally afford winter roses as a treat.

RESTAURANT MANNERS

There are certain little pamphlets published which are warranted to teach one to master the French bill of fare in a surprisingly short time. But those who, even without the help of these remarkable aids to learning, are able to read a French menu at a glance—who know as by instinct, how to give an order to an obsequious, but terrifying waiter—these wonders do not ungraciously and unmanfully things when they are seated as a restaurant table.

There was a time when it was necessary to learn the French language in order to collect souvenirs from the various hotels, restaurants and other eating places they visited. A silver butter plate bearing the crest of some famous hotel, a fork with the monogram of another, a napkin from a dining car and an after-dinner coffee spoon from a well-known cafe, all these were tokens of the traveler's wanderings and were proudly displayed on the mantel.

There are dozens of other things one might do and ought not to do at a restaurant—things the little pamphlets on the mastery of French menus do not touch.

PREPARING FOR WINTER.

A course of sensible dieting will also do much to remedy skin flaws that the summer has brought about. Drink plenty of water, not too cold. Eat as much fruit as you can relish. Lemonade and orange juice should be preferred to ice cream sodas and sundae. A glass of hot water half an hour before breakfast and half an hour before bedtime also works good results.

If summer suns have freckled your skin very badly, use some good freckle lotion to remove them. One that is recommended by specialists is made of the following ingredients: Four ounces of lactic acid, two ounces of glycerin, one ounce rose water. Mix the ingredients well and bottle the lotion. Apply it three or four times a day to the freckles with a piece of clean gauze.

Give the face thorough attention when bathing. If it is very dusty wash it softly with warm water in which there are a few drops of toilet water, without soap. Then pat it partly dry and then rub it well with pure cold cream. Leave the cream on for half an hour and then wash the face thoroughly with warm water and castile or some other mild soap. Rinse it in cool water, in which there is a little benzoin, and dry it thoroughly. Such a bath will do nothing to irritate the skin made sensitive by summer winds and suns and will cleanse it thoroughly.

The Boarding House Training School

The place to lay the foundation of company manners is at home. The place to learn how to pass through the ordeal of a formal dinner with flying colors is at that much despised boarding house dinner table. It never pays to have two sets of manners—everyday, home manners and company manners. Some of these times you are quite sure to get them mixed, and at the worst possible moment for such a mix-up.

We will discuss first the problem of the girl or man who boards—and, the big cities are full of these—been from stores and offices, who pay reasonably good rates of board and have the right to decent table service. And what is more they could have it, if only they would show by their own bearing that they would appreciate it. For instance, how do you enter the dining-room, dear Miss Stenographer? In the morning you lie abed until the very last minute, and come rushing down with only a few minutes for breakfast. You lay your coat across a chair, push up your veil and lay your mat beside your plate.

"An orange, Maggie, and do be quick. I am late again."

You rip open a letter with a hairpin, and then suddenly discover that you came down without cleaning your finger nails. So you use your lap and the table cloth as an apology for a screen and actually clean your finger nails during the wait for the orange. This over, you take the half of an orange in one hand and your hands letter in the other and suck the oranges as you absorb the home news. Is it any wonder that Maggie brings you a dish of oatmeal with some of the cereal running over one side of the saucer dish? Is it any wonder that she slips down your cup of coffee and spills some into the saucer? What sort of an example in table manners do you set to the girl who earns less than half that you do and who looks upon you as her superior?

Now you want a piece of bread, and Maggie is not there, and the man across the table is buried in his paper, as you in your mail. So you take up your fork and poke the bread plate toward you. Just as you are finishing the mark of the day's toil, perhaps your cuffs soiled, and certainly your face in need of powder or washing. The dinner has no charms for you, partly because you are so tired, and you shove back your various courses discontentedly, dipping into one before its predecessor has been removed, crumbling your bread in untidy little piles, slashing into your salad with knife and fork when you should use the fork alone, and otherwise acting as if you did not have to be polite or even womanly, just because you have to board!

Now, suppose you try a new regime at meals. Get up a little earlier in the morning and leave your hat and wraps upstairs. Try to forget you are a working girl whose first instinct is to bolt her food. Make sure that your toilet is complete before you leave your room. Do not come downstairs fastening the pocket of your skirt or setting your necktie. Lay aside your mail and make the eating of even your commonplace breakfast a womanly art. Scoop out the half orange that Maggie brings you with a teaspoon, eat your oatmeal cheerfully from the side, and the point of the spoon; ask Maggie to pass you the bread (for she will probably be watching you in more or less amazement, instead of retreating to the kitchen to complain of impatient boarders); or if Maggie is getting your coffee, ask the young man with the paper if he will kindly pass the bread.

He may have an attack of heart disease at the word "please" in an unhappy boarding house circle, or he may lose his place in the paper, but he will pass the bread, and the next time he may glance up to see whether there is anything on his side of the table that you do need. Maggie may be only a hire-follower, a scullery maid, but she knows which boarder leaves crumbs for her to clean up, spills soup on the table cloth, and drops her knives and forks where they leave ugly spots. And when she finds that you make the least work for her, she will prove your adoring slave and give you cheerfully the service which you think is at the command only of the fortunate girl who eats at high-priced hotels or in fashionable mansions.

Then for dinner, reach home in time to change from your office waist to something fresh and restful. The psychological influence of clean clothes is simply wonderful. They exert a charm over the wearer as well as those who look upon the wearer with new interest. Don't wear tawdy, soiled, party frocks but what you can call, however simply they are made, your dinner frocks. And a dinner-week wardrobe freshly brushed hair, clean hands and face, and the restful feeling which comes with mere cleanliness.

Now, Maggie is going to wait on you a little more attentively if only to see how your hair is dressed, your waist is made, and the young man across the table will pass things where you used to "spoon" them, because he is vaguely grateful to you for brightening up the dinner circle. And then some day when you have an invitation to a real dinner party, the mere service of a well-trained maid will hold no terrors for you.

YELLOW TOMATOES.

The large yellow tomatoes, which look somewhat like faded prototypes of their red brethren, can be made into a very good salad if they are sliced and mixed with an equal amount of dried cold boiled sweet potatoes. They should be served in neat sandwiches on white lettuce leaves and served with mayonnaise dressing.

HOUSEWORK FOR HEALTH

The housewife who has a cottage at the seashore, in the mountains, or in the country for the summer always has some housework to do, no matter how many servants she may employ; for company is sure to descend in unexpected numbers on the generous owner of a cottage, and she must make and make a man of science to their limit to keep things running smoothly, and to give the guests what they came for—a pleasant, comfortable, restful time, with enough appetizing and refreshing food to satisfy their appetites.

Housework can be turned into really beneficial exercise, or it can be done in such a way that it brings not only discomfort but real physical ill with it. Take sweeping, for instance. At best it is hardly a delightful pastime. As worst it is a cruel and senseless waste of time and energy. It is a strain on the arms and mouth and lungs with choking dust; it cramps the chest; it tires the arms and bends the back to the breaking point. Done properly, however, sweeping may be made to strengthen the arms and back muscles. Stand erect and keep the chest out and the back straight. Hold the head up. Sweep with a long, swinging motion of the arms. Cover the half with a scarf or cap, and, if the hands are warm and unused to work, wear loose, washable cotton gloves, and avoid colicous, sprinkle the carpet with

WORKADAY BEAUTY

It is rather an odd thing that most working people spend the greater part of their waking moments among surroundings that are at least only negligently attractive. Sometimes the surroundings are really unattractive; usually, because they are not well kept, clean, tidy and comfortable. An attractive beauty, they are passably attractive. But they are seldom beautiful. The young woman whose own bedroom is furnished with every indication of taste, whose half the time she spends in a dusty, grimy room, with cracked, stained plaster ceilings, ugly, bare walls, and altogether unattractive surroundings about her. The man who insists that his house shall be the epitome of cleanliness, neatness and beauty is willing to work day after day in an office which is little more than a barn, so far as efforts to beautify it are concerned.

Of course, some offices are beautifully furnished and as clean as any one's house could be. Some school-rooms are more attractive than the homes of the children taught there. From an office, however, which is unattractive and unbusinesslike. The efforts on the part of a woman employee to beautify most business places would be resented and forbidden. Cushions and curtains are out of place among ledgers and filing cabinets.

No matter what the objections to "fussy" furnishings in an office may be, there are few employers who would object to the sort of beauty which the exercise of a little taste and care might bring to an office. To begin with, each worker can keep his or her own desk clean. Much beauty can be gained simply by arrangement. Books and papers neatly and evenly arranged give the beauty that comes from symmetry and repetition. There is seldom objection to the display of some personal possessions

Yellowstone Park— Its Geysers and Its Bears

Old Faithful—
The World's Most Beautiful Geyser

Feeding
the Bear

A Short Sketch of the Wonderland of the Northwest -- The Greatest of Our National Parks.

Copyright, 1915, by The International
Syndicate.

FEW places in the world present to the traveler such a combination of natural wonders and magnificent scenery as does Yellowstone Park—that great National Playground in the northwestern part of the United States, for there one finds weird canyons, beautiful waterfalls, huge geysers, boiling springs and wild animals living in their natural environment in the virgin forest of the Rocky Mountains and as harmless as domestic cats if unmolested. The park embraces a tract of thirty-five hundred square miles set apart by our government "for the benefit and enjoyment of the people." Most of the park lies within the boundaries of the State of Wyoming, with a strip of the northern and western border extending over into the States of Montana and Idaho.

Discovered by Colter.
The park was discovered in 1807 by John Colter, who had branched off

from the Lewis and Clark Expedition on their return after having blazed a trail to the Pacific. As the lone adventurer passed northward from the mouth of the Big Horn to the forks of the Shoshone River he came across an immense tar spring; he continued on through a country where much of the hot springs and geyser phenomena exist and down the Yellowstone River to Tower Falls, and out near the northeastern corner of what is now known as Yellowstone Park. After four years among the Red Skins he had a miraculous escape from the Blackfoot Indians and returned to St. Louis. His stories of the remarkable boiling springs were thought at that time to be products of his imagination and led to the place being named "Colter's Hell."

In 1870 a company of distinguished scientists were sent out by the Government to investigate the "fairy tales and rivers of the Yellowstone." They returned to Washington filled with delight over the great natural wonders of the place and their report was so favorable that Congress decided to preserve the tract and protect it from hunters and persons who might fence off the geysers for personal gain, and on March 1, 1872, the Act making it a National Reservation was passed.

One Round Of Beauty.

From the time the tourist enters the park at Gardiner and travels down the handle to Mammoth Hot Springs, and swings around the pan and down the handle again to Gardiner there is one continuous round of scenic beauty, for the park has been rightly named the Wonderland of America.

Terraces.

At Mammoth Hot Springs where the hot springs and terraces occupy several acres on the slope of Terrace Mountain one is treated to a sight to be found nowhere else on earth. These terraces begin with a queer formation known as the Liberty Cap—an extinct hot spring cone now standing forty feet above the surrounding formations. The terraces are formed by deposits from the hot water, consisting almost exclusively of carbonate of lime, and are essentially different from those in the geyser basins. The colorings of the terraces and springs are exquisite, being delicate blues, greens, pinks and browns, frequently due to a low form of vegetable life which will grow in hot water up to a temperature of one hundred and eighty degrees. The pools above catch the reflection of the sky and are like a huge turquoise, which blends with the coloring of the terraces and forms a perfect riot of color. While many of the pools are boiling others are agitated by the escape of carbonic acid gas at the surface. Small articles left in these springs for five or six days will show a deposit a sixteenth of an inch in thickness. The terraces have been given such names as Minerva, Hymen, Mound, Pulpit, Cleopatra, Angel and Jupiter, the latter being formed from Jupiter Spring and is the largest and prettiest. At one point the traveler may descend into a sort of hot cave known as the "Devil's Kitchen."

low, and that the origin of the heat is in some way associated with the source of volcanic energy. The Upper Geyser Basin is a valley about a mile and a half in length along the Firehole River. The valley floor is covered with the white deposit of silica caused by the overflowing hot waters.

About thirty geysers are clustered in this basin, among them Old Faithful—that great geyser which since its discovery in 1870, has never failed to send up its graceful shower of jets at intervals of sixty to seventy-five minutes. It is beautiful beyond description whether the sun of the wind is playing on its graceful spray, which shoots up from one hundred and twenty-five feet to one hundred and fifty feet. It plays for eight minutes and during that time one is treated to a kaleidoscope of coloring which fairly overwhelms with its grandeur. The mound at its base is filled with little basins, like shallow pools with rims exquisitely beaded—the bottoms showing delicate tints of rose, saffron, orange and white. The throat of the geyser is a peculiar shade of brown. A big searchlight at the hotel is played on the geyser every night. Old Faithful is the greatest geyser in the world and is alone worth a trip to the park.

Geysers.

The geysers for which Yellowstone is so noted are found in detached groups occupying basins or valleys of the great tableland forming the central portion of the park, which has an average elevation of about eight thousand feet above the sea. The volcanic activity that resulted in the formation of the park may be considered as extinct, yet the hot springs so widely distributed over the plateau are convincing evidence of the presence of underground heat and there is no doubt that the waters derive their high temperature from the heated rocks below.

The Bee Hive Geysers
in Action

Terrace

When the Stage Comes In

The Chinaman is named in memory of a Celestial who is said to have established a laundry in the park and who put clothes and soap into the geyser's pool and was annihilated according to the story, by the violent eruption. It is a remarkable fact, however, that a bar or two of soap will cause practically any geyser to play in a few minutes. The practice of causing eruptions in this manner became so common a few years ago that the Government put a stop to it as it was feared that some of the best geysers would be ruined. This whole basin with the weird whiteness of its floor, the gaunt trunks of pine trees killed by the hot waters, the myriads of steaming crystal pools and the spouting geysers, is a scene never to be forgotten.

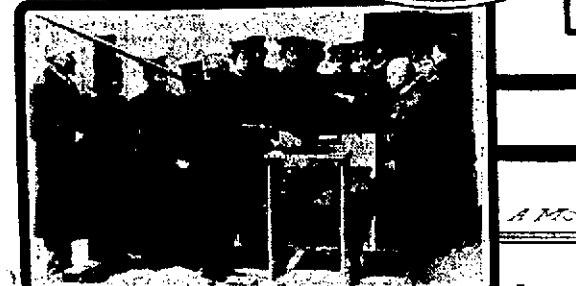

In Norris Basin the geysers steam directly out of the rocks, having no mounds whatever. Several are what are known as mud spouters, shooting up hot masses of wet, pasty earth of a bluish color. The Black Growler is a steam vent only, and all day and all night there is a continual roar and hiss of steam from this opening in the rocks. The earth is so hot at this point that it is deemed unsafe to step directly upon it. A walk has been built across the entire basin and tourists are forbidden to step off of it. A United States soldier always accompanies them to see that the rule is obeyed. Each geyser has its own individuality and beauty and no two are alike, and weeks are sometimes spent by travelers in studying the moods of these marvelous natural wonders.

Animals.

To many the animals of the park are as popular as the geysers, for nowhere else in the world can one come so close to wild animals as in the Yellowstone. Persons are not permitted to carry firearms and are warned against teasing the animals, and the rigid enforcement of this rule has created a feeling of security on the part of the animals, and big black bears may be seen feeding on the garbage dumps near the hotels like domestic animals. They will frequently follow carriages along the roads becoming so insistent in their begging for sugar or candy that they have to be driven away by the soldiers. Their thieving is proverbial and the campers have the greatest difficulty in keeping their supplies out of reach.

The park buffaloes are kept in a corral—straggling remnants of the stateliest hoofed animals in the world. But a few years ago they grazed over the West in countless thousands, but now they are rarely seen except in captivity, so the Government has very wisely set apart a large corral for these fast disappearing animals.

Antelope, mountain sheep, deer, elk and smaller animals roam through the forests unmolested and are often seen from the roads. Petrified trees and fossils are another of the park's natural wonders, some excellent specimens of the former being easy of access from the Tower Falls. The largest tree is about fifteen feet in circumference and stands upright. Although the trees have turned to stone the rings of growth can easily be counted and the external structure of the trunks is nearly as perfect as when the trees were living.

Belgian Girls Doing
Colliers Work at Charleroi

WOMAN'S WORK IN WARTIME

A Mosconger Girl

livery on motorcycles. In this line they have been most efficient. Even the heavy mail and had weather during the winter did not keep the postwoman from being on time. The woman milk-wagon driver has made her appearance in London and the smaller towns. A number of women are working in the blacksmith shops and garages, where they make repairs on automobiles with the alacrity of the men.

Ammunition Makers.

As to their work in the factories in turning out war material, it is little short of marvelous. They are intensely patriotic and vie with each other in turning out war munitions, for they and not the men, are the laborers in the English ammunition factories. This work has disturbed the regulations of the English labor unions, as "transmission has been granted by the Home Office to work women over sixteen years of age overtime and at night work on practically all Government contracts." The women are so eager to do this that an eighteen-year-old girl recently worked thirty hours at a stretch. The Home Office objected to this, and when her employers were asked to explain they told many stories of the energy of the women and their enthusiasm. One girl, they declared, had not had her clothes off for a week, and others worked night and day to get the output up to two millions of cartridges per week, and then bought ribbons with their own money to decorate their machines.

In the Yorkshire khaki factories, the girls work from six A. M. to eight P. M. In the leather factories, where shoes for the soldiers are being made, fifty per cent. of the women are working overtime. Wages are low, yet the cost of living has increased twenty to thirty per cent.

In France.

In France the women are laboring for France. Hundreds of them, acting as chauffeurs, are working with the army, carrying messages for the officers. Several are wireless operators and three are military aviators. They are also acting as tramcar conductors in the cities. At Libreville the women have erected a barricade to save the remaining stupa of the beautiful cathedral which was battered by German shells. It is made of bags of sand and in the work of the French

Woman Carriage
Operator in London

peasant women, who made the bags, hauled the sand, filled the bags, and placed them in position, many times being under fire while working. The great barges which have lately been put into use around Paris and Rouen for bringing in the wounded are drawn by tugboats manned by women, who do all the work, even as stokers and engineers. Out on the French battlefields the women have helped to dig trenches, standing beside the men, during the rain and snow. After the battle is over, they go out and bury the dead and then plant flowers above the graves. "All for La Patrie," is their motto.

Belgium.

In Belgium the work is done almost entirely by women. Even at Charleroi the girls have taken the places of their fathers and brothers in the coal pits, taking out a meager livelihood in hard manual labor. The Germans, however, have forbidden children under sixteen to work in the mines and are feeding them at soup kitchens.

Germany.

In Germany the women are equally strenuous, for they work in the fields and carry the heavy sheaves of wheat to the granary and great loads of potatoes to the warehouses. Practically all of the work horses and oxen have been commandeered for service in the army, so the women have become the basis of burden as well as the laborers for the Fatherland. In many instances women are acting as locomotive engineers and firemen as well as conductors and brakemen, and it is no uncommon sight to see an entire train crew of women. In the cities they

Women Handling Hay
in Rural England

have become motormen as well as conductors. These women have been chosen from among the wives of the men who have been called to colors, a wise measure, for in this way the wives of the soldiers are provided for without their becoming a burden to the State. Nothing is done in a haphazard way in Germany, and these women receive special training before they are allowed to man the cars. A special school has been opened for this purpose where they are taught all the fine points of electrical engineering. It is a strange sight, these German women in their strange accoutrement—skirt, tunic and cap—collecting fares, shouting out streets and answering inquiries from the passengers. Where switches are to be changed, the woman switch-tender comes out from the sidewalk with her rod and throws the switch. As this work is less strenuous, the switch-women are generally the mothers of soldiers. They are provided with little iron chairs on the edge of the sidewalk, where they sit when not at work. Other women clean the streets, doing all the heavy work heretofore done by the men. Wheeling heavy wheelbarrows has no terrors for them. "It is for the Fatherland," they cry. "We must work while our soldiers fight for our homes."

Five thousand German women are employed at the Krupp works at Essen, where they work side by side with the men in making ammunition. There is a certain stoicism about the German woman in this war, which makes the world admire her. She gives up the male members of her family like the Spartan mother of old, and if they fall into mourning, but she does not fall into mourning, but she does her duty within the four walls of her home, and goes forth to labor for those who live. The oneness of purpose of the Germans is the one most remarkable feature of the war.

Russia.

In Russia the women are more militant. They want to "kill the Germans" themselves, and at least five hundred are with the Russian regiments, enrolled under their own names, while the sex of hundreds of others have been discovered only after they have been wounded or killed. These Russian Amazons, especially of the Siberian regiments, are said to show marvelous fighting qualities, their endurance frequently surpassing that of the men. "Yellow Girl," a Russian girl so named on account of her wealth of golden hair, has taken part in three battles. During one of these she killed two German soldiers and recovered the flag which one of them had taken from a dying Russian color bearer. The Cossack women, who are noted for their magnificent riding, have gone into battle beside their husbands and sweethearts, and several of them have been given the rank of officers. Madame Kokovtzeva, the Colonel of the Sixth Ural Cossack regiment, is perhaps the best known of Russia's women soldiers, and certainly the most beloved. She is the widow of a soldier, and in going to the front is carrying out his death wish to have the name of Kokovtzeva continue in the service. She made several of the most gallant charges and recently had the cross of St. George conferred upon her for bravery under fire. There is nothing of the Amazon about this Russian lady, whose sweet womanly tenderness to the wounded seems to have won the hearts of the Cossacks, who bow even to her shadow. As spies the women have accomplished as much if not more than the men, and some stirring stories are told of their bravery in taking all sorts of risks to obtain the desired information. Of woman's ingenuity in thinking of ways of helping during the present war there is no end, and many times the governments of the different countries have appropriated her schemes and ideas in working out victories.

How She Is Taking the Place of Men In Doing All Sorts of Manual Labor.

Copyright, 1915, by The International
Syndicate.

THE present gigantic struggle in Europe, with its tremendous draft upon the men, has cast upon the women burdens which fall upon the male portion of the population in normal times. This is the case in every country involved in the conflict, and in nearly every branch of industry wives, mothers and daughters are performing the tasks of their husbands, their sons and their fathers. The work of the woman physician from the beginning of the war was of great worth, especially in England. It was performed with extraordinary competence and with equally commendable modesty. In peacetime the women doctors had a strong and old-

fashioned prejudice to contend against, for somehow a great many people were of the opinion that nursing was womanly but medicine and surgery were not. War killed the prejudice, and a woman's hospital corps was formed at once under the patronage of Queen Mary. The first unit was sent to France, taking up quarters in Paris. But woman's work was not to end there, and gradually she began to fill the places of the men who had gone to the front. In the rural districts women started to do farm work and the crops of this year were for the most part planted and gathered in by the women. In Germany a few of the peasant women always worked in the field, but the sight of well-to-do English ladies gathering in the hay was an uncommon one.

War Service For Women.

After a time a bureau of war service was opened for women, and by the last of July about 70,000 of them were registered. They were prepared to do anything to serve the country, and as a result there are nearly four hundred

females in Glasgow working as tramway conductors. They are for the period of war on the same conditions as men, working fifty-one hours a week at a minimum wage of \$8.48. At the railway stations throughout England and France the women have replaced the men as ticket sellers, gatekeepers, and at several places are acting as porters. At Marylebone they have taken the men's places as car cleaners, and it is said that the trains are far cleaner than they were when the men did the work.

All Sorts Of Work.

At the stores and hotels they have replaced the men carriage operators, and they stand about in their rubber suits in the pouring rain, calling cabs and opening and shutting the doors. All the hotels now have page girls instead of page boys. They also run the elevators for shops and hotels and act as shipppers for some of the stores. They also deliver goods, drive vans, taxicabs and mail wagons, act as mail carriers, especially in the rural districts, where they make their de-

1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 2679, 2680, 26

CHILDREN'S plain dresses made weekly, \$50. Other sewing priced accordingly. Phone 4218 W.

LINEMAN IS FATALLY BURNED BY A LIVE WIRE

Employee San Joaquin
Light and Power Com-
pany Injured

H. H. Bell Struck By
Electric "Arc" While
Working on Ammeters

Suffering from burns which cover two-thirds of his body caused by his coming in contact with a live wire in the power sub-station of the San Joaquin Light and Power company at O and Fresno streets, H. H. Bell is in the Eastgate sanitarium fatally hurt.

The accident which occurred at 1:05 o'clock yesterday afternoon was due to a short circuit, but what caused it is not known as none of the employees in the plant at the time saw Bell when he was injured.

Bell was working on ammeters, standing on a ladder, when in some manner he came in contact with live wires, which caused an "arc" which struck him in the face and chest, setting his clothing on fire and knocking him to the floor. The ammeters carried a voltage of 2300 volts and the full force of this passed through him. That he was not instantly killed is considered a miracle.

His fellow workmen at once went to his assistance, the flames were extinguished with chemical extinguishers and meanwhile medical aid was summoned. Dr. E. L. R. Burke responded, who after administering first aid had him removed to the Eastgate Sanitarium. Examination at the hospital disclosed that Bell was suffering from second and third degree burns which covered two-thirds of his body.

The accident burned out four ammeters on the switchboard and put out of service two districts in Fresno, the J and K district and the Belmont district, shutting off power for street cars and elevators and other machinery and tying up service for one hour and forty minutes, before necessary repairs could be made.

Bell was an old employee of the company, having been with them for several years. He was considered a careful worker. He is married, his wife is in San Francisco. She has been notified of the accident.

FAREWELL SERMON TO BE GIVEN BY PASTOR

Rev. Thomas Burden Will
Leave This Week for
Bakersfield

Rev. Thomas Burden will preach his farewell sermon to the congregation of Grace M. E. church this evening, and will leave the middle of the week for Bakersfield, having been chosen pastor of the new Memorial church in East Bakersfield. Rev. Burden came to Fresno from Boston two years ago, and at the last conference the bishop and his cabinet felt that Rev. Burden merited promotion by his record here, and he was assigned to the church at Bakersfield, which carries a larger salary. During his pastorate here Rev. Burden has increased the membership of the church by 60, has built a wing to the church, costing \$500, established a community center and a branch library for East Fresno, which in ten weeks has been visited by 400. He was given an unanimous invitation to return by the congregation, with whom he has at all times been in perfect harmony, and while all regretted that he was not returned for the regular four-year period, they rejoice in his going to a larger field of endeavor.

SUMMON WITNESSES IN KERN COUNTY OIL CASES

Government Suit to Ob-
tain Title to Valuable
Property Begins Oct. 18

Special Court for Two
Weeks; Sixty Sum-
moned to Appear

The suit of the government to obtain the title to valuable oil lands in section 32 of the Maricopa flats, valued at several millions of dollars, and which are now in the hands of a receiver appointed by the Federal Court, will begin in this city on October 18.

A special session of the court has been set to examine some sixty witnesses who have been subpoenaed by Deputy U. S. Marshal S. J. Shannon. It is thought that the examination of the witnesses will require two weeks. Judge H. P. Blodgett will conduct the hearing.

The suit is being brought against the American Oil Fields, Ltd., et al. Midway-Northern Company, et al. G. W. McCutcheon, David Kinsey et al. and Midway Oil Fields Company, Ltd., et al.

The property is in the heart of the Midway fields and on the same quarter section as the Obispo Oil Company property, which is being held in escrow by the Federal government.

In the suits 40,970 acres are involved, and represent a valuation into the millions of dollars. The Federal government contends that the lands were filed upon after they were withdrawn by the act of President Taft in 1910.

They also allege that the property has been damaged to the extent of several millions of dollars in the development, by permitting water to saturate the oil strata. It was on this latter contention that they obtained an order from the Federal Court to have a receiver appointed.

The present suits are but a few of several started by the government in 1912 to regain possession of 154,000 acres of land, most of which is situated in Kern county and filed upon by the Southern Pacific Company, E. C. Justice, special prosecutor, is conducting the cases, while the best corporation lawyers in the state have been pitted against him.

Following the taking of evidence here, the case will be again moved to Los Angeles, where it is believed that a final disposition will be obtained by the end of the year.

GIVE SACRED MUSIC TONIGHT

A revival of sacred song and reading will be given at the First Congregational church this evening by Mrs. K. P. M. Cleaves of Los Angeles. The songs and readings are arranged for the development of a single theme, "Friendship." The readings are mostly familiar biblical stories, but Mrs. Cleaves' rendition promises to give them new life and meaning. The songs are also the ones that are well known and never too old.

Mrs. Cleaves has sung in Fresno before, but her rich contralto voice has pleased many congregations in other cities. The program follows:

Solo—"The Lord Is My Helper," (Mrs. Mary Adams).
Reading—"The Resurrection of the Kingdom of Judah."

Solo—"The Lord's Prayer," (Hans Steltz).
Readings—(a) Anointing of David; (b) Covenant between Jonathan and David.

Solo—"Mizpah."
Readings—(a) Raising of Lazarus; (b) Vision of Peter.

Solos—(a) Just As I Am; (b) Rock of Ages.
Reading—"A personal reminiscence."

Y. W. C. A. TO OPEN CLASSES

McCabe, Mondays and Fridays, 7:30 p. m. Wednesdays, 10-11 a. m., Saturdays, 9:30-10:30 and 10:30-11:30 a. m.

DISCOVERY DAY TO BE CELEBRATED

Fresno Council No. 540 Knights of Columbus, which had planned to celebrate Discovery Day on October 12, has postponed the day on account of the date coming within the thirty-day period of mourning prescribed by the administrator of the diocese, out of respect for the late Rt. Rev. Bishop Thomas J. Connelley. The date now fixed for the celebration is fixed for Wednesday, October 20, at the same hour and place.

Italians of Clovis will observe Discovery Day today. High mass will be celebrated at 10 o'clock this morning. A parade will follow on October 12. At 2:30 o'clock there will be a ball game and races. At 7:30 o'clock the band will give a concert, followed by a lecture in English by Prof. Cox, and another by the Rev. Lewis Miller, the pastor and one in Italian by Prof. D'Aquila.

INAUGURATE SUNDAY DINNER

This evening the Commercial Club will inaugurate its Sunday dinners for the season, and thereafter each Sunday eve dinner will be served from 6:30 to 8 o'clock.

DIVORCE PETITION FILED

Petition for divorce has been filed in the superior court by S. L. Pederson, who asks divorce from John Pederson.

SUPERVISORS TAKE RECESS
The board of supervisors was not in session yesterday, having adjourned over until Monday.

SWEATY FEET

Kutner's Pays You Dividends

A GROUP OF COMMANDING NEW STYLES THAT WE SHOW

at \$25. During our Annual Suit Week, October 11th to 16th

Here Are Six of the Many High Class Suits On Sale at Kutner's Monday, 11th to 16th, at \$25

—Women will come here tomorrow in hundreds for it is seldom indeed, that such opportunities arise as those now presented in the Garment Department.

—These suit values represent months of planning on our part and in consequence we have for your choosing a collection of suits at \$25.00 comprising all that is newest and best in style and fabrics and a variety sufficient to satisfy every individual requirement, and we particularly want to emphasize the fact that every suit is Fresh, Seasonable and Desirable in every Particular, and if you were buying most any one in the ordinary way, you would pay \$35.00 or \$40.00 for it.

Alterations Free As Usual

—Notwithstanding the extra special price of these suits —Alterations on them will be FREE. In most stores alterations are extra on sale price garments.

The Newest and Most Beautiful Fabrics Are Represented In These Suits

—Rich velvets—Lustrous Broadcloths, fashionable novelty weaves and smart gabardines, etc.—Fur, braid and velvet trimmed—Tailored and dashing novelty effects—The picture above gives you an idea of six of the very many styles you have to select from—

Women's \$15 Pattern Hats \$7.50

—This is a season of real art in millinery—Trimmings are mostly noticeable by their absence. The hats are hats of beauty—but the beauty lies chiefly in the charm of the graceful lines and rich velvets.

—These \$15.00 pattern hats we are featuring at \$7.50 show all the bewitching charm of the present mode—One hat in particular is in the new postillion shape and simply trimmed at side with a ribbon cockade—There are many beautiful styles in toques, turbans and sallors—as well as the more elaborately trimmed dress hats—All very special at \$7.50 each.

New Purses

—Long, narrow envelope purses in fancy patent leather—Hand clasp and strongly lined, \$1.50.
—Lucky elephant purses prettily fitted with mirror and coin purse, \$1.50.
—New melon shaped purses, fitted with coin purses and mirror—Price \$1.50.
—Children's purses in attractive new shapes and colors—fitted with mirror and coin purse. Price 65c each.

Fancy Pins for the Hair 25c

—Long, slender poignards and Chinese pins that add to the charm of a woman's hair—Some are 25c —Others are 35c and 50c.

Pony Hose for Boys and Girls

—If you have stockings to buy for boys or girls you should get acquainted with Pony hose — fine, medium and heavy weight at 25c pair.

Munsingwear for Winter

—For men, women and children.
—Our trade in Munsingwear has grown each succeeding season. It is the most satisfactory underwear we ever sold.

—It fits well, washes well and wears well. Our customers who have worn Munsing Union Suits will not wear any other kind.

—Kutner's are sole agents for Fresno.

Extra Full Cut Daisy Flannel Gowns for Women 95c

—These gowns are cut extra wide and long and are made of good, heavy quality daisy flannel—in all white or in stripes. High neck and long sleeves, or low neck and short sleeves—95c each.

—Children's Daisy Flannel Gowns—cut good and full—75c each.

"Wirthmor" Waists \$1.00

—Pictured above are 4 of the many "Wirthmor" at Kutner's for \$1.00 each.

—How can such beautiful waists be sold at just one dollar—is often asked.

—The answer is, we, in common with one other good store in practically every city in America, have an arrangement with the maker, which has materially lowered the cost of making and distributing these waists—and the large saving thus affected has been used to give added values to the waists.

Dressy Crepe de Chine and Chiffon Waists \$3.95

—A very beautiful showing of dressy waists in silk crepe or chiffon—Trimmed with soft shadow lace and fancy buttons. Some with delicate finishing of hemstitching—Very specially priced at \$3.95.

Japanese Crepe Kimonos \$1.95

—Women's kimonos in light blue or pink Japanese crepe—Prettily embroidered in raised white flowers—\$1.95 each.

Colored Silk Sweaters \$3.50

—Women's and misses' silk fiber sweaters in melon pink, old rose, rich blue and yellow or green—Sash at waist—Price \$3.50.

Musical Club

—Tickets for the forthcoming concerts may be had at the White Theater.

—Ticket with reserved seat for the season, \$5.50.

—First concert Monday evening, Oct. 11th.

65c Bungalow Aprons 48c

—A good apron special for Monday—Women's full cut, full length bungalow aprons in pretty striped percales—Can be nicely used for house dresses—Dark and light colors—

Camisoles for Dainty Waists

—The new all lace and net waists make the wearing of a camisole absolutely necessary—Kutner's are showing pretty styles in crepe de chine with shadow lace trimming in white or flesh at 95c, \$1.50 and \$2.00 each.

Lovely Silk Hose 95c

—The famous 50c Kutner kind—of pure silk, in a rich, heavy thread—Come in black, white and colors.

Showing of Exclusive New Cretonnes for Curtains, Etc.

—Cretonnes occupy an important part in the furnishing of the modern home—and add much color and beauty to a room if properly selected. The very large stock of fancy cretonnes we are showing are exclusive with ourselves and we have expert salespeople fully conversant with the many uses of this popular drapery who will gladly aid you in selecting.

3 Popular Curtain Materials

—Marquisette, Mercerized, plain and hemstitched borders, 25c.
—Bungalow Nets—Finely woven, small neat patterns—42 inches wide, 35c.
—Scotch Madras—Woven designs, is a new idea in window drapery—36 inches wide, 25c.

"Bobby Burns" 2 Pants Suits for Boys at \$5

—Parents seeking boys' clothes with a famous reputation for workmanship and quality—will do wisely to investigate the "Bobby Burns" 2-pants suits for boys at \$5.00.

—The suit for play or for dress. All wool materials in boyish patterns. Coat and pants lined throughout, and an extra pair of pants with every suit.

Men's New Fall Hats \$2 to \$3.50

—Hats with high and medium crowns—with rolling, snap or pencil brim—New Fall creases—in shades of gray, brown and black, etc. All sizes from \$2.00 each to \$3.50.

—See the New Fall "Stetson" models from \$4.00 each up to \$6.00.

Free Fares

—We call the attention of out-of-town customers to the fact that their R. R. fares on purchases of \$15.00 or more in our 1 Street Store will be refunded to points within 20 miles of Fresno.

Acme Dress Forms

—Can be adjusted so as to fit every woman in the family—

—With the Acme Form, you can build up, right before your eyes, detail by detail, the most stylish garments in your fashion books, to your exact measurements.

—When you fit your garments on the Acme Form, you will never have to try them on until they are finished. You can see from every angle exactly how it is going to look on you without having to stand and crane your neck before a mirror to see how it looks in back.

—Then you can wear it with the comfortable assurance that you are perfectly fitted, and correctly gowned.
